1988 - 7 Maps	

Limited Permission to Photocopy

Total Maps: 84

Matrix Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This report contains information obtained from a variety of public and other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. USER'S GUIDE

This User's Guide provides guidelines for accessing Sanborn Map® images and for transferring them to your Word Processor.

Reading Sanborn Maps

- Sanborn Maps document historical property use by displaying property information through words, abbreviations, and map symbols. The Sanborn Map Key provides information to help interpret the symbols and abbreviations used on Sanborn Maps. The Key is available from EDR's Web Site at: <http://www.edrnet.com/reports/samples/key.pdf>

Organization of Electronic Sanborn Image File

- Sanborn Map Report, listing years of coverage
- User's Guide
- Oldest Sanborn Map Image
- Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

1. Open file on screen.
2. Identify TP (Target Property) on the most recent map.
3. Find TP on older printed images.
4. Using Acrobat® Reader®, zoom to 250% in order to view more clearly. (200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.)
 - A. On the menu bar, click "View" and then "Zoom to..."
 - B. Or, use the magnifying tool and drag a box around the TP

Printing a Sanborn Map From the Electronic File

- EDR recommends printing images at 300 dpi (300 dpi prints faster than 600 dpi)
- To print only the TP area, cut and paste from Acrobat to your word processor application.

Acrobat Versions 6 and 7

1. Go to the menu bar
2. Click the "Select Tool"
3. Draw a box around the area selected
4. "Right click" on your mouse
5. Select "Copy Image to Clipboard"
6. Go to Word Processor such as Microsoft Word, paste and print.

Acrobat Version 5

1. Go to the menu bar
2. Click the "Graphics Select Tool"
3. Draw a box around the area selected
4. Go to "Menu"
5. Highlight "Edit"
6. Highlight "Copy"
7. Go to Word Processor such as Microsoft Word, paste and print.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as "1 of 3", "2 of 3", etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

Customer Project: 04171

1014381ERK 973-240-1800

Based on client-supplied information, fire insurance maps for the following years were identified

1925 - 8 Maps
1939 - 11 Maps
1950 - 11 Maps
1961 - 12 Maps
1969 - 25 Maps
1980 - 19 Maps

Limited Permission to Photocopy

Total Maps: 86

Matrix Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2005 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission. EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

USER'S GUIDE

This User's Guide provides guidelines for accessing Sanborn Map® images and for transferring them to your Word Processor.

Reading Sanborn Maps

- Sanborn Maps document historical property use by displaying property information through words, abbreviations, and map symbols. The Sanborn Map Key provides information to help interpret the symbols and abbreviations used on Sanborn Maps. The Key is available from EDR's Web Site at: <http://www.edrnet.com/reports/samples/key.pdf>

Organization of Electronic Sanborn Image File

- Sanborn Map Report, listing years of coverage
- User's Guide
- Oldest Sanborn Map Image
- Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

1. Open file on screen.
2. Identify TP (Target Property) on the most recent map.
3. Find TP on older printed images.
4. Using Acrobat® Reader®, zoom to 250% in order to view more clearly. (200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.)
 - A. On the menu bar, click "View" and then "Zoom to..."
 - B. Or, use the magnifying tool and drag a box around the TP

Printing a Sanborn Map From the Electronic File

- EDR recommends printing images at 300 dpi (300 dpi prints faster than 600 dpi)
- To print only the TP area, cut and paste from Acrobat to your word processor application.

Acrobat Versions 6 and 7

1. Go to the menu bar
2. Click the "Select Tool"
3. Draw a box around the area selected
4. "Right click" on your mouse
5. Select "Copy Image to Clipboard"
6. Go to Word Processor such as Microsoft Word, paste and print.

Acrobat Version 5

1. Go to the menu bar
2. Click the "Graphics Select Tool"
3. Draw a box around the area selected
4. Go to "Menu"
5. Highlight "Edit"
6. Highlight "Copy"
7. Go to Word Processor such as Microsoft Word, paste and print.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as "1 of 3", "2 of 3", etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

Based on client-supplied information, fire insurance maps for the following years were identified

1910 - 6 Maps
1917 - 5 Maps
1924 - 4 Maps
1934 - 13 Maps
1936 - 5 Maps
1950 - 18 Maps
1961 - 6 Maps
1970 - 6 Maps

Limited Permission to Photocopy

Total Maps: 63

Matrix Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2005 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission. EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

USER'S GUIDE

This User's Guide provides guidelines for accessing Sanborn Map® images and for transferring them to your Word Processor.

Reading Sanborn Maps

- Sanborn Maps document historical property use by displaying property information through words, abbreviations, and map symbols. The Sanborn Map Key provides information to help interpret the symbols and abbreviations used on Sanborn Maps. The Key is available from EDR's Web Site at: <http://www.edrnet.com/reports/samples/key.pdf>

Organization of Electronic Sanborn Image File

- Sanborn Map Report, listing years of coverage
- User's Guide
- Oldest Sanborn Map Image
- Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

1. Open file on screen.
2. Identify TP (Target Property) on the most recent map.
3. Find TP on older printed images.
4. Using Acrobat® Reader®, zoom to 250% in order to view more clearly. (200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.)
 - A. On the menu bar, click "View" and then "Zoom to..."
 - B. Or, use the magnifying tool and drag a box around the TP

Printing a Sanborn Map From the Electronic File

- EDR recommends printing images at 300 dpi (300 dpi prints faster than 600 dpi)
- To print only the TP area, cut and paste from Acrobat to your word processor application.

Acrobat Versions 6 and 7

1. Go to the menu bar
2. Click the "Select Tool"
3. Draw a box around the area selected
4. "Right click" on your mouse
5. Select "Copy Image to Clipboard"
6. Go to Word Processor such as Microsoft Word, paste and print.

Acrobat Version 5

1. Go to the menu bar
2. Click the "Graphics Select Tool"
3. Draw a box around the area selected
4. Go to "Menu"
5. Highlight "Edit"
6. Highlight "Copy"
7. Go to Word Processor such as Microsoft Word, paste and print.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as "1 of 3", "2 of 3", etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

WATER FACILITIES:
Water supplied by the Jamaica Water Supply Co. which also supplies the Port of Spain. The water depth of Queens Water District through M-12 is 8'-6" and 6" minus from the existing stations one situated at Jamaica about 5 miles west of Floral Park and one situated about 11 miles S.W. of Floral Park at Elwood L. about 50 feet high. Details regarding source of supply, main lines and capacity of pipeline, capacity of stand pipes or reservoirs, pressure, refused at the Office of the Jamaica Water Supply Co.

FIRE DEPT:
volunteer, 20 members. No horses. 1 H&L truck carries four fire extinguishers. 2 hose reels. Total amount of hose 1600'. Alarm by bell on H&L house.
Grades level. Roads in good condition. Public lighting, etc. Inland Street lamps.

Limited Permission to Photocopy

Total Maps: 59

Matrix Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2005 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission. EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

USER'S GUIDE

This User's Guide provides guidelines for accessing Sanborn Map® images and for transferring them to your Word Processor.

Reading Sanborn Maps

- Sanborn Maps document historical property use by displaying property information through words, abbreviations, and map symbols. The Sanborn Map Key provides information to help interpret the symbols and abbreviations used on Sanborn Maps. The Key is available from EDR's Web Site at: <http://www.edrnet.com/reports/samples/key.pdf>

Organization of Electronic Sanborn Image File

- Sanborn Map Report, listing years of coverage
- User's Guide
- Oldest Sanborn Map Image
- Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

1. Open file on screen.
2. Identify TP (Target Property) on the most recent map.
3. Find TP on older printed images.
4. Using Acrobat® Reader®, zoom to 250% in order to view more clearly. (200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.)
 - A. On the menu bar, click "View" and then "Zoom to..."
 - B. Or, use the magnifying tool and drag a box around the TP

Printing a Sanborn Map From the Electronic File

- EDR recommends printing images at 300 dpi (300 dpi prints faster than 600 dpi)
- To print only the TP area, cut and paste from Acrobat to your word processor application.

Acrobat Versions 6 and 7

1. Go to the menu bar
2. Click the "Select Tool"
3. Draw a box around the area selected
4. "Right click" on your mouse
5. Select "Copy Image to Clipboard"
6. Go to Word Processor such as Microsoft Word, paste and print.

Acrobat Version 5

1. Go to the menu bar
2. Click the "Graphics Select Tool"
3. Draw a box around the area selected
4. Go to "Menu"
5. Highlight "Edit"
6. Highlight "Copy"
7. Go to Word Processor such as Microsoft Word, paste and print.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as "1 of 3", "2 of 3", etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

Contact: Jody Mack

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Matrix New World Eng., Inc. were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 16C5-46D2-94DB

Limited Permission To Make Copies

Matrix New World Eng., Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 NPL

sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
GENESCO INC. SITE 11	150 FULTON AVENUE	0	4
JACKSON STEEL PRODUC	435 1ST ST	0	32

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there are 5 SEMS sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 2 RCRA-LQG sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 6 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 8 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 36 RCRA NonGen / NLR sites within the searched area.

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 09/10/2015 has revealed that there are 2 US ENG CONTROLS sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
GENESCO INC. SITE 11	150 FULTON AVENUE	0	4
JACKSON STEEL PRODUC	435 1ST ST	0	32

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 09/10/2015 has revealed that there is 1 US INST CONTROL site within the searched area.

EXECUTIVE SUMMARY

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2012 has revealed that there are 2 TSCA sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>

CITRUS & ALLIED ESSE	15 MAYFLOWER	19	651

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 2 FTTS sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<i>GIM METAL PRODUCTS,</i>	<i>164 GLEN COVE RD</i>	<i>10</i>	<i>294</i>
<i>NASSAU CHROMIUM PLAT</i>	<i>122 SECOND ST</i>	<i>12</i>	<i>399</i>

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/20/2015 has revealed that there are 75 FINDS sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/20/2015 has revealed that there are 8 US AIRS sites within the searched area.

EXECUTIVE SUMMARY

STATE AND LOCAL RECORDS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 5 NY SHWS sites within the searched area.

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 08/01/2015 has revealed that there is 1 NY VAPOR REOPENED site within the searched area.

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 29 NY LTANKS sites within the searched area.

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, and dated 02/17/2016 has revealed that there are 2 NY VCP sites within the searched area.

NY SPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

A review of the NY SPDES list, as provided by EDR, and dated 02/04/2016 has revealed that there are 2 NY SPDES sites within the searched area.

EDR PROPRIETARY RECORDS

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 24 EDR Hist Auto sites within the searched area.

Summary Details:

Conditions at Proposal September 1997): The Fulton Avenue site is located on the west central portion of the Garden City Industrial Park. This property has been active since the early 1960s, and various tenants have occupied the property since that time including Genesco, Inc. 1964 to 1976), Halperin Knitting Mills 1975 to 1976), Robelan Displays, Inc. 1977 to an unknown date), and Cymann Designs, Inc. 1988 to present). Halperin Knitting Mills operated as a cutting mill. Knit fabrics were received in tubular form and the fabrics were then cut, cleaned, and sewed together. Waste products generated by Halperin included waste oils from the dry cleaning operation. Robelan Displays, Inc., manufactured displays at the site. Materials utilized in this process included paints and lacquer thinners. Cymann Designs is a furniture distribution warehouse. In 1985, during a Nassau County Department of Health (NCDH) ground water contamination study, the Garden City Industrial Park was identified as a potential source for volatile organic compound (VOC) contamination in the ground water. In 1991, the NCDH, together with the Nassau County Department of Public Works (NCDPW), conducted a ground water study of the Garden City Industrial Park. During this investigation, twelve additional monitoring wells were installed within and downgradient of the park, and two monitoring wells were installed upgradient of the park. Two rounds of samples were collected from these wells, as well as the existing wells, and analysis indicated the presence of VOCs, including tetrachloroethene (PCE). In 1994, a Preliminary Site Assessment (PSA) was conducted by the New York State Department of Environmental Conservation (NYSDEC). The study area investigated during this PSA included approximately 40 acres of the Garden City Industrial Park. During the PSA 61 ground water samples were collected and analyzed at an on-site mobile laboratory. Analysis of the ground water samples indicated the presence of numerous VOCs, including PCE and trichloroethene (TCE). Based on these results, it was alleged that a source entry for the PCE contamination is present at 150 Fulton Avenue. Also as part of the PSA, an industrial survey was conducted by NYSDEC at several facilities within the Garden City Industrial Park, including Cymann Designs, Inc. Cymann Designs, Inc. is a wholesale distribution warehouse that reportedly does not use any chemicals in their business. Prior to Cymann Designs, Inc. a dry cleaner of cloth material occupied the building. In 1995, NYSDEC conducted additional sampling at the Garden City Industrial Park. One of these samples included a sediment sample collected from a dry well located at 150 Fulton Avenue. Analysis of this sample indicated the presence of 5,300,000 parts per billion of PCE. On June 18, 1996, a cooperative sampling event was conducted for the Fulton Avenue site by NYSDEC and EPA. During this sampling event, ground water samples were collected from several monitoring wells located within the Garden City Industrial Park. Analysis of the samples collected from these wells indicated the presence of PCE, TCE, and 1,2-dichloroethene total) in wells downgradient of the dry well located at 150 Fulton Avenue. Drinking water wells tapping the Upper Glacial - Magothy Aquifer System within four miles of

the site serve an aggregate population of 100,528 people. The site is located over a New York State-designated Wellhead Protection Area. Status March 1998): Currently, two Interim Remedial Measures IRMs) are planned for the site, one for soils in the immediate vicinity of the dry well, and a second for nearby ground water. The soil IRM will consist of removing contaminated sediments and soils from the base of the dry well, remediating the deep soils using two technologies entitled Air Sparging/Soil Vapor Extraction AS/SVE). The design for the soil IRM is currently under review. The nearby ground water within the shallow Upper Glacial aquifer will be remediated using an in-well air-stripping system. The conceptualization for this remediation technology is currently being prepared. The Remedial Investigation/Feasibility Study RI/FS) workplan is currently being reviewed. The description of the site (release) is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

Site Description: The Fulton Avenue Superfund Site (the Site) includes a 0.8-acre property located at 150 Fulton Avenue, Garden City Park, Nassau County, New York (hereinafter, the Fulton Property), all contamination emanating from the Fulton Property, as well all other contamination impacting the groundwater in the vicinity of the Fulton Property including an overlapping TCE-dominant plume in the Upper Glacial and Magothy aquifers, whose origin is currently unknown, and all sources of this contamination. The Fulton Property is owned by Gordon Atlantic Corporation. It is located within the Garden City Park Industrial Area (GCPIA), Village of Garden City Park, Town of North Hempstead, Nassau County, New York. A fabric-cutting mill operated at the Fulton Property from approximately January 1, 1965 through approximately December 31, 1974, and these operations included dry-cleaning of fabric with tetrachloroethylene (PCE). Currently, the Fulton Property is occupied by a business support company. Approximately 208,000 people live within three miles of the Fulton Property. There are about 20,000 people living within a mile of the Fulton Property. Residents within the area obtain their drinking water from public supply wells. The vicinity of the Fulton Property is industrial but residential areas are immediately adjacent to the industrial area. The Site is situated

in the outwash plain on Long Island, New York. Approximately 500 feet of interbedded sands and limited clay lenses overlay Precambrian bedrock. There are three aquifers that exist beneath the Site, two of which are affected. The Upper Glacial aquifer is the surficial unit which overlies the Magothy aquifer. The Magothy is the primary source for public water in the area. No impeding clays were observed between the Upper Glacial and Magothy aquifers within the study area (the entire area investigated during the Operable Unit I [OU-I] Remedial Investigation [RI]). Beginning in 1986, numerous investigations were conducted by the Nassau County Departments of Health (NCDH) and Public Works (NCDPW) to identify the source(s) of chlorinated volatile organic compounds (VOCs) impacting numerous public supply wells located downgradient of the GCPIA. Based on the results of these investigations, the New York State Department of Environmental Conservation (NYSDEC) placed the Fulton Property on the Registry of Inactive Hazardous Waste Disposal Sites in New York State and conducted an investigation of the GCPIA which was finalized in late 1996. On March 6, 1998, EPA placed the Site on the National Priorities List (NPL) of hazardous substance sites under CERCLA. Thereafter, NYSDEC, as the lead regulatory agency, oversaw the implementation of a Remedial Investigation and Feasibility Study (RI/FS) and an Interim Remedial Measure (IRM) described below. In 1999, under an Administrative Order with NYSDEC, a Potentially Responsible Party (PRP), Genesco, Inc., contracted a contractor to conduct an RI/FS of the Site. The purpose of the RI was to define the nature and extent of contamination at the Site. Field work for this effort began with the drilling of vertical profile wells in early 2000. During the RI, 20 monitoring wells were installed in three separate mobilizations within a study area which extended approximately north to Jericho Turnpike, south to Cambridge Avenue, east to Herricks Road, and west to New Hyde Park Road (hereinafter, the Study Area). Following the first two successive field mobilizations of monitoring well installation and sampling, the first draft RI was submitted to NYSDEC and EPA in August 2002. Evaluation of the findings contained in the August 2002 Draft RI led to NYSDEC and EPA requiring further work to better delineate the downgradient extent of the contaminant plume. In the Spring of 2003, two eight-zone monitoring wells were installed downgradient of Garden City Water District wells 13 and 14. In August 2005, an updated draft RI was submitted to NYSDEC and EPA. Although the document did not fully define the nature and extent of contamination at the Site, this document was revised and approved by NYSDEC in November 2005 and EPA determined it was sufficient for purposes of the first operable unit. The PRP also conducted an IRM from August 1998 to December 2001 to remove contaminants from an original dry well on the Fulton Property in, order to prevent further contaminant migration into the aquifer and into the indoor air at the Fulton Property facility. Following the excavation of contaminated soils from the bottom of the drywell, a soil vapor extraction (SVE) system was installed to address residual soil contamination and operated until the soil vapor contaminant concentrations met New York State Department of Health (NYSDOH) guidance values. Over 10,000 pounds of PCE were removed from the source area at the Fulton Property during the operation of the SVE system. Following this action, the PRP installed a sub-slab depressurization system under the building at the Fulton Property to provide additional protection to the occupants from exposure to the contamination. This system remains in operation. Once adequate data were collected during the RI, the evaluation of remedial alternatives for the FS was begun. A draft FS was received by EPA and NYSDEC in February 2006. A revised second draft of the FS was resubmitted in July 2006. In February of 2007, EPA produced an addendum to the FS to clarify issues in the second draft of the FS. The draft FS and addendum were approved by NYSDEC on February 15, 2007. NYSDEC and EPA agreed that EPA would be designated as the lead agency for the Fulton Avenue Site at the conclusion of the RI/FS process discussed above. The land uses within

the Study Area are a mix of residential, commercial, and industrial. All groundwater in New York State is classified as GA, which is groundwater suitable as a source of drinking water. Groundwater in the immediate vicinity of the Site is currently used as a source of drinking water and there is also a future potential beneficial use of groundwater at the Site as a drinking water source. Public water supply wells of the Nassau County Water Authority are located approximately one mile southwest of the Fulton Property. A Record of Decision addressing OU-1 was completed in September 2007.

Record Upd: 11/04/2015
Updated By: JBSWARTO

Site Description: This facility is located in the Garden City Park Industrial Area in North Hempstead. The Nassau County Department of Health identified the Garden City Park Industrial Area as a possible source of groundwater contamination in the report entitled "Investigation of Contaminated Aquifer Segments, Nassau County, New York, 1986." A subsequent investigation done by the Nassau County Department of Health and the County Department of Public Works identified a significant plume of tetrachloroethene (PCE at levels up to 51,210 ppb) and other semivolatile organics in the groundwater. The DEC completed a PSA in 1994 that identified the facility at 150 Fulton Avenue as the primary source for the tetrachloroethene. Historical information indicates that a former occupant of this facility used PCE in cutting mill operations. In 1995, environmental sampling confirmed the presence of high levels of tetrachloroethene in the sediments found in a dry well at the site. The PCE was the source of groundwater contamination attributable to this site. The contamination has migrated more than 5600 feet downgradient. A soil vapor extraction/air sparging system IRM operated at the site from 1998 until December 2001. The PRP removed the SVE and air sparging system and installed a sub-slab depressurization system to address the concern of residual soil vapors impacting the indoor air (03/04). The responsible party funded the RI/FS at the site. The field work for this remedial investigation began in mid-December 1998. This site was nominated to the NPL in March 1997 and became a Federal Superfund Site effective April 1, 1998. The 150 Fulton Ave. facility and its associated plume of contaminated groundwater is referred to as Operable Unit 1 (OU 1). The NYSDEC oversaw the completion of the RI/FS under the NYSDEC Order on Consent and then transferred project management to USEPA for remedial design and remedial action (RD/RA). The EPA has issued the OU 1 ROD. The OU1 ROD calls for groundwater extraction and treatment, in-situ chemical oxidation for the source area and wellhead treatment for the village of Garden City. The USEPA is also conducting an OU2 RI/FS to identify any additional sources of groundwater contamination from the unidentified side-gradient source(s) of trichloroethene impacting the Franklin Square Water District. The potential responsible party entered into a unilateral

1000855816

administrative order (UAO) filed by the US Dept of Justice. The EPA has issued a work assignment for the OU2 field work. The consultant prepared a work plan (11/09) that was approved. This work includes additional source area investigation for the TCE plume which does not originate at 150 Fulton Ave. and a soil vapor investigation. Field work for the OU2 study is ongoing. EPA is using some of the newer environmental forensics techniques in the ongoing attempt to locate additional solvent sources of contamination to the groundwater. The USEPA prepared a ROD amendment for OU1 and released it with a public meeting in April 14th 2015. The USEPA executed the ROD amendment in September 2015.

Env Problem: The groundwater has been heavily impacted with perchlorethene (PCE) from the 150 Fulton Ave. site (Operable Unit 1). There are also impacts from other volatile organic compounds (VOCs, mainly TCE, from unidentified side-gradient sources(Operable Unit 2). The contaminant plume has impacted the sole source aquifer downgradient of the site. The PRP operated an IRM consisting of a soil vapor extraction system and an air sparging unit. This IRM addressed soil contamination and shallow groundwater contamination beneath the site. The PRP also installed an IRM consisting of a wind-driven Sub-Slab depressurization system to address residual volatile vapors beneath the 150 Fulton Avenue building.

Health Problem: Since the site is covered by asphalt or pavement, people will not come into contact with site-related contaminated soils or contaminated groundwater unless they dig below the ground surface. People are not drinking the contaminated groundwater because municipal water suppliers have taken appropriate actions (such as treating the groundwater to remove contaminants prior to distribution or removing wells from service) to ensure that the public water supply continues to meet drinking water standards. Volatile organic compounds in contaminated soils or contaminated groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings is referred to as soil vapor intrusion. A passive sub-slab depressurization system (system that removes air from beneath a building) has been installed in the on-site structure to prevent indoor air quality from being affected by soil vapor intrusion. The potential exists for soil vapor intrusion to impact indoor air quality in off-site structures.

Summary Details:

Conditions at Proposal October 22, 1999): The Jackson Steel site is an inactive roll form metal shapes manufacturing facility located in Mineola/North Hempstead, Nassau County, New York. It is not known when Jackson Steel began operating; however, they submitted a form/application to the Nassau County Health Department on October 19, 1977. Jackson Steel reportedly ceased operations at the site in April 1991. Degreasers, including tetrachloroethylene also referred to as perchloroethylene PCE)), trichloroethylene TCE), and 1,1,1-trichloroethane TCA), were used at the site until March 1985. Degreasing sludge was stored in drums on a paved area located southwest of the building. The site property is bordered to the northwest by First Street, to the northeast by an apartment building, to the southeast by a billiard parlor and an electronics store, and to the southwest by a paved parking area, law offices, and a bar/restaurant. The site is located on the edge of a mixed-use area, with commercial and industrial properties located to the south and west and residential properties located to the north and east. The Nassau County Department of Health conducted numerous inspections of the Jackson Steel site between 1979 and 1996; improper spill control at the waste storage area was noted once, in 1981, during the period when degreasers were used on site. A Limited Phase II Assessment of the Jackson Steel site was performed in December 1991. During this inspection, a third dry well was observed in the building, in the loading dock. Soil samples collected beneath the dry wells indicated the presence of PCE, TCE, 1,1,1-TCA, 1,2-dichloroethylene DCE), and 1,1-dichloroethane DCA) at depths up to 17 feet below ground surface. 1,2-DCE is a degradation product of TCE and PCE and 1,1-DCA is a breakdown product of PCE, TCE, and 1,1,1-TCA. A reconnaissance of the site was conducted in November 1992 as part of an Environmental Site Investigation ESI). Numerous stained areas and puddles were observed in the building. Drums containing petroleum products were stored in the building and on the paved area. The dry wells were partially filled with liquid and a 275-gallon degreasing tank was observed in close proximity to the dry well located in the loading dock. Between December 1992 and February 1993, numerous samples were collected in, around, and below the dry wells and nine ground water samples at the site. The analytical results reportedly indicated the presence of PCE, TCE, 1,1,1-TCA, and 1,2-DCE at depths up to 40 feet below the ground level and PCE, TCE, 1,1,1-TCA, 1,2-DCE, and 1,1-DCA in ground water collected from monitoring wells located downgradient of the dry wells. The ESI report suggests that a release of PCE, TCE, and 1,1,1-TCA to ground water has occurred from the site. Drinking water within 4 miles of the site is derived from public/municipal supply wells screened in the Upper Glacial, Magothy, and Lloyd Aquifers. The nearest well drawing from the aquifer of concern is located approximately 3,100 feet south and side-gradient to the site. Potable wells within 4 miles of the site, and drawing from the aquifer of concern, serve over 300,000 people. Status February 2000): EPA is considering various alternatives for this site. The description of the site is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

CERCLIS Site Alias Name(s):

Alias ID: 101
Alias Name: JACKSON STEEL
Alias Address: 435 FIRST STREET
HEMPSTEAD, NY 11501
Alias ID: 102
Alias Name: JACKSON STEEL
Alias Address: 435 FIRST STREET
MINEOLA/NORTH HEMPSTEAD, NY 11501
Alias Comments: Not reported

Site Description: The Jackson Steel Site includes a parcel of property located at 435 First Street in Mineola, Town of North Hempstead, Nassau County, New York in a residential/commercial area. The 1.5-acre property contains a one-story 43,000-square-foot building formerly used as a metal-forming facility and an approximately 10,000-square foot paved parking area. The building consists of two sections-the original building, constructed in 1959, is located closer to First Street, and the newer section, which was added in 1963, is at the rear. The former office space is located along the north wall, and a loading dock is located in the southwest corner of the front section of the building. The building is currently inactive and predominantly empty, except for miscellaneous small equipment and supplies abandoned by interim tenants of the building. An old vertical aboveground storage tank-possibly used to store degreasing substances-is situated in the front section of the building next to the former offices. A trench is located in the floor along the inside western wall of the building extension, above which a degreasing station is suspected to have been located. Two sumps are located in the front section of the building behind the former office space. One sump is located under the heater and the other one is located along the eastern wall of the main building. A third sump is located outside the building, near the main entrance. A fence extends along the southern border of the parking area and separates the Jackson Steel Site's parking lot from the adjacent commercial property's parking lot. A narrow strip of unpaved soil is also located along the east wall of the building, between the building and the wooden fence separating the Jackson Steel property from the adjacent apartment complex. Subsurface features include two dry wells designed to collect stormwater runoff located under the parking area to the west of the building and a third dry well located under the loading dock area. The Site is bordered to the north by residential, single-family dwellings, to the east by multiple-family dwellings in a two-story apartment complex, to the south by a former billiards parlor and a building that housed a daycare center until April 2002, and to the west by an office building and restaurant. Herricks Road to the west has predominantly commercial properties on both sides of the heavily traveled road. Village of Mineola supply well #4 and Garden City Village supply well #12 are located within a half-mile radius of the Site (east-southeast or side-gradient of the property). There are no private wells in the area. Area residents utilize municipal water. The property, which has been used for industrial/commercial purposes since it was constructed, has been zoned for a number of different uses through the past several decades. The property is presently zoned B-1 for business use as retail or office space. The Village of Mineola is currently reviewing its master plan; there is likelihood that the Jackson Steel property may be rezoned "residential" in the near future. The property was used from the mid-1970s until 1991 as a "roll form metal shapes" manufacturing facility. Degreasers, including tetrachloroethene (PCE), trichloroethene (TCE), and 1,1,1-trichloroethane (TCA), were used at the facility until 1985. Sludges from degreasing equipment were stored in drums and in an on-property 275-gallon tank. The analytical results from samples collected by the Nassau County Department of Health (NCHD) in the early 1990s from within, around, and below

three on-property dry wells indicated the presence of PCE, TCE, 1,1,1-TCA, 1,2-dichloroethylene (DCE), and 1,1-dichloroethane (DCA) at depths down to 40 feet below the ground surface. PCE, TCE, 1,1,1-TCA, 1,2-DCE, and 1,1-DCA were also detected in groundwater samples collected from monitoring wells located downgradient of the dry wells. Dumping of wastes into the dry wells and spills and leaks from drums storing various chemicals during the facility's operations are the likely sources of the contamination found at the Site. In October 1999, the Site was proposed for placement on EPA's Superfund National Priorities List (NPL). On February 4, 2000, the Site was listed on the NPL. EPA initiated a search to identify Potentially Responsible Parties (PRPs) in January 2000. Viable PRPs have not been found. Following commencement of fieldwork in October 2001, because of concerns about the proximity of the Site to a daycare center, NCHD performed air sampling inside the daycare center's building. The air samples detected PCE at levels below the Health Department's guideline for indoor PCE exposure. The levels were also within EPA's acceptable cancer and noncancer risk ranges. Given the sensitivity of the population exposed (preschool children), the Health Department collected additional samples in mid-December 2001. At that time, indoor testing was also conducted inside the Jackson Steel building and a restaurant located adjacent to the Site. The results, which were received in mid-January 2002, indicated that PCE levels in the indoor air of several rooms in the daycare center were above the Health Department's guideline for indoor PCE exposure. In addition, the maximum PCE level exceeded EPA's acceptable noncancer risk level. Low levels of PCE were detected in air samples from the Jackson Steel building and the restaurant. After receiving the daycare center's sampling results, EPA's emergency response team installed a vacuum extraction system under the concrete slab of the daycare center to prevent any contaminants from entering the building in case the soil and groundwater under the building were the source. In addition, in order to provide fresh air circulation in the building, the daycare center's contractor installed a ventilation system. Samples taken to assess the effectiveness of the measures implemented showed that the PCE levels in the air were significantly below the New York State Health Department guideline and below EPA's acceptable noncancer risk levels. Because elevated PCE levels were detected in a former billiards club which shares common walls with the Jackson Steel Site building and the former daycare center, EPA installed a vacuum extraction system under the concrete slab of both buildings. In addition, ventilation systems were installed in those buildings. A Remedial Investigation (RI) was conducted from 2001 to 2002 to determine the nature and extent of the contamination at and emanating from the Site. The Village of Mineola is currently reviewing its master plan; there is a likelihood that the Jackson Steel property may be rezoned "residential" in the near future. The groundwater underlying the Site and downgradient is contaminated. Potable water for the Site and downgradient areas is obtained from public-supply sources. Although it is not likely that the groundwater underlying the property will be used for potable purposes in the foreseeable future, regional groundwater is a sole source of potable water and is designated as a drinking water source by New York State Department of Environmental Conservation (NYSDEC). A Record of Decision (ROD) addressing operable unit (OU) 1 was completed in September 2004. The cleanup of the building, the excavation and removal of the contaminated soil and the contaminated materials from the sumps and the trench inside the building and from the dry wells were completed in early 2006 (170 cubic yards of material were excavated and disposed of). The in-situ soil vapor extraction (ISVE) system, which began operation as a pilot-scale treatability study in July 2005, has, to date, removed approximately 55 pounds of volatile organic compounds (VOCs) from the soil. It is anticipated that the ISVE system will continue to operate for an additional two years before the cleanup goals have been

met. Periodic injections of chemicals via a network of 20 injection wells as part of the in-situ chemical oxidation (ISCO) treatment of the Upper Glacial Aquifer at the site are currently underway. Postinjection analytical results from the Upper Glacial Aquifer (April 2007) indicate that the treatment has been effective in reducing contaminant levels. A supplemental groundwater investigation was conducted from March 2005 to September 2006 in an attempt to determine the source of the Magothy Aquifer contamination underneath the site and to establish whether there is a relationship between the contamination at the site and the VOC contamination detected in a nearby municipal well (before treatment). As part of this investigation, six monitoring wells were installed. Three wells were installed in the Magothy Confining Bed at the location of the on-site dry wells. Three additional wells were installed off-site into the Magothy Aquifer. One well is located approximately 300 feet northeast of the site. This well is considered upgradient under regional flow conditions and side gradient when the municipal well is pumping. The second monitoring well is located southwest of the site. This well is considered downgradient under regional flow conditions and side gradient when the municipal well is pumping. The third well is located between the site and Mineola's municipal well, approximately 1,200 feet southeast of the site. This well is considered side gradient under regional flow conditions and downgradient when the municipal well is pumping. The investigation indicates that because of the industrial/commercial nature of the area, multiple unknown sources appear to contribute to the contamination in the lower reaches of the Magothy Aquifer underlying the site. The investigation showed that the levels of contamination in the Magothy Aquifer increase or decrease in response to whether or not the municipal well is operating. In addition, VOCs were not detected in the three monitoring wells that were installed at various depths in the Magothy Confining Bed underlying the location of the two former dry wells where the disposal of chemicals occurred. In an on-site monitoring well located downgradient or side gradient of the dry wells (depending on whether or not the municipal well is operating), the maximum TCE concentration was 1.6 ug/l and the maximum PCE concentration was 1.2 ug/l (the state and federal groundwater standards for TCE and PCE is 5.0 ug/l). In comparison, the levels of contamination in the underlying Magothy Aquifer, at a depth of 454 feet, ranged from 95-330 ug/l TCE and 78-150 ug/l PCE. An Explanation of Significant Differences (ESD) addressing OU 1 was completed in August 2007.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Site Description: Location:The Jackson Steel Site is located in an urban area. It is on the southern side of First Street and the Eastern side of Herricks Road. It is located about 1,000 ft. east of the Fulton Avenue class 2 site, a recent addition to the Federal National Priorities List, which is situated in the Garden City Park Industrial Area. Site Features:The main site feature is a 30,000 square foot one story former manufacturing building, constructed in 1959, and a 13,000 square foot back section that was added in 1963. Current Zoning and Land Use:Jackson Steel ceased operations in 1991. The building currently houses a Soil Vapor Extraction system that is operated by USEPA. A restaurant and offices are located immediately west of the site. An industrial park is located west of Herricks Road. Residences are located immediately east of the site, and mixed business / residential on the north side of First Street. The Long Island Railroad is located south of the day care.Past Use of the Site:The property was used from the mid-1970s until 1991 as a "roll form metal shapes" manufacturing facility. Degreasers, including tetrachloroethylene (PCE), trichloroethylene (TCE), and 1,1,1-trichloroethane (TCA), were used at the facility until 1985. Sludges from degreasing equipment were stored in drums and in an on-Site 275-gallon tank. Dumping of wastes into the dry wells, spills, and leaks during the facilities operations and from drums

storing various chemicals are the likely sources of the contamination found at the Site. In December 1991, a limited environmental assessment of the former Jackson Steel Products property was conducted by Geraghty & Miller, Inc., environmental consultants. A Nassau County Department of Health (NC DOH) survey inspection was conducted at the site in May 1994. In October 1999, the Site was proposed for placement on EPA's Superfund National Priorities List (NPL). On February 4, 2000, the Site was listed on the NPL. Site Geology and Hydrogeology: Site geology consists of three units: the Upper Glacial Aquifer, the Magothy Confining Bed, and the Magothy Aquifer. The Upper Glacial unit consists predominantly of varying consistencies of intermixed to interbedded, brown-orange-yellow sands and gravels that extend to a depth of approximately 105 feet below ground surface (bgs). Some silts were observed mainly near the ground surface, but also in smaller quantities deeper in the formation, and in minor lenses throughout. Little to no clay was observed.

Groundwater beneath the Jackson Steel site occurs within the Upper Glacial Aquifer at approximately 50 feet bgs. In this aquifer, a very slight, upward gradient exists but this gradient is negligible when compared to the dominant southwest horizontal groundwater flow. At approximately 105 feet bgs, the top of the Magothy Formation was encountered. The top of the formation consists of characteristic fine to medium sands interbedded with clay and sandy-silty clay, with gray coloration, and the presence of organic lignite (wood) fragments. The classic medium-to-coarse grained, gray sand of the Magothy Formation was observed below the silty-clay unit, beginning at 401 feet bgs at the site. The Magothy Confining Bed has a relatively low permeability and transmissivity resulting in its function as a semi-confining layer separating the transmissive Upper Glacial and Magothy aquifers. A downward groundwater flow gradient was noted within the bed. In the Magothy Aquifer, the trend for downward flow observed in the Magothy Confining Bed continued, but at a lower gradient. Similar to the Upper Glacial Aquifer, the horizontal southwest groundwater flow in this unit is again anticipated to dominate over the vertical flow.

Env Problem: This property is near an industrial area in which high levels of contamination have been identified and a significant source was pinpointed. The chemicals found at Jackson Steel are similar, and appear to be the source of a separate, probably parallel plume, which may also overlap further downgradient, thereby amplifying the threat to several public supply wells.

Health Problem: Drinking contaminated groundwater is not expected because public water serves the area. The on-site soil vapor extraction system is designed to protect occupants of the on-site building and two adjacent off-site buildings from exposure via soil vapor intrusion.

DEC Memo: "11/15/11 - HC on site. Met with Patricia Monti of Long Island Compost. Tank is double walled steel with fiberglass coating. The manway gasket was suspected to be the cause of the test failure. F&N completed the repair on 11/14/11 and a re-test is scheduled for 11/16/11. 11/24/11 - T/C to F&N. As per Ferguson, originally thought manway gasket was the problem but it turned out the tank has a tilt to it and there is an air pocket that they cannot bleed. The tank passed an Estabrook EZ3 test and NCFM said they would accept that test since their law changes beginning January 2012. Test is acceptable for NYS. No further action required."

Remarks: "tank test failure, unkwn resorces or amount spilled"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S106780907

Westbury, Nassau County. Site Features: The site consists of a 50' by 189' lot. On the site is a building currently used for dry cleaning and a parking area surrounding the building. The surrounding areas are used for commercial and residential purposes. An elevated LIRR line is adjacent to the south border of the site. Current Zoning and Land Use: This site is currently zoned for commercial use and an active dry cleaner operates on site. Past Use of the Site: Dry Cleaning has been conducted at the site since the 1950s. The site was placed on the NYS Registry of Inactive Hazardous Waste Disposal Sites in December of 1998 after the Nassau County Department of Health performed a facility inspection in July 1995. Operable Units: The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Site Geology and Hydrogeology: The depth to water is approximately 35 feet and flows to the south-south west. The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.

Env Problem: Nature and Extent of Contamination: For OU 1: On-Site Areas Based on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene. These contaminants continue to be present in the on-site soils at a concentration up to 190,000 micrograms per kilogram (unrestricted soil cleanup objectives are 1300 micrograms per kilogram) and in the on-site groundwater. Soil Vapor and Indoor Air - tetrachloroethene was detected in soil vapor at elevated concentrations and was also detected in indoor air. For OU 2: Off-Site Groundwater Based on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene. These contaminants were initially detected in the off-site groundwater plume at concentrations up to 5000 micrograms per liter. Between October 2011 and March 2013 oxidant was injected into the plume as part of a pilot study. The injections reduced tetrachloroethene concentrations to less than 800 micrograms per liter. Regardless, these contaminants exceed groundwater standards (5 micrograms per liter) beneath the site and for at least 1800 feet downgradient from the site. Significant Threat: The site is listed on the registry of inactive hazardous waste disposal sites as a class 2 site, representing a significant threat to human health and the environment, it is located within a USEPA designated sole source aquifer, and is in the vicinity of municipal water supply wells.

Health Problem: Soil vapor from the site caused indoor air contamination at several neighboring homes and businesses. The soil vapor extraction system operating at the site has effectively reduced concentrations of tetrachloroethene in these buildings. NYSDOH and NYSDEC will evaluate the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures near the off-site groundwater plume. Direct exposures to the contaminated groundwater are not expected, because the site and surrounding area are served by a public water supply. There are three active public water supply wells nearby. Two are treated to remove volatile organic compound contamination (not from this site), and the third does not require treatment to comply with standards.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Updated By: SRHEIGEL
Site Description: Location: The Bartlett Tree Company site is located at 345 Union Avenue in the Village of Westbury, Town of North Hempstead. Site Features: The site is approximately 0.4 acres in size. A new facility building is expected to replace the old one. Two structures, an equipment garage/pesticide locker and a storage shed have been removed from the site. Current Zoning/Use: The site is currently zoned for commercial use and is located in a commercial/industrial setting. The Bartlett Tree Company provides horticultural services to the surrounding communities. The Long Island Railroad's Westbury train station is located immediately south of the site. There is a residential neighborhood several blocks north of the site. Past Use of the Site: The Bartlett Tree Company has occupied the site since the mid 1950s. Pesticides are stored on-site for use in the services they provide. Site Geology/Hydrogeology: The water table is encountered approximately 29'-32' below ground surface, depending on seasonal variation. Overburden consists mainly of various size sands and gravels. The site specific groundwater flow direction is to the south/southwest.

Env Problem: Nature and Extent of Contamination: A Remedial Investigation was conducted to delineate the nature and extent of contamination

on-site. Based upon the investigation, the primary contaminants of concern were the pesticides aldrin, alpha BHC, chlordane, DDD, DDE, DDT, dieldrin and lindane. Prior to Remediation: Shallow Surface Soil - Surface soil was characterized site-wide by collecting soil samples from zero to two feet below surface in a number of locations including from the following areas of concern: former pesticide storage locker, former open shed, test pit-1, test pit-2, stairway floor drain and mechanic's pit. Levels of pesticides in all soil samples collected from this depth interval were below the commercial use SCOs. All samples were below the protection of groundwater Soil Cleanup Objectives (SCOs) and the majority were below the residential SCOs. Subsurface Soil - Pesticides were detected in a subsurface soil beneath Drywell-1 at levels which exceeded the commercial use and protection of groundwater SCOs. The contaminants were detected in the drywell's bottom samples (approximately 7' below grade) and to a depth of approximately 32' below grade. Groundwater - Pesticides were detected in groundwater at levels which exceeded SCGs. Groundwater is encountered approximately 31 feet below grade. Volatile organic compounds (trichloroethene and cis-1,2-dichloroethene) were detected at levels exceeding SCGs in groundwater upgradient of the site. Levels of VOCs in on-site groundwater are generally non-detect with one detection marginally exceeding the SCG, and is not considered site related. Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were pesticides in soil and groundwater. Remediation in the form of source removal (soil excavation) has reduced contaminant levels in subsurface soil to levels meeting either the commercial use or protection of groundwater SCOs. Approximately 438 tons of contaminated soil was excavated and disposed of off-site at permitted disposal facilities. While pesticides in groundwater were found to exceed SCGs, detections were extremely low (parts per trillion) and are expected to diminish to levels meeting SCGs as a result of source removal. A Record of Decision was issued on March 31, 2014 which requires continued monitoring of on-site groundwater and for soil vapor intrusion. An Environmental Easement has been placed on the property and future monitoring will be completed pursuant to a Site Management Plan.

Health Problem: Since the site is fenced and covered by buildings, asphalt, or concrete, people will not come into contact with residual site-related soil and groundwater contamination unless they dig below the surface. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although sampling has indicated that impacts to indoor air are not a current concern, the potential exists to inhale contaminants in indoor air due to soil vapor intrusion in on-site building development and occupancy. Insufficient environmental information exists to evaluate the potential for soil vapor intrusion to occur in off-site areas.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was PARISH 11/04/93: Long Island Rail Road found oil on track right-of-way. Request meeting. 11/12/93: LIRR reported incident to DEC. 11/19/93 (A): DEC (Parish) met on site with LIRR. Fence between LIRR's property and AGIP's had been taken down. Appeared oil is dumped onto LIRR's property. Area approx 100ft long by unk width behind AGIP heavily stained. Has sketch and photos. 11/19/93 (B): Noted drum bungs in debris. Also noted a number of drums, and open trailers containing drums, on AGIP's property. 11/19/93 (C): LIRR had taken two soil samples. 11/19/93 (D): DEC took two soil samples. Pedneault to analyze. 12/03/93: Pedneault data- Found approx 94500ppb of Total Petroleum Hydrocarbons and trace of unidentifiable petroleum product . Did not find BTEX. 12/16/93 (A): LIRR FAXes their data- In sample Mile Post 22-1 , found approx 9300ppb Acetone, approx 3000ppb Vinyl Acetate, approx 1800ppb Toluene, approx 1700ppb Xylenes, approx 7400ppb 2Ethylhexylphthalate, 1.2ppm Barium, and approx 71000ppb Total Petroleum Hydrocarbons. 12/16/93 (B): In sample Mile Post 22-2 , found approx 96000ppb Acetone and approx 130,000ppb Total Petroleum Hydrocarbons. 12/16/93 (C): NOTE- Some of the detection limits for other parameters were quite high. 12/17/93 (A): DEC (Parish & Acampora) met with LIRR and Ron Pappas (AGIP's Operations Manager) on site- He claimed they were burglarized approx 2 weeks prior. Said oil and antifreeze was stolen and spilled at the area in question. Said this was an ongoing problem since Ultralene owned the shop (PRIOR OCCUPANT?). 12/17/93 (B): Did not have any receipts for disposal of waste products. Drum residue taken from the drums prior to their removal . Found heavy contamination in area where they are cleaned. 12/17/93 (C): Drums supposedly taken by Goodman Brothers Steel Drum Co, 18 Division Place, Brooklyn NY. 12/17/93 (D): Requested cleanup of impacted areas. 12/20/93 (A): Savage Strauss Group (1 Harvard Way, Somerville NJ, 08876, 908-722-9000, consultant for AGIP)- AGIP contracted for development of a Spill Prevention Control and Countermeasure Plan. They have inspected site. Will be sending draft plan to AGIP shortly. 12/20/93 (B): Upon completion of SPCC Plan, will investigate area of possible spillage. Will determine whether petroleum hydrocarbons are present and their type. IF IT IS DETERMINED TO BE LIGHT HYDROCARBONS THAT ARE NOT COMPOUNDS FOUND IN MOTOR OIL, HYDRAULIC OIL, OR ANTIFREEZE, WE WILL THEN ADVISE YOUR OFFICE OF SUCH AND YOU CAN THEN APPROACH THE RAILROAD TO REMEDIATE

THIS AREA OF CONTAMINATION. THIS WOULD BE EXPECTED TO BE DONE TO PREVENT IT FROM MIGRATING ONTO THE AMERICAN AGIP'S PROPERTY, IF IT HASN'T ALREADY . Their geologist has determined groundwater flow to be from LIRR property TOWARD theirs. 12/20/93 (C): If the hydrocarbons ARE typical of the above products, AGIP will implement a more detailed sampling plan to determine their extent. Would then develop remediation plan. 01/18/94: Letter to AGIP, cc LIRR and NCFM- Request copy of waste disposal receipts; determination of vertical and horizontal extent of contamination; removal of all contaminated soil; and disposal receipts for same. Gives scenario for failure to comply. 02/16/94: Strauss FAX- Due to bad weather, sampling is postponed until 18Feb. 08/31/94: Strauss called- Sampling for Total Petroleum Hydrocarbons showed count in 1000's of ppm . In addition, they confirm motor oil contamination . Are resampling today. DEC requested volatiles and semi-volatiles. 06/28/95: Yellowstone Environmental Services (131 Fulton Ave, Hempstead NY, 11550, 516-485-0000) letter- Have been contracted to perform surface and subsurface remediation. In process of acquiring necessary permits from LIRR. 08/22/95: Parish on site- Yellowstone cleaning up. Removed approx 40-50cy soil from along embankment. Four composite samples taken. Disposal receipts and lab data to be sent ASAP. Has sketch and photos. 09/11/95: Receive lab data- FIVE samples. Total Petroleum Hydrocarbons range from 186ppm to 6500ppm. 09/26/95: Letter to AGIP- Have reviewed soil data. Some contamination still present. Need additional excavation in area of samples 1 and 4. Resample after excavation. 10/11/95: Parish on site- Yellowstone excavating areas in question. Removed approx 5cy soil. Took sample from each area. Plastic put over area and then filled with soil (will make it easier to excavate if more work needed). 10/18/95: Yellowstone letter- Enclose lab data. Sample 1A had 210ppm Total Petroleum Hydrocarbons, and sample 2 had 113ppm. 10/31/95: 95 Inc (68-H East Jefryn Blvd, Deer Park NY, 11729) Project Closure Report- Includes copies of various documents, such as soil disposal receipts and copies of the Aug and Oct lab data. 11/28/95: Spills memo to BECI- Enclose copy of disposal receipts. ALLIED ENVIRONMENTAL GROUP CLASSIFIED THE WASTE AS HEATING OIL. IT WAS REALLY LUBRICATING OIL. YOU MAY WISH TO CHECK THIS COMPANY'S CLASSIFICATION OF WASTES FOR DISPOSAL. THEY APPEAR TO BE A BROKER OF CONTAMINATED SOILS . 11/29/95: Letter to AGIP- Have reviewed the file and have received the disposal papers. No further requirements for this spill at this time. 05/12/97: DEC to review for closure (HAD BEEN KEPT OPEN DUE TO THE ONGOING NATURE OF THE PROBLEM HERE). ***OTHER SPILLS HERE- 8800743- DUMPING OF WASTE OIL INTO STORM DRAIN (NO PROOF AGIP WAS SPILLER) 8807176- DUMPING OF WASTE OIL INTO STORM DRAIN (NO PROOF AGIP WAS SPILLER) 8911394- 1K DIESEL TANK TEST FAILURE; TANK ALONE PASSED AFTER LINES WERE DISCONNECTED; TANK TO BE ABANDONED 9509570- DUMPING AT REAR OF PROPERTY ONTO LIRR PROPERTY? ***FOUND AT LEAST ONE OTHER SPILL BY AGIP- 9205015- UNSECURED CONTAINERS IN TRUCK FELL OVER AND LEAKED ONTO ROAD. DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
PARISH 12/23/91: A: DEC RECEIVED CALL FROM NCFM (CASE # UNK) WHO
REPORTED A 150-GAL. ANTIFREEZE SPILL ON GROUND, ROAD AND IN DRAINAGE.
12/23/91: B: SPILLER IS ULTRALINE PETRO PRODUCTS (CONTACT: CHET
CRONIN 516-334-8777). ULTRALINE IS CLEANING UP AND PUMPING OUT
DRAINS. 12/23/91: C: DEC (PARISH) AND ECO DIDION ON SITE. A TANK
TRUCK TRAILER COLLAPSED CAUSING ITS FRONT COMPARTMENT TO BREACH.
COMPARTMENT CONTAINED 900 GAL. NEW ANTIFREEZE AS PER CRONIN. (HAVE
PHOTOS & SKETCH.). 12/23/91: D: 2 DUMPSTERS FILLED WITH APPROX. 5
C.Y. ANTIFREEZE-CONTAM. SPEEDI-DRY. PARISH OBSERVED A LARGE STAIN ON
ADJACENT SCHOOLYARD PROPERTY AND TOOK SOIL SAMPLE. 12/23/91: E:
GENERAL WASTE OIL TRUCK VACUUMED 2032 GAL. LIQUID OUT OF 3 DRAINS.
12/30/91: A: PARISH BROUGHT SOIL SAMPLE TO ETL FOR ANALYSIS.
12/30/91: B: PARISH SENT LETTER TO CRONIN REQUESTING RECEIPTS FROM
SPEEDI-DRY DISPOSAL, AND THAT SLUDGE BE REMOVED FROM STORM DRAINS AND
STAINED SOIL REMOVED FROM SCHOOLYARD. 12/31/91: DEC RECEIVED CALL
FROM RONNIE PAPPAS (ULTRALINE OPERATIONS MGR) WHO SAID THAT SLUDGE
WAS CLEANED OUT OF DRAINS AND, AS PER DEC ALBANY, SPEEDI-DRY COULD BE
DISPOSED AT REGULAR LANDFILL IF <500 LBS. 01/02/92: PARISH CHECKED
DRAINS - UNSURE IF SLUDGE WAS REMOVED BECAUSE WATER WAS ALMOST TO TOP
OF BOTH DRAINS. WATER WAS CLEAN. (3 DRAINS AFFECTED AS PER 12/23
SKETCH. WAS 3RD DRAIN CHECKED?). 01/10/92: CRONIN TOLD DEC THAT THE
TOWN CLEANED THE DRAINS. 01/24/92: A: PARISH ON SITE. 12 X 16-GAL.
DRUMS CONTAINING CONTAMINATED SOIL THAT HAD BEEN DUG UP FROM SCHOOL
PROPERTY (12/23 SPILL) WAS STORED ON SKIDS IN ULTRALINE'S YARD.
01/24/92: B: PARISH OBSERVED A NEW STAIN ON THE SCHOOLYARD PROPERTY,
10'X50' AREA - GRASS IS DEAD. 01/24/92: C: PARISH RECEIVED RECEIPT
FROM DISPOSAL OF SPEEDI-DRY. 2 YDS. REMOVED FROM SITE BY GENERAL
ENVIRON. SERVICES AND DISPOSED AT CPC 1/13/92. 01/24/92: D: DEC
RECEIVED ANALYSIS REPORT FROM 12/23 SAMPLE: HYDRAULIC OIL PRESENT;
TOTAL PETRO HYDROCARBON = 58230 PPM. 02/24/92: A: DEC RECEIVED LETTER
FROM ULTRALINE ALONG W/COPY OF GEN. ENVIRON. SVCS. WORK ORDER
LISTING PICKUP & DISPOSAL OF 2 DRUMS OF ANTIFREEZE -CONTAM. SOIL
(SHOULD BE HYDRAULIC OIL -CONTAM. SOIL). 02/24/92: B: PAPPAS
REQUESTED A LETTER OF RELEASE FOR HAVING COMPLETED THE CLEANUP OF THE
ANTIFREEZE SPILL OF 12/23/91. 03/11/92: A: PARISH CHECKED SITE. 2
DRAINS IN STREET NOT DRAINING AND HAVE SHEEN ON THEM. 03/11/92: B: 2
LARGE AREAS OF DEAD GRASS STILL EVIDENT ON SCHOOLYARD PROPERTY.
TOPSOIL STOCKPILED ON SITE BUT NOT YET SPREAD OUT. 08/14/92: DEC

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

1016095944

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Contact Name: OFFICER BLUM
Contact Phone: (631) 433-9897
DEC Memo: "11/26/10 1120 Hrs (A): The Nassau County PD ESU unit reported the spill. 11/26/10 1120 Hrs (B): DEC requested they have the Nassau County Fire Marshal call so that we could confirm the details and whether a DEC response was required. DR 11/26/10 1135 Hrs (A): Called Blum with the Spill number. 11/26/10 1135 Hrs (B): AGAIN ASKED WHETHER A DEC WAS REQUIRED, AND HE SAID NONE WAS REQUIRED. DEC DIRECTED HIM TO CALL BACK IF THE SITUATION CHANGED. DR 11/26/10 1145 Hrs (A): MIKE STRONG (NASSAU COUNTY FIRE MARSHAL) called- he confirmed they are overseeing the cleanup. 11/26/10 1145 Hrs (B): The oil is pooled along approximately 55ft of curb, and has been bermed. 'PERHAPS A GAL IS IN DRAINAGE.' 11/26/10 1145 Hrs (C): The owner of Citywide is on site, and he had already hired Able before the NCFM arrived. They are currently awaiting Able's arrival, and the NCFM will have Able clean out the drain as well as clean up the road. 11/26/10 1145 Hrs (D): DEC DIRECTED HIM TO CALL BACK IF THE SITUATION CHANGED, INFORMED HIM OUR RESPONDER WAS CURRENTLY AT OUR OFFICE IN STONY BROOK, AND THAT WE CURRENTLY HAD NO RESPONDERS IN THE FIELD. DR" Not reported
Remarks: "THERE WAS A MOTOR-VEHICLE ACCIDENT AND DIESEL FUEL SPILLED PRIMARILY TO THE ROADWAY. 'THERE MIGHT BE A GALLON IN DRAINAGE.' THE NASSAU COUNTY FIRE MARSHAL IS ON SITE, AND ABLE ENVIRONMENTAL IS ENROUTE TO CLEAN UP. (DR)"

HAAS WELL // : (UNK DATE): (UNICO?) INSTALLS (OR FINDS?) FOUR WELLS
AT METRO. // : (UNK DATE): SYSTEM TURNED ON. // : NOV90?: NEW
BLOWER INSTALLED?. // : ***NOTE: SEE ALSO 8808851 (ACTIVE)- S/S AT
501 UNION. FLOATING PRODUCT FOUND DURING INVESTIGATION OF
8705933/8707192. NOT CLEAR HOW, IF AT ALL, 8808851 RELATES
TO/INFLUENCES THESE. // : ***NOTE: THERE WAS A 92 INCIDENT,
EVIDENTLY INVOLVING A 4K REG NO LEAD TANK AT THE METRO (SPILL #S
9203083 AND 9203530; INFORMATION IS INCLUDED HERE). // : ***NOTE:
VERY LIKELY SOME COSTS SPECIFICALLY FOR ONE PROJECT WERE BILLED TO
THE OTHER. FURTHERMORE, MOST COSTS ARE PROBABLY ATTRIBUTABLE TO BOTH
GETTY AND METRO. // : ***NOTE: THEREFORE, WE HAVE ATTEMPTED TO
PROVIDE BELOW A COMPREHENSIVE SITE HISTORY, INCORPORATING NOTES FROM
BOTH FILES WHEN IT SEEMED SUCH NOTES APPLIED TO BOTH. // : ***NOTE:
SINCE THESE SITES ARE SIDE BY SIDE, PLUMES MAY OVERLAP, AND WE NOW
HAVE ONE REMEDIATION SYSTEM HANDLING BOTH, THE WORK AND ACCOMPANYING
NOTES ARE MIXED BETWEEN THE TWO FILES. // : ***NOTE: THIS SITE IS
PHYSICALLY NEXT DOOR TO 8707192 SP97426 (METRO) AND PLUMES MAY
OVERLAP. THEREFORE, RECOMMEND COST RECOVERY BE HANDLED BY ONE
ATTORNEY AND AS ONE PROJECT. 10/14/87: TYREE REPORTS 8K TANK LOSING
PRODUCT. TANK PUMPED OUT. OPERATOR IS KYUNG PARK PARK'S WESTBURY
SERVICE 481 UNION AVE WESTBURY 11590 516-334-9659. 10/15/87: A: DEC
(O'BRIEN) AND TYREE ON SITE- VACCED OUT THE 4 TANK-BED WELLS. (UP TO
8 IN 1 OR MORE?). HAS SKETCH. 10/15/87: B: AS PER TYREE- INSTALLATION
IS THEIRS. TWO YEARS OLD. THE 8K TANK WAS SEALED 14OCT; LOST 2
OVERNIGHT. AIR TESTED TANKS- THE OTHER 2 8K OK? (THE FAILING ONE IS
THE E TANK: REG N/L). 10/15/87: DEC (O'NEILL & GOERTZ) ON SITE:
CHECKED TANK-BED WELLS. ONE OF THE WELLS HAS 2FT7.5 GAS, ANOTHER HAS
1FT2 . DEPTH TO WATER (DTW) APPROX 33-34FT. NO SKETCH. MARKED OUT
(FOUR?) WELLS. 10/16/87: GOERTZ AND TYREE ON SITE- WELLS 6-8 ALREADY
IN UPON DEC ARRIVAL. SPECS UNK. WELL 5 INSTALLED- SOME CLAY. NO ODOR
IN ANY. 10/20/87: TYREE: OWENS-CORNING FOUND 2 24 CRACKS IN THE TANK
(ONE AT EACH END). 10/21/87: TYREE: THE NEW WELLS ARE NOT FUNCTIONAL.
THEY WILL REDRILL ON THE 23RD. 10/23/87: A: O'BRIEN & TYREE ON SITE-
REINSTALLED WELLS 5-8. SOIL IS SILTY-CLAYEY SAND. WELLS 5 AND 8 HAVE
ODOR. 10/23/87: B: WELL 1 HAS 22.8 GAS, WELL 3 HAS TRACE, AND WELL 4
HAS 45.6 OF GAS. HAS DTW BUT NO SKETCH. 11/02/87: O'NEILL CHECKS
WELLS: #1 HAS 24 , #2 HAS 5.75 , #3 HAS .5 , #4 HAS 30 , AND #5 HAS
19 . HAS SKETCH AND DTW. 11/05/87: O'NEILL SAMPLES THE N/L AND S/N/L

PEDNEAULT TO ID AND CROSS-MATCH. *** (THIS WAS DONE AS PART OF METRO). ***. 09/26/88: O'NEILL DISCUSSES WITH M ROWAN (SPILLS ALBANY). GW CONTOURS INDICATE POSSIBLE STREAMBED ALONG UNION AVE. 10/05/88: RECEIVE 12SEPT DATA: THE FIVE SAMPLES ARE ...FRESH GASOLINE AND ARE A MATCH. 10/07/88: RECEIVE 26AUG DATA: THE FIVE SAMPLES ...ARE IDENTICAL AND ARE UNLEADED REGULAR GASOLINE. 10/13/88: A: O'NEILL LETTER TO MPC- INSTALL 2 WELLS AT GETTY (DISSOLVED PLUME) AND 4 AT METRO (ONE OF THESE TO DETERMINE VERTICAL EXTENT OF PLUME). 10/13/88: B: ENCLOSURES SKETCH OF LOCATION FOR A LARGE RECOVERY SYSTEM DESIGNED TO ...REMEDiate THE AREA. 10/27/88: O'NEILL AND MPC ON SITE TO MARKOUT WELLS. 11/02/88: O'NEILL AND MPC ON SITE: INSTALLED 2 WELLS. HAS SOIL LOGS. 11/07/88: MPC INSTALLS 1 WELL (THIS IS AS PER THEIR GETTY BILL). 11/17/88: O'NEILL SEARCHES NCFM FILES FOR HISTORY OF AREA. 11/28/88: TO 29NOV: MPC SAMPLED GETTY WELLS 1, 3, 5, 6, 8-14, 17, 24, 25, AND 29, AND METRO WELLS 6, 9, 10-13, 14D, 15-17, AND A FOR BTEX ANALYSES. 12/06/88: DEC SENDS LETTER TO GETTY REQUESTING ACCESS. 12/09/88: O'NEILL SENDS REPLY TO TOSCANO'S REQUESTS. 12/15/88: TOSCANO SENDS ANOTHER LETTER REQUESTING INFO. 12/30/88: RECEIVE NOV DATA: GETTY BTEX RANGES UP TO 49500PPB AND METRO BTEX RANGES UP TO 11800PPB. 01/04/89: TOSCANO SENDS LETTER REQUESTING DOCUMENTATION ON CALCULATIONS OF AMOUNT LOST. INDICATES WE NOW ESTIMATE 1400-1600GAL LOST (?!?!?!). 01/10/89: A: O'NEILL AND MPC MEET- WILL CALCULATE PROPER PUMP RATE FOR DISSOLVED PLUME REMEDIATION. WILL USE 24 TWO-PUMP SYSTEM LOCATED AT PROPERTY LINE OF METRO/GETTY. 01/10/89: B: WILL ALSO HAVE A 4 DEPRESSION WELL AND 4 RECOVERY WELL NEXT TO TYREE'S OLD SYSTEM. (WILL CHECK TO SEE IF 4 WILL WORK). WILL DISCHARGE TO DRAINAGE. 01/17/89: A: O'NEILL CHECKS THE SITE TO CONFIRM LOCATION FOR NEW RECOVERY, AND CHECKS SURROUNDING AREA. 01/17/89: B: PROPERTY OWNER IS LEE MILTS PETROLEUM INC 175 SUNNYSIDE BLVD PLAINVIEW NY 11803. FACILITY/TANK OWNER IS GETTY? (AT SAME ADDRESS?). 01/19/89: LICATA, O'NEILL, SPILLS (ALBANY) AND MPC MEET TO DISCUSS SIZE OF SYSTEM. RAN COMPUTER MODEL. DECIDED 10-12 TWO-PUMP WELL AT 150GPM BEST. JOHNSON SCREEN (LOW-CARBON). 300-400GPM AIR STRIPPER. 01/23/89: O'NEILL LETTER TO LEE MILTS, CC REG 1 LEGAL: PLEASE SIGN ACCESS FORM. 01/24/89: O'NEILL, GOERTZ STOP AT LEE MILTS: BUILDING HAS POWERTEST AND GETTY SIGNS; VACANT. REG 1 LEGAL SAYS GETTY, PT, LEE MILTS, ETC MERGED IN 85/86. 01/25/89: MPC TO INSTALL 12 WELL SO THEY CAN USE 6 SCAVENGER. 01/26/89: MPC TO INSTALL 2 12 WELLS WITH JOHNSON SCREEN. TOP WILL BE 32FT SOLID PIPE, THEN 36FT SCREEN, THEN BOTTOM OF 4FT SOLID PIPE. 02/01/89: (APPROX DATE): MPC BEGINS PREPARING SITE/GROUNDWATER/PLUME MAPS. (THIS IS AS PER THEIR GETTY BILL). 02/02/89: A: REG 1 ASST ATTORNEY (GRECO) LETTER TO GETTY, CC VARIOUS- UNABLE TO CONTACT LOCAL PERSON RE ACCESS. PLEASE SIGN ACCESS. ...SPILL RESULTED FROM IMPROPER INSTALLATION... . 02/02/89: B: IF TYREE DOES NOT RESUME REMEDIATION EFFORT, DEC WILL HAVE TO TAKE OVER. 02/06/89: DEL GADIO LETTER TO TOM PLESNARSKI (ALBANY), LICATA & O'NEILL, KEN OLIVER (FUND DIRECTOR), AND SHARI CHRIMES (SPILLS ALBANY COUNSEL)- DUE TO SAFETY CONCERNS, CAN NO LONGER WAIT. MUST ABANDON RW. 02/07/89: GETTY RETURNS SIGNED ACCESS FORM. NOTES IT IS A LEASED S/S AND THUS CANNOT GUARANTEE ACCESS. 02/09/89: A: PLESNARSKI LETTER TO DEL GADIO, CC CHRIMES, OLIVER, LICATA, GRECO- AGREES 2 PLUMES BUT DON'T AGREE GETTY PRODUCT RECOVERED WAS LEADED (CITES PEDNEAULT DATA, CONE OF INFLUENCE INSUFFICIENT TO. 02/09/89: B: REMEDIATE METRO PLUME, AND AMOUNT

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RAB: Not reported
CTC: 2895.800
Current Owner: Local Government; Private Sector
Current Prog: Not reported
Future Prog: Not reported
Acreage: Not reported
Description: The former Mitchel Field consisted of about 1,437 acres in Hempstead, New York. Mitchel Field has a history of troop encampments since the Revolutionary War. In 1918, it became an active flying field. During World War II, it was used for training and for sending tactical units overseas. Abandoned tanks are present at the site, and hazardous and toxic wastes and ordnance could be present. The site is currently occupied by Hofstra University, Nassau Community College, the Nassau Coliseum, and the Mitchel Sports Complex. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.
History: Acquisition of the site occurred from 1917 until 1959. The installation consisted of 1,168.0 acres in fee, 181.67 acres in easement, and 7.08 acres and 79.07 acres that were licensed and leased, respectively. Mitchel Field was deactivated in April 1961; 1,076.77 acres fee were reported excess to the General Services Administration, and the remaining 92.13 acres fee were transferred to other DoD agencies. The principal owners of the site are now Hofstra University and Nassau Community College. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

05/05/09 1325 Hrs (A): KEVIN TAYLOR (H2M) called- status? DEC informed him that no inspector had been assigned, and based upon what we had been told, case had been closed. 05/05/09 1325 Hrs (B): HE SAID THEY HAD BEEN PLANNING TO HAVE BORINGS PERFORMED TO CONFIRM THERE WAS NO SUB-FLOOR IMPACTS. 05/05/09 1325 Hrs (C): He will speak to STATE FARM to see whether they still wish to have the borings performed. DR 05/28/09 1040 Hrs (A): ANTHONY MARIANO (MILRO ASSOCIATES) called- they and H2M were on site 5/27 to excavate soil [THEY HAD PERFORMED THE BORINGS EARLIER?]. 05/28/09 1040 Hrs (B): HE SAID H2M HAD SPOKEN TO VP ON 5/21 [AND AGAIN ON 5/27?]. 05/28/09 1040 Hrs (C): Milro moved the boiler, and excavated an area approximately 4ft x 5ft x 4.5ft DEEP. THERE WAS STILL CONTAMINATED SOIL AT THAT DEPTH, BUT IT WAS NOT STRUCTURALLY SAFE TO DIG DEEPER. 05/28/09 1040 Hrs (D): They performed a hand boring to refusal at 10ft. THERE WAS AN ODOR AND A PID READING OF 106PPM AT THAT DEPTH, SO MILRO TOOK AN ENDPOINT SAMPLE FROM THAT DEPTH. 05/28/09 1040 Hrs (E): DEC inquired as to the cause and amount of the spill. Mariano said he was told the cause was a line leak, BUT THAT THERE WAS A HOLE IN THE FLOOR NEAR THE BOILER; he does not know how much oil may have spilled. 05/28/09 1040 Hrs (F): DEC informed Mariano that, since he felt it was not safe to excavate further he could have the excavation backfilled, instructed him to have the sample analyzed, and informed him the case would be reviewed. DR 05/28/09 approx 1050 Hrs: VP CALLED- HE SAID HE HAD SPOKEN TO [H2M OR MILRO?] 5/27. DR 5/29/09 - Spoke with Anthony (Milro). Advised to backfill and submit lab for anyalsis. (JP) 6/1/09 FILE REOPENED AS UA"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Description: Site Location: The Long Island Rail Road (LIRR) Mineola substation site is located in a urban portion of Nassau County, NY. It is located near Front Street and Main Street in Mineola. Site Features: The main site features are the two-story brick building, transformer yard, and parking area. Current Zoning and Land Use: The site is currently zoned for transportation and used by the LIRR as a rectifying station to supply power to the rail road. The immediate areas surrounding the site are used for a mix of commercial and industrial purposes. Past Use of the Site: The site was previously used by the LIRR to convert AC to DC power to power the rail road. The historic source of contamination is mercury from rectifiers that have since been replaced. A site assessment was conducted by the LIRR in August 1999, the assessment identified mercury contamination. The LIRR entered this site into the Voluntary Cleanup Program (VCP) in 2004. Site Geology and Hydrogeology: The soil at the site consists of primarily sand to a depth of several hundred feet. Bedrock is encountered at greater depths. The groundwater is approximately 40 feet below grade.

MINEOLA G16 (LIRR) (Continued)

S106122271

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminant of concern was mercury.
Health Problem: A fence limits access to the site so the public is unlikely to come in contact with surface contaminants, if present. The public is not likely to be drinking contaminated groundwater since public water serves the area and there are no known users of private well water nearby.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "10/08/12 @16:10 t/c to notifier; by S.Witt 275 AST in the basement released some oil, Petro plumber stopped the leak, Milro on the way with temp tank. (VP) 10/09/12 1105 Hrs: Checked internet for Peykar's address. DR 10/24/12 0915 Hrs: DOT NAPOLI (MILRO ASSOCIATES) left message. DR 10/24/12 0930 Hrs: Left message for Napoli. DR 10/24/12 0940 Hrs (A): Napoli called- THE OIL IMPACTED TWO ROOMS. The impacted area in one room was approximately 10ft x 7ft, and in the other room approximately 11ft x 11ft. 10/24/12 0940 Hrs (B): They found cracks in the floor, so they performed SIX borings through the floor to check for subsurface contamination. They checked the soil at 1.ft deep and 3ft deep, and the PID readings ranged from 7ppm to 168ppm. 10/24/12 0940 Hrs (C): DEC informed her the file would be updated and given to a supervisor for review, and directed her to call back later

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was

DONOVAN 01-157 5/31/05 FILE REASSIGNED 4/23/08 TJD File review. LIRR has submitted a request for closure - detailing investigation/remedial activities @Merillon Ave Substation. Initial investigation of this property performed in 1997 reveal SVOC contamination (benzo(a)pyrene) in three samples SL1, SL2 & SL3- @2.5 ft bgs. In January 2007 LIRR returned to location and resampled each location @depths of 3ft & 4ft bgs. All analytes from 1/07 sampling event were reported as below TAGM 4046 allowable concentrations. In March 2007, LIRR and its contractor (Clean Venture) returned to site and excavated a total of 8 drums of petroleum impacted soils. Following excavation activities LIRR reports a post excavation endpoint sample was collected from bottom of each location (3). Summary of laboratory analysis provided from post-ex sampling reveals all compounds within allowable limits. A review of closure documents reveals no site plan, original lab data sheets or information regarding depth of sample collection has been provided. LIRR notified via e-mail of deficiencies - DEC requested submission of required documentation prior to closure of spill file. 9/2/08 TJD File review. LIRR has submitted required closure documentation. No further action is required. "

Remarks: "DIELECTRIC FLUID CONTAMINATION OF SOIL BENEATH RECTIFYING TRANSFORMERS; SAMPLES INDICATE NO SIGNIFICANT PCBS, METALS, SEMIVOLATILES."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By: GTBOBERS

Site Description: Location: The Long Island Rail Road (LIRR) Floral Park site is located in a suburban portion of Nassau County, NY. The site is located between two rail road tracks and Plainfield Ave. Site Features: The main features of the site include a rectifier building, parking lot, and transformer yards. The surrounding parcels are mix of commercial and residential structures. Site Hydrogeology: The groundwater is approximately 65 feet below grade and does not appear to be impacted by site related contaminants. Historic Uses: The site is currently used by the LIRR as a rectifying station to supply power to the rail road. The historic source of contamination is mercury from rectifiers that have since been replaced with non-mercury rectifiers. A site assessment was conducted by the LIRR in the August 1999, and a remedial measure was conducted in April 2000. The LIRR entered this site into the Voluntary Cleanup Program (VCP) in 2004.

Env Problem: Nature and Extent of Contamination: Based on the investigation conducted, Mercury is the primary contaminant of concern. Lead contamination is also present at the site. Investigations have indicated mercury contamination is present in the surface and subsurface soil; also, one area of surface soil is impacted by lead contamination. The impacted soil is within site boundaries primarily adjacent to on-site structures. Lead and mercury exceed the soil clean up objectives for industrial sites. More information regarding the site can be found in the documents placed in the Site Document

Repository. The site may represent a threat to on-site receptors and the environment. Special Resources Impacted/Threatened: A Fish and Wildlife Impact Analysis was conducted and determined that the site contamination was not a threat to fish or wildlife.

Health Problem: A fence limits access to the site so the public is unlikely to come in contact with surface contaminants, if present. The public is not likely to be drinking contaminated groundwater since public water serves the area and there are no known users of private well water nearby.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 08/01/2016
Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

	Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey
