GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System
New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

HICKSVILLE SOUTH GARAGE
16-144-7
HICKSVILLE, NY 11801

TARGET PROPERTY COORDINATES

Latitude (North):	40.767103 - 40° 46' 1.57''
Longitude (West):	73.531017 - 73° 31' 51.66''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	623982.9
UTM Y (Meters):	4513730.5
Elevation:	139 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940537 HICKSVILLE, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

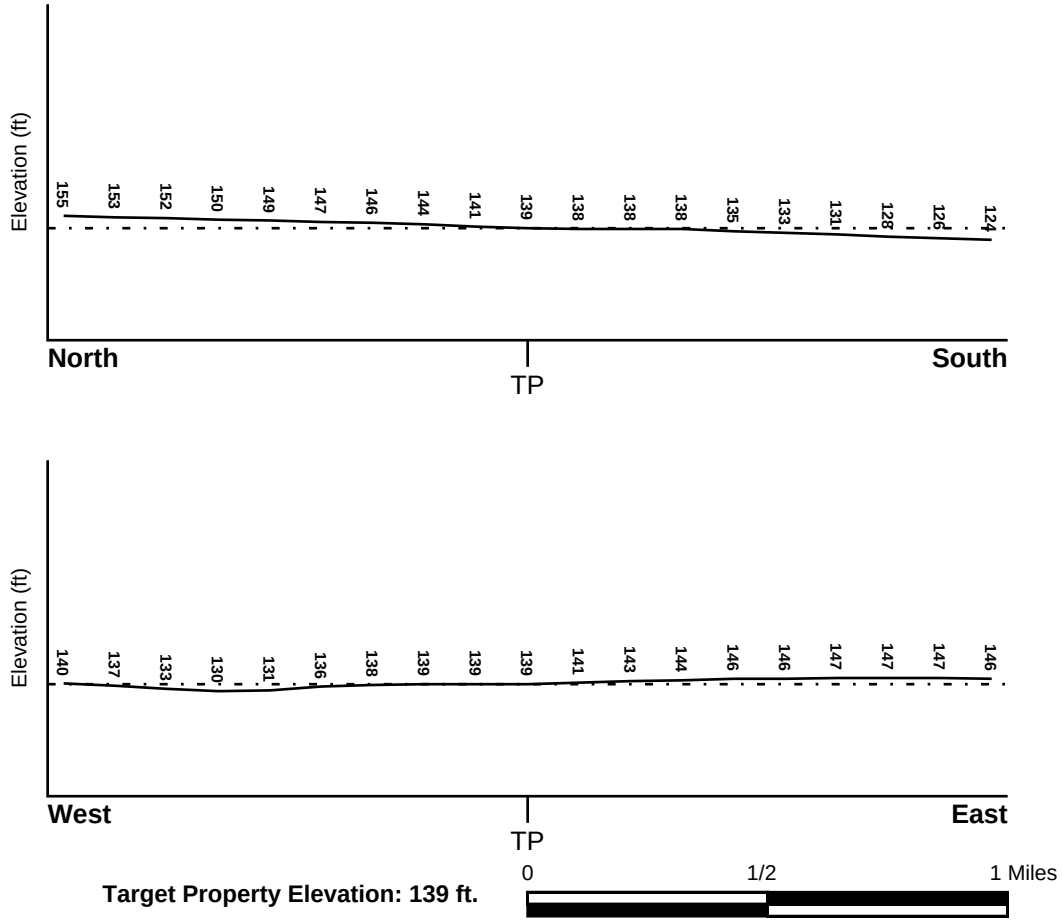
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36059C0143F	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
36059C0141F	FEMA Q3 Flood data
36059C0145F	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HICKSVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SW
Site Name:	Alsy Manufacturing
Site EPA ID Number:	NYD981184237
Groundwater Flow Direction:	South
Inferred Depth to Water:	approximately 60 feet.
Hydraulic Connection:	The surficial aquifer and underlying aquifer are hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Pleistocene
Code:	Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

FREEDOM OF INFORMATION LAW ("FOIL")

Article 6 of the New York Public Officers Law (sections 84-90), which is also known as the Freedom of Information Law ("FOIL"), gives members of the public a right of access to government records, with certain exceptions that are enumerated in Section 87(2). The full text of FOIL and other information about the law is available at the website of the New York State Committee on Open Government. In accordance with Section 89(3)(b) of FOIL, Nassau County affords you the opportunity to submit records access requests by email by completing the relevant portions of the below electronic form and directing it to the Nassau County agency that is the custodian of the requested records.

Please select a department to send your request to:

County Clerk

Please describe the records you are requesting:

Matrix is performing an environmental due diligence for a Site located at Barclay Avenue, Hicksville, Nassau County, NY (Block G, lot 231, 232, and 227). This site is currently a parking lot. Matrix is requesting information and files including but not limited to, remedial action and permits, underground storage tanks, above ground storage tanks, tanks and building permits, health and environmental violations, discharges/releases

RE: PUBLIC RECORDS REQUEST of 3/15/2017, Reference # W019405-031517

Date: 03/15/2017

Dear Samantha Adler,

I write regarding your Freedom of Information Law (FOIL) request seeking:
Matrix is performing an environmental due diligence for a Site located at Barclay Avenue, Hicksville, Nassau County, NY (Block G, lot 231, 232, and 227). This site is currently a parking lot. Matrix is requesting information and files including but not limited to, remedial action and permits, underground storage tanks, above ground storage tanks, tanks and building permits, health and environmental violations, discharges/releases of petroleum and hazardous material, spills, EPA correspondence, inspections, health and environmental investigations, historic property ownership, existing and former tenants, fires, potable wells, monitoring wells, septic systems, and other records not listed herein..

In order for the Department to accurately search for the records you seek, we need you to give us more specific information describing the records.

1. Please visit https://mycusthelp.com/NEWYORKDEC/_rs/RequestLogin.aspx within two weeks of the date of this message to log into your DEC FOIL Request account, where you can send a Message to the Department clarifying your request. Your email address is your username for logging in.
2. In your Message, please provide as much of the following information as you can:

    - The name of the facility
    - An accurate street address for the property or facility
    - A permit number, if applicable
    - The nature of your request (exactly what information are you looking to obtain)
    - The name of the property owner
    - The Spill Number when seeking records of chemical or petroleum spill incidents

You may find Spill number information on the Department's website, in the online Spill Incidents Database at http://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=2.

If your search of the Spill Incidents Database reveals that a spill number does not exist for a site or location about which you seek spill information, please state that no spill number exists in your reply to this Message.

Again, We encourage you to send your reply from your online customer DEC FOIL account in the Department's by email, which will facilitate faster processing of your request.

Please reference FOIL request W019405-031517 in all your communications with Department regarding this request.

If we do not receive your reply within two weeks of the date of this message, your request will be closed.

If you have any questions in the interim, please call me at 631 444-0202 and refer to FOIL request W019405-031517.

Sincerely,
Region 1 FOIL Coordinator

Samantha Adler

Subject: FOIL Request :: W019405-031517

Dear Samantha :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 3/15/2017 and given the reference number FOIL #W019405-031517 for tracking purposes. You may expect the Department's response to your request no later than **4/12/2017**.

Record Requested: **Matrix is performing an environmental due diligence for a Site located at Barclay Avenue, Hicksville, Nassau County, NY (Block G, lot 231, 232, and 227). This site is currently a parking lot. Matrix is requesting information and files including but not limited to, remedial action and permits, underground storage tanks, above ground storage tanks, tanks and building permits, health and environmental violations, discharges/releases of petroleum and hazardous material, spills, EPA correspondence, inspections, health and environmental investigations, historic property ownership, existing and former tenants, fires, potable wells, monitoring wells, septic systems, and other records not listed herein.**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

March 20, 2017

Dear Miss Samantha C. Adler,

EPA-R2-2017-004868 has been processed with the following final disposition:

This is in response to your Freedom of Information Act (FOIA) request, identified above, dated 03/14/2017, that you submitted to the U.S. Environmental Protection Agency (EPA). Your request seeks environmental information on the following:

Site located at Barclay Avenue, Hicksville, Nassau County, NY

The information that you are seeking is publicly available on EPA's *MyPropertyInfo* online database. The database will provide you with information concerning records the EPA has about a specific property, and it can be accessed at the link below:

http://www.epa.gov/myproperty/

Because this information is publicly available, your FOIA request for this information is being administratively closed, in accordance with EPA's FOIA regulations. See 40 C.F.R. Part 2, Subpart A. Please note you should perform the initial search of a property of interest by visiting the above link. If your search produces results, then proceed with an information request for additional records under FOIA. Your FOIA submittal should be accompanied by these results. Be advised, soon we will discontinue the processing of requests seeking data that is available in the public domain. Instead, you should follow the above steps.

If you consider this response to be a denial of your request, you may appeal this determination to the National Freedom of Information Office, U.S. EPA, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, DC 20460 (U.S. Postal Service Only). Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service, or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20001. Your appeal must be made in writing, and it must be received no later than 90 calendar days from the date of this letter. The Agency will not consider appeals received after the 90 calendar day limit. Appeals received after 5:00 pm EST will be considered received the next business day. The appeal letter should include the FOIA tracking number listed above. For quickest possible handling, the subject line of your email, the appeal letter, and its envelope, if applicable, should be marked "Freedom of Information Act Appeal." Additionally, you may seek assistance from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202)566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510, 8610 Adelphi Road, College Park, MD 20740-6001; e-mail, ogis@nara.gov; telephone, 301-837-1996 or 1-877-684-6448; and facsimile, 301-837-0348.

This letter concludes our response to your request. Thank you for your interest in this information.

Respectfully,

/s/

Mary Mears
Public Affairs Director
U.S. EPA Region 2 (NJ, NY, PR, the US VI and eight Indian Nations)

Re: Request For Record Nos. 28465

Dear Ms. Adler:

This will acknowledge receipt of your request dated March 15, 2017, received in this office on March 15, 2017 requesting information pursuant to the New York State Freedom of Information Law.

A determination will be made concerning the availability of these records under the Freedom of Information Law and this Office will notify you within twenty (20) business days. Please refer to the Request For Record No. 28465 on all future correspondence relating to this request.

The fee for copying records is 25 cents per page. Prior to copying any records, you will be contacted regarding availability and the expense involved.

Sincerely,

JAMES ALTADONNA JR.
Town Clerk

Site Name:	Client Name:
Hicksville South Garage	Matrix New World Eng.,Inc.
16-144-7	26 Columbia Tpke Fl2
Hicksville, NY 11801	Florham Park, NJ 07932
EDR Inquiry # 4865926.53	Contact: Brian Crespi

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Matrix New World Eng.,Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported
Hydric Status:	Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

Soil Layer Information

	Boundary			Classification			
Layer	**Upper**	**Lower**	**Soil Texture Class**	**AASHTO Group**	**Unified Soil**	**Permeability Rate (in/hr)**	**Soil Reaction (pH)**
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:	silt loam loamy sand sandy loam fine sandy loam
Surficial Soil Types:	silt loam loamy sand sandy loam fine sandy loam
Shallow Soil Types:	sandy loam
Deeper Soil Types:	unweathered bedrock very gravelly - loamy sand stratified sandy loam

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was PARISH SOIL BORINGS & MW'S INSTALLED AND MONITORED, NO OTHER ACTION NEEDED 08/27/90: Nassau County Health reported finding contamination during routine removal of one 15K #6 oil tank. Approx 70-80cy soil removed. Could not get it all. 10/01/90: DEC (Parish) letter to Joe Wolf (Phillips Corp , 100 Providence Pike, Slatersville RI, 02876)- Request wells, monitoring for floating product, and sampling for dissolved product. 10/19/90: Philips Components letter- Will perform the work. 01/02/97: Letter to Philips- Appears requested investigation was never performed. Please advise on whether this is so. 01/23/97 (A): Fluor Daniels (consultant for Philips) proposal- Will have 2 soil borings performed. Split-spoon samples will be taken and field screened; one sample from each boring will be analyzed. Borings will be finished as well if contamination extends to within 20ft of water table. Groundwater samples will be taken if needed. 01/23/97 (B): MAP SHOWS APPROX 12 MONITORING WELLS AROUND THE SITE. 03/06/97 (A): Parish on site with Fluor Daniels et al- Site being sold. Performed 2 borings. Geoprobes previously done in old tank bed; water samples taken. 04/04/97: Philips submits Fluor Daniels' report- Some contamination noted in boring 1 from approx 15ft to 27ft. Levels below DEC guidance. Depth to water approx 63ft. 04/07/97: Letter to Philips- No further requirements at this time."
Remarks:	"70-80 YDS STOCKPILED. EXCAVATION BACKFILLED.LARGE AMOUNT OF CONTAMINATION REMAINING IN THE GROUND. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was PARISH WELL 12/31/86: Long Island Lighting reported gasoline odors in the building and in their utilities. 01/05/87: As per Nassau County Fire Marshal- odor was noted where utilities enter building. Amperex has a 275 gal gasoline tank for their generator, and a 3K gal alcohol tank. NY Telephone is next door (202 Duffy). NCFM to request tank tests; Nassau County Health to check air quality. 01/06/87: As per NCFM- found 2000ppm in pit in the building. NY Tel has 1 abandoned 4K and 1 abandoned 2K. 01/09/87 (A): DEC (Parish) met NCFM on site- Confirmed gasoline odor. Has sketch. 01/09/87 (B): POSSIBLE SOURCES- Amperex has 1 275 gal gasoline tank, 1 15K #4 oil tank, and the 3K alcohol tank. NY Tel (next door E) has some abandoned tanks and a 10K gasoline tank. Old farm across street to S has 550 gal gas. There are

230 DUFFY AVENUE, 230 DUFFY AVENUE, HICKSVILLE, NY 11801 (Continued)

others further away. 01/16/87: Parish on site- requested access from Amperex for investigation. 01/30/87: Amperex denying access unless gasoline was found in significant amounts . 02/06/87: NCHD report of 6 and 14Jan- Some BTEX in utility pit, along with chlorinated solvents. 03/02/87: Parish on site with Tyree- performed soil gas survey along Duffy, and between Amperex and NY Tel, and took samples. Has sketch. 03/06/87: Map- shows old gasoline , fresh gasoline , and chlorinated hydrocarbons . 04/27/87: Parish and Tyree on site- Installed well on Duffy. 04/28/87 - 04/30/87: Tyree installed more wells along Duffy, between Amperex and NY Tel. 07/17/87: Parish letter to NY Tel- Request info on numbers and locations of past and present tanks; on-site investigation. Gives scenario for failure to comply. 08/04/87 (A): NY Tel to have soil borings performed next to the tanks. Will finish them as wells if necessary. 08/04/87 (B): MAP SHOWS 1 ABANDONED 550 GALLON DIESEL TANK, 1 ABANDONED 550 GALLON GASOLINE TANK, 1 ABANDONED 2K GASOLINE TANK, 1 ABANDONED 4K GASOLINE TANK, 1 550 GAL WASTE OIL TANK, 1 3K FUEL OIL TANK, AND 1 10K GASOLINE TANK. 08/11/87: DEC (Acampora) on site- Borings performed at NY Tel near abandoned gas and diesel tanks. Soil ok. 10/20/87: Pedneault sampled- Low levels of BTEX, along with tetrachlorethane. 02/10/88: DEC (Mirza) checked U-tubes of the 10K tank on N side of NY Tel- FOUND 8 PRODUCT IN THE WEST TUBE. THIS OCCURRED ONLY ONCE. 02/16/88: Mirza checked wells- no floating product. 03/21/88: Tyree installed wells around tank at rear of NY Tel. 07/06/88: Pedneault to sample for BTEX. 07/18/89: Letter to Tyree- cease monitoring of wells (no floating product ever found?). 01/17/89: Parish on site with Amperex and consultant- SITE BEING SOLD. Consultant to sample. 05/03/91: Tyree letter- No floating product from 7Apr88 to 9Mar90. Request closure. 05/21/91: Letter to Tyree- sample for dissolved product. 07/31/91: Tyree letter- sampled 26Jun. FOUND 2060PPB MTBE AND 343PPB BTEX IN WELL 1 ; TRACE MTBE AND 55PPB BTEX IN WELL 2 . 03/10/97: Letter to 230 DUFFY REALTY CORP - There is no identified responsible party or groundwater impact based on our investigation . The spill will be closed. ***NOTE: SEE ALSO 8704418 (210 DUFFY-AMPEREX)- 15K #2 OIL TANK FAILED TIGHTNESS TEST. PASSED RETEST 6SEPT87. CLOSED 23SEPT87. BROWNFIELDS: State and tribal Brownfields sites

Program:	BCP
Site Code:	331484
Acres:	6.7
HW Code:	C130141
SWIS:	3024
Town:	Oyster Bay
Record Added Date:	10/01/2004
Record Updated Date:	09/26/2016
Update By:	WJPARISH
Site Description:	Site Location: The site is located at 230 Duffy Avenue in Hicksville, Nassau County. Site Features: The site occupies approximately 6.76 acres of land. The main site feature include a 122,900 square foot one and two story building. The remainder of the site consists of an asphalt parking area with some limited area of grass cover. The Site is bounded on the north by the Long Island Railroad; on the south by Duffy Avenue and a residential neighborhood; and on the east and west by active and vacant industrial or commercial operations. The Site building is presently used for warehouse/retail. Surrounding land

230 DUFFY AVENUE, 230 DUFFY AVENUE, HICKSVILLE, NY 11801 (Continued)

uses include residential, commercial and industrial uses. Current Zoning/Use: The property, which is located in an urban/suburban area, is currently zoned for commercial/industrial use. Historic Use(s) and Source of Contamination: Philips Electronics North America Corporation (Philips) formerly owned the Site, which was operated by Amperex Electronics Corporation, a subsidiary of Philips. Amperex's primary business was the manufacture of electron tubes, consisting of receiving and transmitting tubes for high power RF and microwave applications. Manufacturing operations included the machining, heat treating, chemical cleaning, metal and glass working, cathode coating and metal plating processes. In the early 1990s, the plant was closed and all manufacturing and process equipment was removed from the Site.Site Geology/Hydrogeology: The soils in the area of the Site are classified by the US Department of Agriculture as consisting mostly of urban land soils, which contain a mix of sand, silt, clay and fill material. The depth to groundwater at the Site varies from approximately 55 to 65 feet below grade. The site-specific groundwater flow direction is to the south-southeast.

Env Problem:

Nature and Extent of Contamination: Based on the environmental data collected during the RI and supplemental RI that was conducted at the site, the primary contaminants of concern at this site include volatile organic compounds (VOCs) and metals in soil and groundwater. Several VOCs were detected in site soils but below their respective NYSDEC Part 375 Restricted Industrial standards. Two metals, arsenic and mercury, were detected in site soils exceeding the Part 375 Restricted Industrial standards. Several VOCs were detected in site groundwater above the NYSDEC AWQSGVs. Detected compounds include: tetrachloroethene (PCE) at 12 ug/L, cis-1,2-dichloroethene (cis-1,2-DCE) at 14 ug/L, trichloroethene (TCE)at 40 ug/L, 1,1-dichloroethane (1,1-DCA) at 59 ug/L, and 1,1,1-trichloroethane (1,1,1-TCA) at 3000 ug/L. The several metals were detected in site groundwater above the NYSDEC AWQSGV. Soil vapor intrusion into structures on-site is also a concern. Sub-slab and soil vapor samples collected revealed levels exceeding NYSDOH guidance values. 1,1,1 TCE values ranged from 117 ug/m3 to 7,310 ug/m3. Carbon tetrachloride was found at levels ranging from 21 ug/m3 to 1,990 ug/m3. PCE values ranged from 173 ug/m3 to 14,600 ug/m3. TCE values ranged from 6.4 ug/m3 to 355 ug/m3. Regarding sub-slab samples collected, 1,1,1 TCE

230 DUFFY AVENUE, 230 DUFFY AVENUE, HICKSVILLE, NY 11801 (Continued)

	was found in exceedance of the NYSDOH Sub-Slab guidance value in five of the six sub-slab samples collected, ranging from 446 ug/m3 to 16,600 ug/m3. PCE was found in exceedance in five of the six sub-slab samples, ranging from 479 ug/m3 to 1,530 ug/m3. TCE was found in exceedance in two of the six sub-slab vapor samples ranging from 59.7 ug/m3 to 63.4 ug/m3. Based on a comparison to the NYSDOH guidance document decision matrices, mitigation is warranted. Currently a Remedial Work Plan is being prepared.
Health Problem:	Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes. The site is served by a public water supply that has a treatment system in place to remove contamination prior to distribution to the public. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for inhalation of site contaminants via soil vapor intrusion within the on-site building. Also, the potential exists for off-site migration of contaminated soil vapor toward downgradient residences.

Telephone: 202-564-6023

RMP: Risk Management Plans
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

E DESIGNATION: E DESIGNATION SITE LISTING
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

ENV RES DECL: Environmental Restrictive Declarations

RECORD SOURCES AND CURRENCY

Standard Environmental Record Source: State and tribal institutional control / engineering control registries

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

ERP: Environmental Restoration Program Listing

Standard Environmental Record Source: State and tribal Brownfields sites

Search Distance: 0.333 Mile

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

HIST SPILLS: SPILLS Database

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

RECORD SOURCES AND CURRENCY

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Number of Days to Update: 40 Telephone: 202-564-2501

RECORD SOURCES AND CURRENCY

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

Standard Environmental Record Source: Federal RCRA TSD facilities list

Search Distance: 0.333 Mile

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

SEMS: Superfund Enterprise Management System

Standard Environmental Record Source: Federal CERCLIS

Search Distance: 0.333 Mile

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016

Last EDR Contact :01/06/2017

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.125 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

MATRIXNEWORLD
Engineering Progress

Matrix New World Engineering
Prospective Landowner And/Or User Questionnaire

Subject Property Name:	Hicksville Parking Lot on Barclay Street
Subject Property Address:	Barclay Street, Hicksville

QUESTION	YES	NO	UNK?
1. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property?		X	
2. Are you are aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property?		X	
3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		X	
4. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?			X
5. Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?			X
6. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants?		X	
7. Are you aware of commonly known or reasonably ascertainable information about the property? For example: Do you know the past uses of the property?		X	
8. Do you know specific chemicals that are present or once were present at the property?		X	
9. Do you know of spills or other chemical releases that have taken place at the property?		X	
10. Do you know of environmental cleanups that have taken place at the property?		X	
11. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?			X
12. Has a title search been performed? If yes, please attach.			X
13. Is the property or has the property been used as a gasoline station, motor repair facility, commercial printing, dry cleaners, photo developing, landfill, industrial use, waste treatment or disposal facility?			X
14. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals at the subject property?			X
15. Are there currently any industrial drums or chemicals at the subject property?			X
16. Are you aware of contaminated fill at the subject property? (i.e. Fill dirt from off-site.)			X
17. Are there currently any pits, ponds, or lagoons in connection with waste disposal or treatment at the subject property?			X
18. Are there any current or previous underground storage tanks or aboveground storage tanks at the subject property?			X
19. Are there currently any vent pipes, fill pipes, or access ways protruding from the ground at the subject property?			X
20. Is the subject property served by a private well and or a private septic system?			X
21. Does the property discharge industrial wastewater (excluding sanitary sewer)?			X
22. Are there any monitoring wells at the subject property?

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) FLOOD INSURANCE RATE MAP (FIRM)

National Flood Hazard Layer FIRMette

Legend

- Cross-Sections
- Base Flood Elevations

Flood Hazard Zones

- 1% Annual Chance Flood
- Regulatory Floodway
- Special Floodway
- Area of Undetermined Flood Hazard
- 0.2% Annual Chance Flood
- Future Conditions 1% Annual Chance Flood Hazard
- Area with Reduced Risk Due to Levee

LOMRs

- Effective

Map Panels

- Digital Data
- Unmodernized Maps
- Unmapped

This map complies with FEMA's standards for the use of digital flood maps. The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. The base map shown complies with FEMA's base map accuracy standards.

The NFHL is a living database, updated daily, and this map represents a snapshot of information at a specific time.

Flood risks are dynamic and can change frequently due to a variety of factors, including weather patterns, erosion, and new development. FEMA flood maps are continually updated through a variety of processes. Users should always verify through the Map Service Center (http://msc.fema.gov) or the Community Map Repository that they have the current effective information.

NFHL maps should not be created for unmapped or unmodernized areas.

Re: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
LONG ISLAND RAILROAD EXPANSION PROJECT: SITE PROCUREMENT
RAILROAD AVENUE PARKING LOT
VILLAGE OF WESTBURY, NASSAU COUNTY, NEW YORK
MATRIX NO. 16-144

Dear Mr. Aksman:

Matrix New World Engineering (Matrix) is pleased to present this Phase I Environmental Site Assessment (ESA) Report for the above-referenced site.

This report summarizes the findings of the site reconnaissance, the review of historic and current uses of the site to identify contamination by hazardous substances or waste, the review of governmental databases, and the review of other pertinent data. No sampling or laboratory analysis of any media was performed as part of this Phase I ESA. As a result of the Phase I ESA, four Recognized Environmental Conditions (RECs) were identified for the site.

If you have any questions regarding the information contained in this report, please contact us at (973) 240-1800.

Sincerely,

Brian Crespi
Project Manager

Mindy Chassin Horowitz
Program Director

1.0 SUMMARY

Matrix New World Engineering, Land Surveying and Landscape Architecture, P.C. (Matrix) was retained by Gannett Fleming–AECOM Rail Road Expansion Partnership, a Joint Venture between Gannett Fleming Engineers and Architects, PC and AECOM USA, Inc. (the "JV") to provide environmental services to the Metropolitan Transportation Authority (MTA) and Long Island Rail Road (LIRR) in support of the proposed installation of a third track, railway grade crossing separations and/or closures and infrastructure improvements between the Floral Park Station and the Hicksville Station, known as the "LIRR Expansion Project".

As part of the project, Matrix has been retained to complete a Phase I Environmental Site Assessment (ESA) for the Railroad Avenue parking lot in the Village of Westbury, Nassau County, New York (Site), to be acquired as part of the project. The Phase I ESAs has been performed in accordance with Attachment B of the LIRR's Technical Scope of Work (TSOW) for the LIRR Expansion Project from Floral Park to Hicksville (January 2016). The purpose of the Phase I ESA is to gather information to be used in the acquisition process. This Phase I ESA has been prepared in general accordance with the American Society for Testing and Materials (ASTM) Designation E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and ASTM Designation E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.* The following report summarizes the conclusions and opinions representing Matrix's best professional judgment based on information obtained during the Phase I ESA.

1.1 Site Summary

The Metro Transit Authority (MTA) owns a parking lot in the Village of Westbury, New York, which is operated by Parking Systems Plus (PSP). The approximately 2.19-acre site is used as a parking lot and does not contain any structures. The site has been identified as a full parking lot since around 1960, before which it was used partially as a parking lot with the remaining land undeveloped.

1.2 Recognized Environmental Conditions

Matrix performed a Phase I ESA of the site at Railroad Avenue parking lot in Westbury, New York in general conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 6.3 of this report. This assessment has revealed the following four Recognized Environmental Conditions (RECs) in connection with the site:

- There is one monitoring well in the northwest portion of the Site. This well was not visible during the Site reconnaissance and was likely covered by a parked car. LIRR Corporate Safety – Environmental Planning and Compliance Group has no record of wells at the Site or knowledge of its purpose or date of installation, but it's presumed to be for monitoring an off-Site groundwater plume. Matrix believes it is

likely that the well is part of the monitoring network for the contaminated groundwater plume associated with the 123 Post Avenue site, discussed immediately below.

- Westbury Valet/Top Cleaners, located at 123 Post Avenue, 0.030 miles west of the Site and at a higher elevation relative to the Site, is a dry-cleaning facility. Based on review of historical Sanborn maps the facility has been a dry-cleaner since at least 1968. This property has been identified on the New York State Hazardous Waste Site (NY SHWS) databases as having on-site and off-site groundwater contamination with tetrachloroethene (PCE), and its breakdown products, trichloroethene (TCE) and dichloroethene (DCE). The property is also identified as having soil vapor and associated indoor air contaminated with PCE. This property is listed on the Registry of Inactive Hazardous Waste Disposal sites as a Class 2 site, representing a significant threat to human health and the environment; action required. The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2). The depth to water is approximately 35 feet and flows to the south-south west. The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.
- Auto Tique II, located at 401 Railroad Avenue, adjacent to the east of the Site, and at a higher elevation relative to the Site, is listed on the New York State Underground Storage Tank (NY UST) database as having an active UST. Len-Tone Auto Inc., a prior operator of the site, was identified as a historical generator of various hazardous wastes. There is no indication that there has been a violation or spill or other source of contamination from the facility and no further action is necessary. Site reconnaissance observations indicated this facility is no longer present and has been redeveloped as a Storquest self-storage facility. Based on the prior site use as an auto repair shop and its proximity to the Site, this location is a REC.
- Vapor Encroachment Condition (VEC): A Tier 1 Vapor Encroachment Screen (VES) was completed by Matrix using EDR's Vapor Encroachment Screen Worksheet. Based on available information, a VEC could not be ruled out at the Site. Please see Section 4.5 below for further discussion on the Tier 1 VES.

A Recognized Environmental Conditions map is presented as Figure 5.

1.3 Controlled RECs

Controlled Recognized Environmental Conditions (CRECs) are recognized environmental conditions resulting from a past release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory authority with hazardous substance or petroleum products allowed to remain in place subject to the implementation of required controls. Matrix did not identify any CRECs, as defined by the ASTM Standard.

1.4 Historical RECs

Historical Recognized Environmental Conditions (HRECs) are recognized environmental conditions resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls. No HRECs were identified for the Site. Matrix did not identify any HRECs, as defined by the ASTM Standard.

1.5 De Minimis Conditions

No *de minimis* conditions were observed or identified through interviews or records review of current or historical uses of the Site and adjoining properties.

1.6 Other Findings

The term "other finding" is not defined by ASTM; rather, Matrix uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard. Although not a considered REC based on currently available information, Matrix identified the following other findings based on review of the historical automotive facilities database, the historical dry cleaning database and the Site reconnaissance. Sites within 0.1 miles of the Site and at a higher elevation were determined to have the potential to impact the Site should a spill have occurred. These facilities were not identified on any other databases and there are no records of spills or other known sources of contamination from these facilities.

- A pole-mounted enclosure manufactured by Alpha, in the southwest portion of the Site. The enclosure is used to support distributed powering architectures in broadband applications. These enclosures typically contain lead-acid batteries, and thus creates a concern for the Site. There is no evidence of staining, leaking, or damage to this enclosure.
- New York Telephone Co. located on Railroad Avenue, mapped by EDR at the border of Post Ave and the Site. This listing appears to be a mapping error, based on an associated address of 15 Ave C and database results that are not consistent with the known history of the area. New York Telephone Co. has three closed spill cases and has also been identified as a Conditionally Exempt Small Quantity Generator (CESQ) generator of hazardous waste. Based on the lack of a reliable street address and given the listings on multiple databases, this facility is considered an other finding as defined by Matrix.
- 401 Railroad Avenue is the location of a historical automotive body shop, 0.040 miles east/northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- Westbury Terrace Condo., located at 135 Post Avenue, 0.048 miles from the Site, and at a higher elevation relative to the Site, is the location of an active UST, with no history of a release. Based the

proximity and upgradient direction from the site, there is potential for impact to the site should a release have occurred.

- Horizon at Westbury, located 130 Post Avenue, 0.078 miles from the Site, and at a higher elevation relative to the Site, is the location of a former UST. Based on the proximity and upgradient direction from the site, there is potential for impact to the site should a release have occurred.
- 415 Railroad Avenue is the location of a historical automotive body shop, 0.079 miles east/northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- 150 Linden Avenue is the location of a historical automotive technician's shop, 0.099 miles northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- 159 Post Avenue is the location of a historical automotive body shop, 0.108 miles northwest of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- Union Oil located at 333 Union Avenue, 0.035 miles northeast of the Site across the LIRR right-of-way, was listed on the New York Leaking Storage Tanks (NY LTANKS), NY UST and New York State Spills (NY SPILLS) databases. There were previously at least one 3,000-gallon unleaded gasoline tank and three 50,000 and five 20,000 gallon #2 fuel oil USTs on-site, closed in 1988. Two spills, spill #8801831 concerning gasoline and spill number #8801206 concerning #2 fuel oil occurred on-site and have subsequently been closed to the satisfaction of NYSDEC. Based on the closed status of the spills, this facility is not considered a REC, although its upgradient proximity to the site qualifies it as an other finding as defined by Matrix.
- Historical petroleum storage was noted at multiple facilities across the LIRR to the north, in the presumed upgradient groundwater flow direction. In addition to 33 Union Avenue above, facilities included a filling station north of the hotel, shown on both the 1941 and 1968 Sanborn maps, as well as multiple garages and auto facilities, including a garage with a 250-gallon gasoline UST, shown in the 1920 Sanborn map. The potential for leaks to have occurred from these USTs in proximity to the Site is of concern, and due to distance from the Site are considered other findings as defined by Matrix.
- The Hicks & Sons Westbury Coal Yard, west of the Site across Post Avenue, in the presumed sidegradient direction, had two fuel oil tanks on the eastern portion of the property, as shown on the 1968 Sanborn map. Due to the presumed sidegradient direction of groundwater flow and lack of a spill history associated with the facility, the property is considered an other finding as defined by Matrix.

1.7 Significant Data Gaps

- To date, responses to some FOIL requests submitted have not been received. All responses will be forwarded upon receipt with recommendations, if necessary.
- The entirety of the Site was inspected during Matrix's walkthrough, though most of the Site was covered by parked cars, limiting a complete inspection.
- The Sanborn Maps do not illustrate any information within the Site boundaries.
- In addition, a limitation was encountered in determining the historical use of the subject property. The earliest source of historical information reasonably ascertainable within the time frame of this report in which usage could be determined was an aerial photograph from 1938. At the time of the photograph, a portion of the Site appeared to be used as railroad siding and parking of automobiles. Therefore, the ASTM E1527 requirement to determine all obvious uses of the property from the present back to the property's first obvious developed use, or back to 1940, whichever is earlier, could not be achieved. However, based upon the identified agricultural land use, it is unlikely that there had been significant prior development; therefore, this data failure is not expected to impact the results of this assessment.

1.8 Non-scope Considerations

Matrix did not identify any non-scope considerations.

2.0 INTRODUCTION

2.1 Purpose

This Phase I ESA Report has been prepared by Matrix for LIRR for the property located at Railroad Avenue in the Village of Westbury, Nassau County, New York (Site). The objective of the Phase I ESA is to evaluate whether current or historical practices associated with the Site or nearby properties have the potential to have created, or to create in the future, a Recognized Environmental Condition (REC) at the Site. The term REC is defined by ASTM Standard 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. Historic information and current conditions and operations pertaining to the Site are addressed in this report. The Phase I ESA will also identify Controlled Recognized Environmental Conditions (CRECs) in connection with the Site. The term CREC is defined by ASTM Standard 1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory authority with hazardous substance or petroleum products allowed to remain in place subject to the implementation of required controls. Additionally, the Phase I ESA will identify any Historical Recognized Environmental Conditions (HRECs), which are defined by ASTM Standard 1527-13 as RECs resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls.

2.2 Detailed Scope-of-Services

The scope of services for this project included a visual reconnaissance of the Site and neighboring properties; review of readily available Federal, state, and local regulatory records; examination of historic information and evaluation of current and past operations and activities on-site. Matrix reviewed/utilized historic aerial photographs, Sanborn Fire Insurance Maps, historic topographic maps, and city directories as part of the Phase I ESA. Additionally, a regulatory database search was conducted by Environmental Data Resources Inc. (EDR), of Shelton, Connecticut for information available in governmental databases. The EDR Radius Map Report is provided in Appendix A.

The Phase I ESA also included an initial vapor encroachment screening (VES) to determine if there is a potential for vapors to occur in the subsurface below existing and/or proposed on-site structures from those hazardous substances, petroleum and petroleum products that consist of volatile organic compounds (VOC), semi-volatile organic compounds (SVOC) and inorganic volatile compounds. The VES meets the Tier 1 “non-invasive” screening requirements of ASTM E2600-15, and is provided in Appendix H.

2.3 Significant Assumptions

Information and records provided by the client, government agencies, and outside vendors retained by Matrix are assumed to be correct and complete.

2.4 Limitations and Exceptions

This Phase I ESA has been prepared for the exclusive use of the MTA, LIRR, and JV. It represents a professional opinion and judgment based on information supplied by the present owner of the Site, information collected by Matrix, and additional data and information provided by governmental agencies. Matrix only warrants that it provides services in accordance with generally-accepted practices in the engineering/environmental site assessment field. No other warranty or representation, either expressed or implied, is included or intended as part of its services, proposals, contracts, or reports. Matrix cannot guarantee, certify, or warrant that the Site is, or is not, free of environmental impairment/liabilities without conducting a site-specific subsurface investigation involving soil and groundwater laboratory analyses. Even with such a program, the data and samples from any given soil boring or monitoring well will indicate conditions that exist only at that location, and may not necessarily apply to the Site as a whole.

In preparing this report, Matrix has relied on certain information provided by Federal, state, and local officials and other parties referenced herein, and on file of government agencies and others that were readily available at the time of this assessment. Although there may have been overlap of this information provided by these various sources, Matrix did not attempt to independently verify the accuracy or completeness of information reviewed or received during the course of this Phase I ESA.

Observations were made on all portions of the Site as indicated in the report. During the site reconnaissance, cars were parked in almost all parking spaces within the Site and is noted as a limitation.

As part of this assessment, Matrix submitted requests for information via the Freedom of Information Law (FOIL) to various governmental agencies. As of the preparation of this report, these requests have not been entirely fulfilled. The conclusions of this report are subject to change upon receipt of a response from these FOIL requests.

Mold, indoor air quality, asbestos, and lead-based paint surveys are excluded from the scope of this report.

2.5 Special Terms and Conditions

There are no special terms or conditions to the content of the report that are in addition to the scope outlined in Section 2.2.

2.6 User Reliance

This Phase I ESA was performed at the client's request utilizing a format consistent with the table of contents and report format specified in ASTM E 1527-13 Appendix X4.

This assessment is intended, where applicable to the standard of care, to satisfy the requirements of the ASTM Standard Practice for Environmental Site Assessments, as published in ASTM E1527-13. The independent conclusions represent the best professional judgment of the Environmental Professional based on the conditions that existed and the information and data available to Matrix during the course of this assignment. Factual information regarding operations and conditions provided by the Client, owner, or the representative has been assumed to be correct and complete. The report may be distributed and relied upon by MTA, LIRR, and JV. Reliance on the information and conclusions presented in this report by other party(ies) is not authorized by Matrix, unless specifically stated.

3.0 SITE DESCRIPTION

On March 6, 2017, Jordan Farber, Environmental Scientist of Matrix, conducted a site reconnaissance to evaluate current land usage and identify any RECs that may be present throughout accessible portions of the Site and surrounding areas. Appendix B contains photographs taken during the site reconnaissance.

3.1 Location and Legal Description

The Site is located at Railroad Avenue in the Village of Westbury, Nassau County, New York; however, no block and lots are identified with the Site. The Site consists of one large parking lot.

The Site consists of approximately 2.19 acres (95,193 square feet). The Site is geographically located at 40° 45' 10.94" north latitude and 73° 35' 10.12" west longitude of the Hicksville, New York, U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle. A Regional Location Map and Topographic Map depicting the Site are presented as Figures 1 and 2, respectively. While a Tax Map is presented as Figure 3, there are no block or lot designations shown for the Site, nor were any provided by the JV. A Site Plan map is presented as Figure 4.

3.2 Site General Characteristics

The entirety of the Site is used as a parking lot.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Topography		
Elevation (above mean sea level)	USGS topographic map (Hicksville, New York, 2013); Google Earth	Ranges from approximately 101 feet at the northeast corner to 92 feet at the southwest property boundary. The average throughout the Site is 97 to 98 feet above mean sea level (amsl).
Topographic Gradient	USGS topographic map; visual observations	Relatively flat on-site, with a gentle downward slope to the southwest. Regional topography slopes gently downward to the south/southwest toward various Bays and outlets into the Atlantic Ocean.
Hydrology		
Surface Water Runoff	Visual observations	Percolates into the ground surface at unpaved areas or enters catch basins located within lot drive lines and discharge to the municipal storm sewer system.
Nearest Surface Water Body to the Site	Google Earth; Visual observations	Old Westbury Pond, located approximately 1.93 miles to the north at its nearest point. Larger bodies of water, and eventually the Atlantic Ocean, are located to the far south of the Site.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Flood Plain	FEMA*	Facility personnel reported no known occurrences of flooding at the site. The site is not located within a 500-year flood zone. The FEMA Flood Insurance Rate Map (FIRM) is included in Appendix K.
Wetlands	NWI*; Visual observations	There are no federally-designated wetlands on-site, and Matrix did not identify any obvious suspected wetlands at the site during the site visit.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	USGS topographic map	Based on the topographic gradient and the relative direction of the Atlantic Ocean, shallow groundwater likely flows to the south/southwest.
Depth to Groundwater	USGS; EDR database report	The groundwater is expected to be between 21 to 30 feet below ground surface, per the USGS Long Island Depth to Water Viewer[1]. An EDR database listing for a site just northwest of the facility (123 Post Avenue) indicates the depth to groundwater is approximately 35 feet below grade and groundwater flows to the south/southwest.
On-Site Wells	Visual observations	LIRR notified Matrix that there is one monitoring well in the northwest portion of the Site. This well was not visible during the Site reconnaissance visit, and was likely covered by a parked car. LIRR Corporate Safety – Environmental Planning and Compliance Group has no record of wells at the site or knowledge of its purpose or date of installation, but is presumed to be for monitoring an off-site groundwater plume. It is likely this well is part of the monitoring network for a known groundwater plume extending off-site from 123 Post Ave., northwest of the Site. There are no production or injection wells on-Site.
Nearest Groundwater Supply Wells	EDR database report	There are no federally registered public groundwater supply wells within a one-mile radius of the Site.
Geologic Conditions	NCSS*; USDA NRCS WSS	Regional soils are mainly identified as Urban land, with about 35% of the Site identified as Hempstead silt loam.
Site Utility Information		
Heating and Cooling Equipment	Visual observations	There are no interior areas and thus no heating or cooling equipment associated with the Site.
Electricity Supplier	Visual observations	Long Island Power Authority (LIPA)
Natural Gas Supplier	Visual observations	There is no natural gas service at the site.
Use of Fuel Oil for Building Heat	Facility personnel	No current or former use of fuel oil reported.
Water Supplier	Visual observations	The Site is not serviced with water.

Table 1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Sanitary Sewer	Visual observations	There are no sanitary sewers onsite. There are sanitary sewers along Railroad Avenue, south of the Site. Sanitary waste is handled by Nassau County Sewage Disposal District #3.
Stormwater System	Visual observations	Stormwater collection systems were observed throughout the Site and route through the drive lanes of the parking lot. Stormwater is handled by Nassau County Sewage Disposal District #3.
Septic Systems	Facility personnel	No current or former septic systems reported.
Notes: FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey; NWI = National Wetlands Inventory; USDA NRCS WSS = United States Department of Agriculture Natural Resources Conservation Service Web Soil Survey * - Source was provided in the EDR database report. 1 - https://ny.water.usgs.gov/maps/li-dtw10/		

3.3 Current Use of the Property

The Site is currently owned by the MTA and is currently occupied by a parking lot operated by PSP.

3.4 Description of Structures, Roads, Other Improvements On-Site

The Site consists of an asphalt-paved parking lot surrounded by sidewalk improvements.

3.5 Current Uses of the Adjoining Properties

The property is located in a mixed industrial/residential/commercial land use area. The nearest residential area is The Bristal Assisted Living at Westbury located approximately 110 feet west/southwest of the site. Based on discussions with facility personnel, Matrix's visual observations from the property boundary and public rights-of-way, and a limited review of publicly available information, a general determination of the current use of adjacent properties was developed, as described in Table 2.

Table 2: Current Use of Adjacent Properties		
Direction	**Property/Land Use**	**Matrix's Observations**
North	LIRR Westbury Station, beyond which is Union Avenue.	No concerns, other than potential hazards from railroad activities, are presumed to be associated with this area.

Table 2: Current Use of Adjacent Properties		
Direction	**Property/Land Use**	**Matrix's Observations**
East	StorQuest self-storage building and associated parking lot.	No concerns are presumed to be associated with this area.
South	Railroad Avenue, beyond which is Holy Rood Cemetery.	No concerns are presumed to be associated with this area.
West	Post Avenue, beyond which is the LIRR and the Bristal Assisted Living at Westbury.	No concerns are presumed to be associated with this area.
Notes: During the site visit, Matrix walked or drove by the borders of these properties that are shared with the subject site. Matrix did not enter the neighboring properties.		

3.6 Reason for Performing Phase I

Matrix was retained by the JV to perform a Phase I ESA as part of a due diligence evaluation prior to property acquisition.

3.7 Other

No additional information regarding the Site was provided.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

A regulatory review of the Site and surrounding area was conducted through a search by EDR dated March 1, 2017. The review included inquiries into databases maintained by USEPA, as well as state agencies. A brief description of each database and the search results obtained during the Phase I ESA is presented below. The EDR Radius Map Report in its entirety is attached as Appendix A. The search was conducted in general accordance with ASTM E 1527-13 standards. The Site was not identified on any databases searched by EDR.

DATABASE SEARCH SUMMARY

1. Superfund Enterprise Management System (SEMS): SEMS tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive

Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. The SEMS database is administered by the EPA.

The Site was not identified on the SEMS database.

One SEMS facility, Bartlett Tree Company, was identified within a ⅛-mile radius of the Site. Bartlett Tree Company (EPA ID# NY0001408749) is located at 345 Union Avenue, 0.034 miles from the Site, and is at a higher elevation relative to the Site. According to information gathered under the State Hazardous Waste Site database (described below), this facility has been remediated. Based on this information, there is limited potential for impact to the Site from this SEMS facility. No SEMS facilities were identified beyond a ⅛-mile radius of the Site. The SEMS data was last updated on October 10, 2016 (EDR Inc., 2017).

2. Corrective Action Report (CORRACTS): CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. The CORRACTS database is administered by the EPA.

   The Site was not identified on the CORRACTS database.

   No facilities were identified within a ⅛-mile radius of the Site. One CORRACTS facility, Vishay General Semiconductor Inc., was identified between a ⅛-mile and ¼-mile radius from the Site. Vishay General Semiconductor Inc. (EPA ID# NYD000348474) is located at 172 Spruce Street, 0.214 miles from the Site, and is at a higher elevation relative to the Site. Based on this information, there is limited potential for impact to the Site from this CORRACTS facility. The CORRACTS data was last updated on December 12, 2016 (EDR Inc., 2017).

3. Resource Conservation and Recovery Act (RCRA) - Small Quantity Generators (SQG): The RCRA-SQG database is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. The RCRA-SQG database is administered by the EPA.

   The Site was not identified on the RCRA-SQG database.

   No facilities were identified within a ⅛-mile radius of the Site. One RCRA-SQG facility, Westbury Quality D-C Inc., was identified between a ⅛-mile and ¼-mile radius from the Site. Westbury Quality D-C Inc. (EPA ID# NYD981486350) is located at 179A School Street, 0.245 miles from the Site, and is at a higher elevation relative to the Site. Westbury Quality D-C Inc. is identified as a historical generator of chromium waste (D007), lead waste (D008), tetrachloroethylene waste (D039), trichloroethylene waste (D040), and other spent halogenated solvents (F002). Additionally, no violations were found. Based on this information there is limited potential for impact to the Site from this RCRA-SQG facility. The RCRA-SQG data was last updated on December 12, 2016 (EDR Inc., 2017).

4. Resource Conservation and Recovery Act (RCRA)-Conditionally Exempt Small Quantity Generator (CESQG): The RCRA-CESQG database is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg

of hazardous waste, or less than 1 kg of acutely hazardous waste per month. The RCRA-CESQG database is administered by the EPA.

The Site was not identified on the RCRA-CESQG database.

Two RCRA-CESQG facilities were identified within a ⅛-mile radius of the Site:

- New York Telephone Co. (EPA ID# NYD987030582) is located on Railroad Avenue, mapped by EDR at the border of Post Ave and the Site. This listing may be a mapping error or else may be a telephone pole or vault in the street. New York Telephone Co. is identified as a historical generator of ignitable waste (D001), corrosive waste (D002), benzene waste (D018), and tetrachloroethylene waste (D039). No violations were found in connection with this facility. Based on this information there is potential for impact to the Site from this RCRA-CESQG facility. Due to the lack of a reliable street address and given the listings on multiple databases, this facility is considered an other finding as defined by Matrix.
- Len-Tone Auto Inc. (EPA ID# NYD982742579) is located at 401 Railroad Avenue, 0.040 miles from the Site, and at a higher elevation relative to the Site. Len-Tone Auto Inc. is identified as a historical generator of ignitable waste (D001), methyl ethyl ketone waste (D035), and other spent nonhalogenated solvents (F003 and F005). No violations were found in connection with this facility. Based on this information there is potential for impact to the Site from this RCRA-CESQG facility.

Two RCRA-CESQG facilities were identified between a ⅛-mile and ¼-mile radius from the Site. Based on this information there is limited potential for impact to the Site from these RCRA-CESQG facility. The RCRA-CESQG data was last updated on December 12, 2016 (EDR Inc., 2017).

State Records

5. New York State Hazardous Waste Site (NY SHWS): The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the NYSDEC's Inactive Hazardous Waste Disposal Sites in New York State.

   The Site was not identified on the NY SHWS database.

   Two NY SHWS facilities were identified within a ⅛-mile radius of the Site:

   - 123 Post Avenue is 0.030 miles from the Site, and at a higher elevation relative to the Site. The hazardous waste identified with the facility include tetrachloroethylene (PCE; F002), 1,1-dichloroethene, 1,1,2-trichloroethane, dichloroethylene, and trichloroethene (TCE). This facility has known soil, groundwater, soil vapor, and indoor air contamination and is listed on the registry of inactive hazardous waste disposal sites as a Class 2 site, representing a significant threat to human health and the environment. The description given of the facility in the database listing includes the following information:
     - The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2).
     - The depth to water is approximately 35 feet and flows to the south-south west.
     - The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.

   This facility is also listed on the NY DRYCLEANERs database. Based on this information and the proximity to the Site, there is potential for impact to the Site from this NY SHWS facility.

- The second identified NY SHWS facility is Bartlett Tree Company (EPA ID# NY0001408749), located at 345 Union Avenue, 0.034 miles from the Site, and at a higher elevation relative to the Site. The hazardous waste identified with the facility includes the pesticides chlordane, DDD, DDE, lindane, DDT, dieldrin, aldrin, and alpha-BHC. Soil and groundwater contamination were detected and have been remediated. This facility has been properly closed and requires continued management. Therefore, there is no potential for impact to the Site from this NY SHWS facility.

Based on this information there is limited potential for impact to the Site from this NY SHWS facility. No NY SHWS facilities were identified beyond a ⅛-mile radius of the Site. The NY SHWS data was last updated on November 14, 2016 (EDR Inc., 2017).

6. New York Sold Waste Facilities/Landfill (NY SWF/LF) Sites: SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The SWF/LF database is administered by the NYSDEC.

   The Site was not identified on the NY SWF/LF database.

   No NY SWF/LF facilities were identified within a ⅛-mile radius of the Site. Two NY SWF/LF facilities were identified beyond a ⅛-mile radius of the Site. Based on this information there is limited potential for impact to the Site from these NY SWF/LF facilities. The NY SWF/LF data was last updated on January 4, 2017 (EDR Inc., 2017).

7. New York Leaking Storage Tanks (NY LTANKS): These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. The NY LTANKS database is administered by the NYSDEC.

   The Site was not identified on the NY LTANKS database.

   The following two NY LTANKS facilities were identified within a ⅛-mile radius of the Site, all with tanks associated with petroleum products:
   - Union Oil, located at 333 Union Avenue, 0.035 miles from the Site, and at a higher elevation relative to the Site; 3,000-gallon unleaded gasoline tank; spill #8801831 occurred 05/27/1988 due to tank test failure and the spill was closed on 06/14/1988. This facility is also listed on the UST and NY Spills databases. The LTANKS record indicates that the NYSDEC file has been destroyed. This facility is not considered a REC due to the closed status of the spill but is considered an other finding as defined by Matrix due the multiple listings and upgradient proximity to the site.
   - Medical Repair Lab, located at 141 Linden Avenue, 0.093 miles from the Site, and at a higher elevation relative to the Site; #2 fuel oil tank; a spill of one gallon occurred 03/15/1995 due to tank overfill. The spill was closed 03/16/1995. Due to the distance from the site, the quantity of the spill and the closed status of the spill, the listing is of limited concern to the Site and is not considered a REC.

   Twenty-four NY LTANKS facilities were identified beyond a ⅛-mile radius of the Site. Based on their distance from the Site, there is limited potential for impact to the Site from these NY LTANKS facilities. The NY LTANKS data was last updated on February 6, 2017 (EDR Inc., 2017).

8. New York Underground Storage Tank (NY UST): The NY UST database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

   The Site was not identified on the NY UST database.

   The following four NY UST facilities were identified within a ⅛-mile radius of the Site:
   - Union Oil Co., located at 333 Union Avenue, 0.035 miles from the Site, and at a higher elevation relative to the Site; UST removed.
     - The site was noted on LTANKS and NY SPILLS for two historical spill cases. Both cases are closed and the site is not considered a REC but is considered an other finding as defined by Matrix due the multiple listings and upgradient proximity to the site.
   - Auto Tique II, located at 401 Railroad Avenue, 0.040 miles from the Site, and at a higher elevation relative to the Site; UST active. The property was historically known as Len-Tone Auto Inc., a historic generator of several hazardous wastes. Based on this information there is potential for impact to the Site from this RCRA-CESQG facility. Based on this listing and its listing on other databases described in this section, this facility is considered a REC.
   - Westbury Terrace Condo., located at 135 Post Avenue, 0.048 miles from the Site, and at a higher elevation relative to the Site; UST active. Based on this information, there is potential for impact to the site should a release occur.
   - Horizon at Westbury, located 130 Post Avenue, 0.078 miles from the Site, and at a higher elevation relative to the Site; UST removed. Based on this information, there is potential for impact to the site should a release have occurred.

   Seven NY UST facilities were identified beyond a ⅛-mile radius of the Site and based on their relative distances from the Site, there is limited potential for impact to the Site. The NY UST data was last updated on December 28, 2016 (EDR Inc., 2017).

9. New York Aboveground Storage Tank (NY AST): The NY AST database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

   The Site was not identified on the NY AST database.

   One NY AST facility, The Bristal Assisted Living, was identified within a ⅛-mile radius of the Site. The Bristal Assisted Living is located at 117 Post Avenue, 0.041 miles from the Site, and is at a higher elevation relative to the Site. There are no spills or other listings associated with this facility. Based on this information there is limited potential for impact to the Site from this NY AST facility.

   Six NY AST facilities were identified beyond a ⅛-mile radius of the Site. The NY AST data was last updated on December 28, 2016 (EDR Inc., 2017).

10. New York Environmental Restoration Program (NY ERP): Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities for sites with histories of environmental contamination. Once remediated, the property may then be reused for commercial, industrial, residential, or public use. The NY ERP database is administered by the NYSDEC.

    The Site was not identified on the NY ERP database.

No NY ERP facilities were identified within a ⅛-mile radius of the Site. One NY ERP facility, Sammy's Getty Station, was identified between a ⅛-mile and ¼-mile radius of the Site. Sammy's Getty Station is located at 200 Post Avenue, 0.207 miles from the Site, and is at a higher elevation relative to the Site. Based on the distance from the Site, there is limited potential for impact to the Site from this NY ERP facility. The NY ERP data was last updated on November 14, 2016 (EDR Inc., 2017).

Other Ascertainable Records

11. US BROWNFIELDS: The US BROWNFIELDS database is a listing of Brownfields sites. Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. The US BROWNFIELDS database is administered by the EPA.

    The Site was not identified on the US BROWNFIELDS database.

    No US BROWNFIELDS facilities were identified within a ⅛-mile radius of the Site. Three US BROWNFIELDS facilities were identified beyond a ⅛-mile radius of the Site. Based on this information there is limited potential for impact to the Site from these US BROWNFIELDS facilities. The US BROWNFIELDS data was last updated on December 19, 2016 (EDR Inc., 2017).

12. NY SPILLS: NY SPILLS is a spills information database. Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date. The NY SPILLS database is administered by the NYSDEC.

    The Site was not identified on the NY SPILLS database.

    The following fourteen NY SPILLS facilities were identified within a ⅛-mile radius of the Site, all at a higher elevation relative to the Site:

    - New York Telephone Co. located on Railroad Avenue, mapped by EDR at the border of Post Ave and the Site. This listing may be a mapping error or else may be a telephone pole or vault in the street. New York Telephone Co. had three spill cases:
        - hydraulic oil, spill number 9714393, closed 07/14/1998;
        - diesel, kerosene, and gasoline, spill number 9602605, closed 04/10/1997;
        - hydraulic oil and waste oil/used oil, spill number 9404236, closed 05/20/1997.

      This listing appears to be a mapping error, based on an associated address of 15 Ave C and database results that are not consistent with the known history of the area. Based on the lack of a reliable street address and given the listings on multiple databases, this facility is considered an other finding as defined by Matrix.
    - Auto Body Shop located on Railroad Avenue, mapped adjacent to the southwestern portion of the Site; motor oil and antifreeze, spill number 0610023, closed 02/27/2007. While adjacent to the Site, the spill report indicates the release was during roadside work, with the release to the sewer due to poor housekeeping and is not considered a REC.

- Manhole 16504 located on Railroad Avenue, 0.0002 miles southwest of the Site, at a higher elevation relative to the Site; cable oil, spill number 0005401, closed 08/11/2001. Though adjacent to the Site, due to the spill being closed this spill is not considered a REC.
- Lilco located at Railroad Avenue and Post Avenue, 0.003 miles west/southwest of the Site, at a higher elevation relative to the Site; non-PCB oil, spill number 8703372, closed 07/30/1987. Though adjacent to the Site, due to the spill being closed this spill is not considered a REC.
- Cruz Property located at Post Avenue and Railroad Avenue, 0.004 miles west/southwest of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 0551668, closed 12/01/2011. The spill report indicates the source was a private dwelling and may be a mapping error in the report, as there are no residences within 200 feet of the mapped spill location.
- Site named "Under Throgs Neck Bridge" and located Post Avenue and Railroad Avenue, 0.006 west/southwest of the Site, at a higher elevation relative to the Site; unknown petroleum, spill number 0003912, closed 10/31/2003. This spill report lists the site name as "Under Throgs Neck Bridge" at 12th Ave, Throgs Neck Bridge, which is not in the area of the site and believed to be a mapping error.
- Located at Post Avenue and Railroad Avenue, 0.014 miles southwest of the Site, at a higher elevation relative to the Site; transformer oil, spill number 0402812, closed 10/26/2010. The spill report indicates a spill from a LIPA transformer due to a vehicle accident that brought down a telephone pole. The spill was closed and is not considered a REC.
- Castle Industries Inc. located at 349A Union Avenue, 0.021 miles north/northeast of the Site, at a higher elevation relative to the Site; spill number 0485158, closed 04/12/2005. Based on the closed status of the spill, this facility is not considered a REC.
- Union Oil located at 333 Union Avenue, 0.035 miles north/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number #8801206, spill occurred 05/07/1988; closed 10/14/2011. The spill occurred when three 50,000 and five 20,000 gallon USTs were being abandoned. The record notes indicate that wells were being installed in 1988. Based on the closed status of the spill, this facility is not considered a REC.
- Hicks Fuel Co. located at 117 Post Avenue, 0.041 miles west/southwest of the Site, at a higher elevation relative to the Site; diesel (20 gallons), spill number 8807153, closed 12/01/1988. Based on the closed status of the spill, this facility is not considered a REC.
- Stewart Taxi located at 371 Union Avenue, 0.055 miles northeast of the Site, at a higher elevation relative to the Site; waste oil/used oil, spill number 9406696, closed 05/08/1997. Based on the closed status of the spill, this facility is not considered a REC.
- Associated Fabrication located at 415 Railroad Avenue, 0.079 miles east/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 9400101, closed 09/29/1995. Based on the closed status of the spill, this facility is not considered a REC.
- Senator Printing Corp. located at 134 Linden Avenue, 0.086 miles northeast of the Site, at a higher elevation relative to the Site; unknown petroleum, spill number 9213989, closed 04/25/1995. Based on the closed status of the spill, this facility is not considered a REC.
- Josa Pal Associates located at 357 Scally Place, 0.104 miles north/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 1109370, closed 12/02/2011. Based on the closed status of the spill, this facility is not considered a REC.

These 14 spills facility listings have all been closed to the satisfaction of NYSDEC. Based on this information there is limited potential for impact to the Site from these NY SPILLS facilities. The NY SPILLS data was last updated on February 6, 2017 (EDR Inc., 2017).

13. Resource Conservation and Recovery Act (RCRA) Non-Generators / No Longer Regulated (NonGen / NLR): RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste

Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. The RCRA NonGen / NLR database is administered by the EPA.

The Site was not identified on the RCRA NonGen / NLR database.

The following three RCRA NonGen / NLR facilities were identified within a ⅛-mile radius of the Site:

- Jolea Ent LTD DBA Westbury Valet (EPA ID# NYD121843098), located at 123 Post Avenue, 0.030 miles from the Site, and at a higher elevation relative to the Site; according to the 12/24/1985 report, the facility was historically associated with a large quantity generator with associated waste code F002 (spent halogenated solvents), and since the 02/29/1996 report, the facility has not been associated with a generator.
- Bartlett Tree Company (EPA ID# NY0001408749), located at 345 Union Avenue, 0.034 miles from the Site, and at a higher elevation relative to the Site; historically a large quantity generator with waste codes P037 (dieldrin), P051 (endrin), U060 (DDD), U061 (DDT), and U129 (lindane).
- Senator Printing Corp. (EPA ID# NYD002057974), located at 134 Linden Avenue, 0.086 miles from the Site, and at a lower elevation relative to the Site; not a historical generator.

Based on this information there is limited potential for impact to the Site from these RCRA NonGen / NLR facilities. Six RCRA NonGen / NLR facilities were identified beyond a ⅛-mile radius of the Site. Based on their distance from the Site, these facilities have limited potential for impact to the Site. The RCRA NonGen / NLR data was last updated on December 12, 2016 (EDR Inc., 2017).

14. Formerly Used Defense Sites (FUDS): The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. The FUDS database is administered by the U.S. Army Corps of Engineers.

    The Site was not identified on the FUDS database.

    No FUDS facilities were identified within a ⅛-mile radius of the Site. One FUDS facility was identified 0.668 miles from the Site. Based on this information there is limited potential for impact to the Site from this FUDS facility. The FUDS data was last updated on January 31, 2015 (EDR Inc., 2017).

15. Unexploded Ordnance (UXO) Sites: The UXO database is a listing of unexploded ordnance site locations. The UXO database is administered by the Department of Defense.

    The Site was not identified on the UXO database.

    No UXO facilities were identified within a ⅛-mile radius of the Site. One UXO facility was identified 0.668 miles from the Site. Based on this information there is limited potential for impact to the Site from this UXO facility. The UXO data was last updated on October 25, 2016 (EDR Inc., 2017).

16. NY DRYCLEANERS: The NY DRYCLEANERS database is a listing of all registered dry-cleaning facilities. The NY DRYCLEANERS is administered by the NYSDEC.

    The Site was not identified on the NY DRYCLEANERS database.

    One NY DRYCLEANERS facility, Westbury Valet/Top Cleaners, was identified within a ⅛-mile radius of the Site. Westbury Valet/Top Cleaners is located at 123 Post Avenue, 0.030 miles from the Site, and at a

higher elevation relative to the Site. Based on this information there is potential for impact to the Site from this NY DRYCLEANERS facility. Another NY DRYCLEANERS facility, Quality Cleaner of Westbury, was identified 0.238 miles from the Site. The NY DRYCLEANERS data was last updated on October 27, 2016 (EDR Inc., 2017).

17. NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a Treatment, Storage, and Disposal (TSD) facility. The NY MANIFEST database is administered by the NYSDEC.

    The Site was not identified on the NY MANIFEST database.

    The following five NY MANIFEST facilities were identified within a ⅛-mile radius of the Site.
    - New York Telephone Co. (EPA ID# NYD987030582), located on Railroad Avenue, 0.0002 miles southwest of the Site, at a higher elevation relative to the Site.
    - Westbury Valet/Top Cleaners (EPA ID# NYD013374129), located at 123 Post Avenue, 0.030 miles west of the Site, at a higher elevation relative to the Site.
    - Bartlett Tree Company (EPA ID# NY0001408749), located at 345 Union Avenue, 0.034 miles north/northeast of the Site, at a higher elevation relative to the Site.
    - Len-tone Auto Inc. (EPA ID# NYD982742579), located at 401 Railroad Avenue, 0.040 east/northeast of the Site, at a higher elevation relative to the Site.
    - Senator Printing Corp. (EPA ID# NYD002057974), located 134 Linden Avenue, 0.086 miles northeast of the Site, at a higher elevation relative to the Site.

    There is potential for impact to the Site from the Westbury Valet/Top Cleaners facility, which is listed on multiple other databases and is considered a REC. The other NY MANIFEST facilities have limited potential for impact to the Site. Nine NY MANIFEST facilities were identified beyond a ⅛-mile radius of the Site. There is limited potential for impact to the Site from these NY MANIFEST facilities. The NY MANIFEST data was last updated on January 30, 2017 (EDR Inc., 2017).

18. RI MANIFEST: The RI MANIFEST database provides hazardous waste manifest information. The RI MANIFEST database is administered by the Rhode Island Department of Environmental Management.

    The Site was not identified on the RI MANIFEST database.

    No RI MANIFEST facilities were identified within a ⅛-mile radius of the Site. One RI MANIFEST facility, Westbury Quality D-C Inc., was identified 0.245 miles from the Site. There is limited potential of impact to the Site from this RI MANIFEST facility. The RI MANIFEST was last updated on December 31, 2013 (EDR Inc., 2017).

19. PA MANIFEST: The PA MANIFEST database provides hazardous waste manifest information. The PA MANIFEST database is administered by the Pennsylvania DEP.

    The Site was not identified on the PA MANIFEST database.

    No PA MANIFEST facilities were identified within a ⅛-mile radius of the Site. One PA MANIFEST facility, Rite Aid 4768, was identified 0.212 miles from the Site. There is limited potential for impact to the Site from this PA MANIFEST. The PA MANIFEST data was last updated on December 31, 2015 (EDR Inc., 2017).

20. NJ MANIFEST: The NJ MANIFEST database provides hazardous waste manifest information. The NJ MANIFEST database is administered by the New Jersey DEP.

    The Site was not identified on the NJ MANIFEST database.

    Two NJ MANIFEST facilities were identified within a ⅛-mile radius of the Site. Bartlett Tree Company (EPA ID# NY0001408749) is located at 345 Union Avenue, 0.034 miles from the Site, and at a higher elevation relative to the Site, and is associated with waste codes U060 and U061. Len-Tone Auto Inc. (EPA ID# NYD982742579) is located at 401 Railroad Avenue, 0.040 miles from the Site, and at a higher elevation relative to the Site, and is associated with waste code F003. Based on this information there is limited potential for impact to the Site from these NJ MANIFEST facilities. One NJ MANIFEST facility, Vishay General Semiconductor Inc. (EPA ID# NYD000348474), was identified 0.214 miles from the Site, and associated with waste code D002. There is limited potential for impact to the Site from this NJ MANIFEST Facility. The NJ MANIFEST data last updated on December 31, 2015 (EDR Inc., 2017).

21. EDR Hist Auto: The EDR Hist Auto database is EDR's list of historic gas stations. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches. The EDR Hist Auto database is administered by EDR, Inc.

    The Site was not identified on the EDR Hist Auto database.

    Five EDR Hist Auto facilities were identified within a ⅛-mile radius of the Site, all at higher elevations relative to the Site. Of these, three were located within 0.1 miles from the Site, as follows:
    - 401 Railroad Avenue, 0.040 miles from the Site, at a higher elevation relative to the Site.
    - 415 Railroad Avenue, 0.079 miles from the Site, at a higher elevation relative to the Site.
    - 150 Linden Avenue, 0.099 miles from the Site, at a higher elevation relative to the Site.

    Based on this information there is potential for impact to the Site from these EDR Hist Auto facilities should a spill/release have occurred.

    No EDR Hist Auto facilities were identified beyond a ⅛-mile radius of the Site. The EDR Hist Auto data is updated internally by EDR, Inc.

22. EDR Hist Cleaner: The EDR Hist Cleaner data is EDR's list of exclusive historic dry cleaners. EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches. The EDR Hist Cleaner database is administered by EDR, Inc.

    The Site was not identified on the EDR Hist Cleaner database.

One EDR Hist Cleaner facility was identified within a ⅛-mile radius of the Site, located at 123 Post Avenue, 0.030 miles from the Site, and at a higher elevation relative to the Site. This site was also identified on the NY DRYCLEANERS database as Westbury Valet/Top Cleaners and is currently operating. Based on this information there is potential for impact to the Site from this EDR Hist Cleaner facility. No EDR Hist Cleaner facilities were identified beyond a ⅛-mile radius of the Site. The EDR Hist Cleaner data is updated internally by EDR, Inc.

Additional Records

23. Orphan Sites: The EDR Report also identifies "Orphan Sites" which are sites identified on the EDR database but, due to poor or inadequate address information, their locations relative to the Site could not be mapped. One "Orphan Site" was identified in the EDR Radius Map Report. It does not appear that the "Orphan Site" is located immediately adjacent to the Site (EDR Inc., 2017).

4.2 Additional Environmental Record Sources

Matrix contacted the USEPA, NYSDEC, Nassau County Clerk and Fire Department, and Municipal Clerk regarding environmental files for the Site. Copies of FOIL requests and responses are provided in Appendix C.

Responses from all agencies requested have not been received at this time. Responses were received from NYSDEC, which produce no records, and Nassau County, which did not provide any available documents.

In addition, Matrix reviewed EPA's Envirofacts for a list of EPA-regulated facilities and identified the following information:

- Bartlett Tree Company (EPA Registry ID# 110009324267), located at 345 Union Avenue, is listed under SEMS as a superfund (non-NPL) facility and under RCRAINFO as an unspecified universe.
- Glen Oaks Club (EPA Registry ID# 110004444218), located at 175 Post Avenue, is listed under RCRAINFO as a CESQG facility.
- J & J Auto Truck Repair (EPA Registry ID# 110004480044), located at 135 Sullivan Lane, is listed under RCRAINFO as an unspecified universe.
- Jolea Ent. Ltd. Dba. Westbury Valet (EPA Registry ID# 110008008967), located at 123 Post Avenue, is listed under RCRAINFO as an unspecified universe.
- Len-Tone Auto Inc. (EPA Registry ID# 110004432276), located at 401 Railroad Avenue, is listed under RCRAINFO as a CESQG facility.
- Senator Printing Corp. (EPA Registry ID# 110004337708), located at 134 Linden Avenue, is listed under RCRAINFO as an unspecified universe.
- Westbury Top Cleaners Inc. (EPA Registry ID# 110042087764), located at Post Avenue, is listed under RCRAINFO as a CESQG facility and under AIRS/AFS as an air minor (operating) facility.

A copy of the EPA's Envirofacts online records are provided in Appendix I.

4.3 Historical Use Information on the Property and Surrounding Properties

4.3.1 Sanborn Maps

A search was made through EDR for historical Sanborn Fire Insurance (Sanborn) maps for the Site. Fire insurance maps were initially produced by private companies for the insurance industry to provide information on fire risks to buildings and other structures. Fire insurance maps serve as an historical resource for evaluating the potential for site contamination based on history of past use. As a result of the search, Sanborn maps for the years 1910, 1920, 1929, 1941 and 1968 were available for the surrounding area, however the Site wasn't included on the maps. Significant features of the surrounding area for each map are described below. A copy of the Sanborn Map Report is included in Appendix D.

1910 Sanborn Map

The 1910 Sanborn map indicates that the Site appears to be unmapped. The map also lacks information to the east, west, and south; however, it appears that Post Avenue runs to the west of the Site. The LIRR is located to the immediately to the north with three small structures, including a baggage area and section house. Westbury Station and Railroad Avenue lie further north, and beyond Railroad Avenue are various structures including three hotels, a livery, and a wagon works and auto repair shop.

1920 Sanborn Map

The 1920 Sanborn map still lacks information for the Site, as well as the land to the east and south of the Site. The surrounding area consists of Post Avenue to the immediate west with a coal yard (Isaac Hicks & Sons Westbury Coal Yard), auto repair shop, and various other commercial shops further west. The coal yard has an on-site warehouse, described as housing lime, cement, and building materials. The LIRR and three LIRR depot buildings lie to the immediate north of the Site, followed by Railroad Avenue and then various structures including dwellings, two hotels, multiple auto repair and machine shops, and the A. Barney Livery. The wagon works and auto repair shop is no longer shown, replaced by C. Christ Wheelwright. To the northeast of the Site, across Railroad Avenue, is a garage and a 250-gallon gasoline underground storage tank (UST).

1929 Sanborn Map

The 1929 Sanborn map still lacks information for the Site. A stairway to the LIRR was added. The roadway to the north of the Site, previously identified as Railroad Avenue, now identifies as Union Avenue, and a new roadway exists to the immediate south of the Site and is identified as Railroad Avenue. The three LIRR structures to the north of the property are identified as the LIRR station, waiting room, and platform and express office. North and northeast of the Site, beyond Union Avenue, is occupied by a contractor's yard, C. Christ, Wagon Works & Auto Repairs, and the previously mentioned garage; however, the 250-gallon UST is no longer depicted on the map.

The Westbury Hotel, north/northeast of the Site, is now listed as closed, and the aforementioned A. Barney Livery is now labeled as the A. Barney Taxi Service. No other significant changes have occurred to the surrounding area since the 1920 Sanborn map.

1941 Sanborn Map

The 1941 Sanborn map still lacks information for the Site. North of the Site, beyond Union Avenue, consists of one hotel, a vacant building, and a veterinary building, which has taken the place of the former A. Barney Taxi Service; the contractor's yard, auto repairs shop, and garage remain to the northeast, with the addition of the Union Coal Company now immediately adjacent to the east of the now named E. J. Christ, Wagon Works & Auto Repairs. The hotel directly north of the Site is no longer illustrated on the map, and the former Westbury Hotel, north/northeast of the Site, is now identified as Nino's Hotel. Further north of the Site, north of Nino's Hotel along Post Avenue, exists a filling station with two gasoline tanks. No other significant changes have occurred to the surrounding area since the 1929 Sanborn map.

1968 Sanborn Map

The 1968 Sanborn map still lacks information for the Site. The land to the south of the Site, beyond Railroad Avenue, is identified as a cemetery with a handwritten note, that appears to have been added after the map was completed. There is a dry cleaner to the immediate northwest, beyond the LIRR, while some of the land further northwest has become vacant. There are fuel oil tanks depicted on the Westbury Coal Yard property to the west. The gasoline tanks north of the Site are no longer shown, although the filling station remains, and the land adjacent to the filling station is identified as a parking lot. The previously vacant building north of the Site, immediately beyond Union Avenue, is now a tool designing company. The Union Coal Company, to the northeast of the Site, is now located in the area previously recognized as a contractor's yard, with various structures to the east of the coal yard designated as lumber yard. E. J. Christ, Wagon Works & Auto Repairs is no longer identified on the map. No other significant changes have occurred to the surrounding area since the 1941 Sanborn map.

4.3.2 Aerial Photographs

An inquiry was made with EDR to obtain historical aerial photographs for the Site. Additional aerial photographs were also obtained from NJDEP and historicaerials.com. Aerial photographs were reviewed for the years 1938, 1947, 1951, 1953, 1962, 1966, 1974, 1976, 1980, 1985, 1994, 2006, 2009 and 2011. These photographs were used to determine past land usage and major improvement to the Site and surrounding area. A copy of the Aerial Photograph Report is included in Appendix E.

1938 Aerial Photograph (1"=500' miles)

The 1938 aerial photograph indicates that the Site was used by the LIRR for the storage of railcars on rail siding, with a small roadway running through and leading to what appears to be a parking area outside of the property boundary. The surrounding area consists of a roadway to the west with small buildings/houses further west, a roadway to the immediate south with a cemetery to the south of the roadway, undeveloped land with two structures, most likely related to the LIRR, to the east of the Site, and the LIRR to the immediate north of the Site with a roadway further north and various structures beyond that.

1947 Aerial Photograph (1"=500' miles)

The 1947 aerial photograph indicates that no changes have occurred to the Site since the 1938 aerial photograph. To the north of the Site, beyond the LIRR and roadway, now exists a large parking lot with the adjacent land more developed. One of the two structures closer east of the Site appears to be downgraded to a very small structure, while the other building further east has become a larger structure. No other significant changes have occurred to the surrounding area since the 1938 aerial photograph.

1951 Aerial Photograph (1"=500' miles)

The 1951 aerial photograph indicates there is automobile parking on the western portion of the site. No other significant changes have occurred to the Site since the 1947 aerial photograph. The land north of the Site, beyond the roadway, appears to be further developed with larger structures eastbound and what appears to be commercial buildings and a second parking lot westbound. The structures to the east of the Site have become one larger structure, with the adjacent land remaining undeveloped. No other significant changes have occurred to the surrounding area since the 1947 aerial photograph.

1953 Aerial Photograph (1"=500' miles)

The 1953 aerial photograph indicates that the northwest and southeast portions of the Site continue to be used for parking. No other significant changes have occurred to the Site since the 1951 aerial photograph. A more developed parking area is now in place of the vacant land to the east of the Site and extends eastward surrounding the existing structure. No other significant changes have occurred to the surrounding area since the 1951 aerial photograph.

1962 Aerial Photograph (1"=500' miles)

The 1962 aerial photograph indicates that the Site is a fully developed parking lot and that the rail sidings have been removed. The two parking lots north of the Site, beyond the roadway, have expanded, and the structure east of the Site has expanded further east. A new building exists to the south of the Site, immediately beyond the

roadway and within property of the cemetery. No other significant changes have occurred to the surrounding area since the 1953 aerial photograph.

1966 Aerial Photograph (1"=500' miles)

The 1966 aerial photograph indicates that no significant changes have occurred to the Site since the 1962 aerial photograph. There are two new structures to the immediate east of the Site, one large building and one smaller building. No other significant changes have occurred to the surrounding area since the 1962 aerial photograph.

1974 Aerial Photograph (1"=500' miles)

The 1974 aerial photograph indicates that no significant changes have occurred to the Site since the 1966 aerial photograph. There is a new large structure to the northwest of the Site, which appears to be a hotel/condominium building based upon current observations. There has been further development of the property to the east of the Site, with the addition of two new buildings. No other significant changes have occurred to the surrounding area since the 1966 aerial photograph.

1976 Aerial Photograph (1"=500' miles)

The 1976 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1974 aerial photograph.

1980 Aerial Photograph (1"=500' miles)

The 1980 aerial photograph indicates that no significant changes have occurred to the Site since the 1976 aerial photograph. The smaller parking lot to the north of the Site, beyond the roadway, has expanded westward to the edge of Post Avenue, replacing the former filling station. No other significant changes have occurred to the surrounding area since the 1980 aerial photograph.

1985 Aerial Photograph (1"=500' miles)

The 1985 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1980 aerial photograph.

1994 Aerial Photograph (1"=500' miles)

The 1994 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1985 aerial photograph.

2006 Aerial Photograph (1"=500' miles)

The 2006 aerial photograph indicates that no significant changes have occurred to the Site since the 1994 aerial photograph. A large structure has been developed north of the Site immediately beyond the roadway, and appears to be another hotel/condominium building based upon current observations. The large parking lot adjacent to that building, north of the Site, has further expanded. To the west of the Site, immediately beyond the roadway, exists a large, newly developed building and associated parking lot. No other significant changes have occurred since the 1994 aerial photograph.

2009 Aerial Photograph (1"=500' miles)

The 2009 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 2006 aerial photograph.

2011 Aerial Photograph (1"=500' miles)

The 2011 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 2009 aerial photograph.

4.3.3 Historical Topographic Maps

An inquiry was made with EDR to obtain historical USGS topographic maps for the Site. Historical topographic maps were reviewed for the following quadrants and years: Hempstead and Oyster Bay, New York 1897, 1898, 1899, and 1900; Hempstead, New York 1903; Hicksville and Freeport, New York 1947, 1954, 1955, 1967, 1969, 1979, and 2013; and Freeport, New York 1994. No significant changes in elevation were noted. Copies of the historical topographic maps can be found in Appendix F.

1897 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1897 Hempstead and Oyster Bay Quadrant Topographic Map indicates that the Site appears to be undeveloped. The surrounding area consists of the LIRR to the immediate north, undeveloped land to the east and south, and small buildings to the northwest, west, and south west. There is also a roadway immediately west of the Site as well as immediately north of the LIRR.

1898 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1898 Hempstead and Oyster Bay Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1897 Hempstead and Oyster Bay Quadrant Topographic Map.

1899 and 1900 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1899 and 1900 Hempstead and Oyster Bay Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1898 Hempstead and Oyster Bay Quadrant Topographic Map.

1903 Hempstead Quadrant Topographic Map (1:62,500)

The 1903 Hempstead Quadrant Topographic Map is unmapped within the area of the Site and its surrounding properties.

1947 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1947 Hicksville and Freeport Quadrant Topographic Map indicates that the Site appears to contain railroad sidings, but is otherwise undeveloped. The surrounding area consists of the LIRR to the north beyond which is Union Avenue and then various areas developed with large and small buildings, two small structures to the east along with undeveloped land, a roadway to the south, now recognized as Railroad Avenue, beyond which is Holy Rood Cemetery, and Post Avenue to the west beyond which are small building developments. There is a pumping station far northwest of the Site.

1954 and 1955 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map indicates that the eastern portion of the Site has been improved with part of, what appears to be, a roadway. The former rail sidings on-Site are no longer illustrated. As for the surrounding area, the map illustrates only identified structures, including two schools northwest of the Site beyond Maple Avenue, one school to the east of the Site beyond School Street, and one school to the south of the Site west of the cemetery. There is also a water tower west of the previously identified pumping station.

1967 and 1969 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1967 and 1969 Hicksville and Freeport Quadrant Topographic Map indicates that no changes have occurred to the Site since the 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map. There are now two large structures and one small one to the east of the Site, and south of Holy Rood Cemetery, beyond Country Road, is a golf course. No other significant changes have occurred to the surrounding area since the 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map.

1979 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1979 Hicksville and Freeport Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1967 and 1969 Hicksville and Freeport Quadrant Topographic Map.

1994 Freeport Quadrant Topographic Map (1:62,500)

The 1994 Freeport Quadrant Topographic Map is unmapped within the area of the Site and its surrounding properties.

2013 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 2013 Hicksville and Freeport Quadrant Topographic Map shows no structural features nor any indication of the physical properties on-Site, though such features are no longer shown on USGS topographic maps unless they impact topography. Other sources documented that the Site consisted of a parking lot in 2013. The map illustrates no structures in close proximity to the Site other than a fire station north of the Site beyond Maple Avenue. No other significant changes have occurred to the Site or surrounding area since the 1979 Hicksville and Freeport Quadrant Topographic Map.

4.3.4 City Directory

City directories serve as a historical resource by listing the name of a resident or the name and type of a business at a particular address. A search was made by EDR for historical city directories of the Site and immediately adjacent properties. As a result of the search, the city directories were reviewed for the years 1973, 1978, 1983, 1988, 1992, 1995, 1999, 2003, 2008 and 2013. Sources of the reviewed city directories include Cole Information Services and Cole Criss-Cross Directory. A copy of the City Directory Abstract Report is included in Appendix G.

Based on a review of the City Directory Abstract, the Site, located at Railroad Avenue in the Village of Westbury, Nassau County, New York, and surrounding properties were identified in the EDR City Directory Abstract as further described below:

Address	Use	Year(s)
401 Railroad Avenue	Auto-Tique, Companions Plus, Rudco	2013
	Auto-Tique, Companions Plus, Lutz Plumbing & Heating Inc.	2008
	Michelle Frank Designs Ltd.	2003
	Auto-Tique, Investment Associates Inc., Michelle Frank Designs Ltd.	1999
	Auto-Tique, Investment Associates Inc.	1995
	Auto-Tique	1992
	Bogner Broadcast Eqp., Multitenna Crp. Amr.	1983

Address	Use	Year(s)
	Bogner Broadcast Eqp.	1978
	A&B Graphics Inc., Genrl. Hobbies Inc., Summa Systems Inc., Total Mailing Svce., Visual Dsgn. Grp.	1973
409 Railroad Avenue	Designs That Shine, Pelco Cabinet Corp.	2013
	Agos International Distributing Co., Pelco Cabinet Corp., Roberts Internet World Corp.	2008
	Agos International Distributing Co., MG English Restoration, Pelco Construction Inc.	2003
	Agos International Distributing Co., East Coast Bingo Corp., East Coast Wire Goods Inc.	1999
	Agos International Distributing Co., Fil-Coil Co. Inc.	1995
	Progressive Spply.	1978, 1983, 1988
	Kemode Mfg. Corp., Metro-Tel Corp.	1973
411 Railroad Avenue	Hershey Ice Cream	1973
415 Railroad Avenue	Post Auto Body Inc.	2008, 2013
	East Coast Bingo, Pelco Construction & Millwork Corp.	2003
	Pelco Construction & Millwork Corp.	1999
	All Island Wholesalers Inc., Ballard-Issco Systems	1992
	Ballard-Issco Systems, Issco Corp.	1983, 1988
	Trigg Fabrics Inc.	1973
425 Railroad Avenue	Cold Storage of Nassau Inc.	1983, 1988, 1992, 1995, 1999, 2003, 2008, 2013
437 Railroad Avenue	All Round Foods Bakery Products Inc., Allied Cold Storage Inc., Beau International Inc., Locksmith A Emergency 24 Hour	2013
	All Round Foods Bakery Products Inc., Allied Cold Storage Inc., Beau International Inc., Kosher Depot, Kraft Pizza Co.	2008
	Allied Cold Storage, Daystar Enterprises Ltd., Horizon Foods, Kosher Depot, MDRB Inc., Shlomo Snax Inc.	2003
	Allied Bakers Co.	1983, 1988, 1992, 1995, 1999
	Allied Bakers Co., Cold Storage of Nassau Inc.	1978
	Allied Bakers Co., Cold Storage, Hallam Engnrn. Cnst., Moore Nodern Plan	1973
443 Railroad Avenue	Premier Container, Prestige Container	1988
	Marc Motr. Sls. Inc.	1978

Address	Use	Year(s)
445 Railroad Avenue	Auto-Tique	1988
	Bob Williams Collisn., King Excavating	1983

461 Railroad Avenue	A & M First Class Floors, Westbury Produce Corp.	2013
	Country Girl Inc., Creative Food Distribution, ER Meat Corp, East Coast Juice, Krystal Fruit & Vegetable, Westbury Produce Corp.	2008
	A & M First Class Floors, Arrow Produce, ER Meat Corp, Krystal Fruit & Vegetable, Westbury Produce Corp.	2003
	ER Meat Corp., Frank Kelly Wholesale Meats, Napoli Foods Inc., Westbury Produce Corp.	1999
	Eastern Edible Oils Corp., ER Meat Corp., Frank Kelly Wholesale Meats, Napoli Foods Inc., Westbury Produce Corp.	1995
	Frank Kelly Wholesale Meats, Napoli Foods Inc., Westbury Produce Corp.	1992
	Frank Kelly Wholesale Meats, J Legg Distrbtrs., Lilibet Foods Inc., Napoli Foods Inc., Serapo Sportswear, Westbury Produce Corp.	1988
	Frank Kelly Wholesale Meats, J Legg Distrbtrs., Napoli Foods Inc., Serapo Sportswear	1983
	Napoli Foods Inc., Serapo Sportswear	1978
	Napoli Bros Inc., Serapo Sportswear, Westbury Pork Co.	1973

No cross streets were identified.

4.4 Tier 1 Vapor Encroachment Screening

Matrix conducted a VES in general accordance with the ASTM Designation E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

The objective of the VES is to conduct an initial screening to determine whether current or historical practices associated with the Site or nearby properties have the potential to have created a Vapor Encroachment Condition (VEC). The term VEC is defined by ASTM Standard 2600-15 "as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site caused by the release of vapors from contaminated soil and/or groundwater on or near the Site as identified by Tier 1 or Tier 2 procedures."

The Tier 1 screening process includes the following: (1) a search distance test to determine if there are known or suspect contaminated properties within a designated radius of the Site; and (2) a COC test to determine for those known or suspect contaminated properties within the area whether or not a COC is likely to be present.

Matrix reviewed standard environmental record sources typically collected as part of the ASTM E1527-13 Phase I to determine if there are known or suspected sources of contamination within the AOC. The AOC is determined utilizing the approximate minimum search distances as defined by ASTM E2600-15. The approximate minimum search distance is based upon the type of COC; petroleum hydrocarbons or non-petroleum hydrocarbons. Generally, the approximate minimum search distance with regards to the AOC is one-third mile for non-petroleum hydrocarbons and one-tenth mile for petroleum hydrocarbons.

There are four possible conclusions of the Tier 1 screening process which include: (1) a VEC exists; (2) a VEC likely exists; (3) a VEC cannot be ruled out; or (4) a VEC can be ruled out because a VEC does not or is not likely to exist. If a VEC does not exist or is unlikely to exist, then the VES process is considered complete in general accordance with ASTM E2600-15. If a VEC cannot be ruled out in the Tier 1 screen, then further action may be recommended (i.e., Tier 2). A Tier 2 screening is excluded from the scope of the Tier 1 process.

4.4.1 Standard Environmental Record Sources

A VES was completed for the Site and surrounding area through a search by EDR dated March 7, 2017. The VES utilizes standard environmental record sources to determine if there are known or suspected sources of contamination within the AOC. The search was conducted in general accordance with ASTM E2600-15 standards.

Based on the findings of the VES Worksheet, a VEC cannot be ruled out due to the following facilities:

- Westbury Valet/Top Cleaners, located at 123 Post Avenue, 0.030 miles west of the Site and at equal elevation relative to the Site.
- Bartlett Tree Company, located at 345 Union Avenue, 0.034 miles north/northeast of the Site and at equal elevation relative to the Site.

- Union Oil, located at 333 Union Avenue, 0.035 miles north/northeast of the Site and at equal elevation relative to the Site.

A copy of the Vapor Encroachment Screen is included in Appendix H.

4.5 USER PROVIDED INFORMATION

4.5.1 Title Records

Chain-of-Title records were not provided for review by Matrix. Based on information obtained from the client, Railroad Avenue in the Village of Westbury, Nassau County, New York is owned by the MTA. No other chain-of-title records were made available by the User.

4.5.2 Environmental Liens or Activity and Use Limitations

No records regarding environmental liens or activity and use limitations were provided by the User for Matrix to review.

4.5.3 Specialized Knowledge

Specialized knowledge of RECs or potential RECs in connection with the Site has been included in Section 5.

4.5.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information has been provided in the references in Section 10.

4.5.5 Valuation Reduction for Environmental Issues

No information regarding the valuation reduction for environmental issues was provided by the owner.

4.5.6 Owner, Property Manager, and Occupant Information

The Site is currently owned by the MTA and has no residing occupants.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A reconnaissance of the Site and surrounding area was performed on March 6, 2017 by Jordan Farber, Environmental Scientist of Matrix. No property personnel were present during the site reconnaissance. All exterior areas of the property were inspected during the Site reconnaissance. There are no interior structures onsite. During the site reconnaissance, cars were parked in almost all parking spaces within the Site and is noted as a limitation. Photographs of significant features identified during the Site reconnaissance are included in Appendix B.

5.2 General Site Setting

The Site is located at Railroad Avenue in the Village of Westbury, Nassau County, New York. The Site consists of one large asphalt-paved parking lot south of the LIRR Westbury Station.

5.3 Exterior Observations

5.3.1 Hazardous Substances/Wastes

A pole-mounted enclosure manufactured by Alpha, was observed in the southwest portion of the Site. The enclosure is used to support distributed powering architectures in broadband applications. These enclosures typically contain lead-acid batteries, and thus creates a concern for the Site. There is no evidence of staining, leaking, or damage to this enclosure.

No other evidence of hazardous substances or wastes was observed on exterior portions of the Site during the Site reconnaissance.

5.3.2 Bulk Storage Tanks and Appurtenances

Aboveground Tanks and Associated Piping

No evidence of ASTs and associated piping was observed on exterior portions of the Site during the Site reconnaissance.

Underground Tanks and Associated Piping

No evidence of USTs and associated piping was observed on exterior portions of the Site during the Site reconnaissance.

Storage Pads and Areas Including Drum/Waste Storage

No evidence of storage pads and areas including drum/waste storage was observed on exterior portions of the Site during the Site reconnaissance.

Rail, Truck, or Other Loading and Unloading Areas

No evidence of rail, truck, or other loading and unloading areas was observed on exterior portions of the Site during the Site reconnaissance.

Pump Stations, Sumps, and Pits

No pump stations, sumps, or pits were observed on exterior portions of the Site during the Site reconnaissance.

Surface Lagoons and Impoundments

No surface lagoons or impoundments were observed on exterior portions of the Site during the Site reconnaissance.

5.3.3 Drainage Systems and Areas

Surface Water Bodies

No surface water bodies were observed on exterior portions of the Site during the Site reconnaissance.

Sanitary Sewer Collection Systems

No sanitary sewer collection systems were observed on exterior portions of the Site during the Site reconnaissance.

Stormwater Collection Systems

Stormwater collection systems were observed throughout the Site and route through the drive lanes of the parking lot.

Septic Systems and Leach Fields

No septic systems or leach fields were observed on exterior portions of the Site during the Site reconnaissance.

Seepage Pits and Dry Wells

No seepage pits or dry wells were observed on exterior portions of the Site during the Site reconnaissance.

Stormwater Detention Ponds and Fire Water Ponds

No stormwater detention ponds or fire water ponds were observed on exterior portions of the Site during the Site reconnaissance.

Drainage Swales and Culverts

No drainage swales or culverts were observed on exterior portions of the Site during the Site reconnaissance.

5.3.4 Discharge and Disposal Areas

Solid Waste Generation/Disposal and Dumpsters

One small dumpster was identified in the northeast portion of the Site. No evidence of staining or a release was identified in the vicinity of the dumpster.

Sanitary/Process Waste Generation/Discharge Points

No evidence of sanitary/process waste generation or discharge points was observed on exterior portions of the Site during the Site reconnaissance.

Underground Piping, Including Industrial Process Sewers

No evidence of underground piping, including industrial process sewers were observed on exterior portions of the Site during the Site reconnaissance.

Waste Piles

No evidence of waste piles was observed on exterior portions of the Site during the Site reconnaissance.

Landfills or Landfarms

Based on a review of the State's Solid Waste Facility Directory and the Site reconnaissance, no landfills or landfarms are located in close proximity to the Site.

Open Pipe Discharges

No open pipe discharges were observed on exterior portions of the Site during the Site reconnaissance.

5.3.5 Transformers

Based on the Site reconnaissance, two transformers were observed mounted on one telephone pole on the sidewalk immediately south of the Site.

Matrix contacted LIPA, the owner of the transformers, regarding the contents of the transformers and received the following response:

"No analytical data is available for these transformers. However, all distribution transformers owned by LIPA were specified at the time of purchase from the manufacturer to contain a dielectric fluid consisting of mineral oil, not PCBs. As a result, LIPA's in-service transformers typically are expected to either contain no detectable PCBs or low levels of PCBs (typically <0.01%). Even though mineral oil was specified, low levels of PCBs could nonetheless be present because manufacturers sometimes manufactured mineral oil transformers in close proximity to transformers manufactured to specifically contain PCBs. LIPA does not routinely conduct sampling and analysis of transformers for PCBs as that would require the incurrence of an outage and costs that would have to be passed on to the customer. Instead, units are tested when they retired from active service."

5.3.6 Other On-Site Observations

LIRR notified Matrix that there is one monitoring well in the northwest potion of the Site. This well was not visible during the Site visit, and was likely covered by a parked car. LIRR Corporate Safety – Environmental Planning and Compliance Group has no record of wells at the Site or knowledge of its purpose or date of installation, but it is presumed to be for monitoring an off-Site groundwater plume. This plume may be associated with the groundwater contamination at 123 Post Avenue, which has long been occupied by a dry-cleaning facility and is listed on the SHWS database as having confirmed soil and on and off-site groundwater contamination.

5.4 Interior Observations

The Site does not consist of any interior areas.

6.0 INTERVIEWS

6.1 Interview with Owner

No additional personnel were present on the Site during the Site reconnaissance. A user questionnaire was provided to the JV and information provided has been included throughout this report. A copy of the completed Prospective Landowner and/or User Questionnaire is included in Appendix J.

6.2 Interview with Site Manager

As indicated above, no additional personnel were present on the Site during the Site reconnaissance. An interview was conducted with Michael Petruzzelli of Parking Systems Plus to clarify information throughout this document.

6.3 Interview with Occupants

The Site does not house any occupants.

6.4 Interview with Local Government Officials

As indicated above (Section 5.2), Matrix contacted the USEPA, NYSDEC, Nassau County Clerk and Fire Department, and the Westbury Village Municipal Clerk regarding environmental files for the Site. Information request letters and responses associated with these agencies are included in Appendix C.

6.5 Interview with Others

A Prospective Landowner and/or User Questionnaire was provided to the JV for completion. Responses provided on the Prospective Landowner and/or User Questionnaire have been included throughout this report. A copy of the Prospective Landowner and/or User Questionnaire is provided in Appendix J.

7.0 FINDINGS & OPINIONS

Based on the site reconnaissance, database review, historical review, review of available records, and interviews with persons familiar with the Site and surrounding area, Matrix is providing findings and opinions including RECs, historical recognized environmental conditions (HRECs), *de minimis* conditions, other findings, and data gaps.

Recognized Environmental Conditions

During the site reconnaissance, the following four RECs were identified with the Site.

- There is one monitoring well in the northwest portion of the Site. This well was not visible during the Site reconnaissance and was likely covered by a parked car. LIRR Corporate Safety – Environmental Planning and Compliance Group has no record of wells at the Site or knowledge of its purpose or date of installation, but it's presumed to be for monitoring an off-Site groundwater plume. Matrix believes it is likely that the well is part of the monitoring network for the contaminated groundwater plume associated with the 123 Post Avenue site, discussed immediately below.
- Westbury Valet/Top Cleaners, located at 123 Post Avenue, 0.030 miles west of the Site and at a higher elevation relative to the Site, is a dry-cleaning facility. Based on review of historical Sanborn maps the facility has been a dry-cleaner since at least 1968. This property has been identified on the NY SHWS databases as having on-site and off-site groundwater contamination with tetrachloroethene (PCE), and its breakdown products, trichloroethene (TCE) and dichloroethene (DCE). The property is also identified as having soil vapor and associated indoor air contaminated with PCE. This property is listed on the Registry of Inactive Hazardous Waste Disposal sites as a Class 2 site, representing a significant threat to human health and the environment; action required. The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2). The depth to water is approximately 35 feet and flows to the south-south west. The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.
- Auto Tique II, located at 401 Railroad Avenue, adjacent to the east of the Site, and at a higher elevation relative to the Site, is listed on the NY UST database as having an active UST. Len-Tone Auto Inc., a prior operator of the site, was identified as a historical generator of various hazardous wastes. There is no indication that there has been a violation or spill or other source of contamination from the facility and no further action is necessary. Site reconnaissance observations indicated this facility is no longer present and has been redeveloped as a Storquest self-storage facility. Based on the prior site use as an auto repair shop and its proximity to the Site, this location is a REC.

- Vapor Encroachment Condition (VEC): A Tier 1 Vapor Encroachment Screen (VES) was completed by Matrix using EDR's Vapor Encroachment Screen Worksheet. Based on available information, a VEC could not be ruled out at the Site. Please see Section 4.5 above for further discussion on the Tier 1 VES.

Controlled RECs

No CRECs were identified for the Site.

Historical RECs

No HRECs were identified for the Site.

De Minimis Conditions

No *de minimis* conditions were observed or identified through interviews or records review of current or historical uses of the Site and adjoining properties.

Other Findings

The following findings were identified for the Site:

- A pole-mounted enclosure manufactured by Alpha, in the southwest portion of the Site. The enclosure is used to support distributed powering architectures in broadband applications. These enclosures typically contain lead-acid batteries, and thus creates a concern for the Site. There is no evidence of staining, leaking, or damage to this enclosure.
- New York Telephone Co. located on Railroad Avenue, mapped by EDR at the border of Post Ave and the Site. This listing appears to be a mapping error, based on an associated address of 15 Ave C and database results that are not consistent with the known history of the area. New York Telephone Co. has three closed spill cases and has also been identified as a CESQ generator of hazardous waste. Based on the lack of a reliable street address and given the listings on multiple databases, this facility is considered an other finding as defined by Matrix.
- 401 Railroad Avenue is the location of a historical automotive body shop, 0.040 miles east/northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- Westbury Terrace Condo., located at 135 Post Avenue, 0.048 miles from the Site, and at a higher elevation relative to the Site, is the location of an active UST, with no history of a release. Based the proximity and upgradient direction from the site, there is potential for impact to the site should a release have occured.

- Horizon at Westbury, located 130 Post Avenue, 0.078 miles from the Site, and at a higher elevation relative to the Site, is the location of a former UST. Based on the proximity and upgradient direction from the site, there is potential for impact to the site should a release have occurred.
- 415 Railroad Avenue is the location of a historical automotive body shop, 0.079 miles east/northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- 150 Linden Avenue is the location of a historical automotive technician's shop, 0.099 miles northeast of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- 159 Post Avenue is the location of a historical automotive body shop, 0.108 miles northwest of the Site, and at a higher elevation relative to the Site. There is no indication that there has been a spill or other source of contamination from the facility and no further action is necessary.
- Union Oil located at 333 Union Avenue, 0.035 miles northeast of the Site across the LIRR right-of-way, was listed on the LTANKS, NY UST and NY Spills databases. There were previously at least one 3,000-gallon unleaded gasoline tank and three 50,000 and five 20,000 gallon #2 fuel oil USTs on-site, closed in 1988. Two spills, spill #8801831 concerning gasoline and spill number #8801206 concerning #2 fuel oil occurred on-site and have subsequently been closed to the satisfaction of NYSDEC. Based on the closed status of the spills, this facility is not considered a REC, although its upgradient proximity to the site qualifies it as an other finding as defined by Matrix.
- Historical petroleum storage was noted at multiple facilities across the LIRR to the north, in the presumed upgradient groundwater flow direction. In addition to 33 Union Avenue above, facilities included a filling station north of the hotel, shown on both the 1941 and 1968 Sanborn maps, as well as multiple garages and auto facilities, including a garage with a 250-gallon gasoline UST, shown in the 1920 Sanborn map. The potential for leaks to have occurred from these USTs in proximity to the Site is of concern, and due to distance from the Site are considered other findings as defined by Matrix.
- The Hicks & Sons Westbury Coal Yard, west of the Site across Post Avenue, in the presumed sidegradient direction, had two fuel oil tanks on the eastern portion of the property, as shown on the 1968 Sanborn map. Due to the presumed sidegradient direction of groundwater flow and lack of a spill history associated with the facility, the property is considered an other finding as defined by Matrix.

Data Gaps

- To date, responses to some FOIL requests submitted have not been received. All responses will be forwarded upon receipt with recommendations, if necessary.
- The entirety of the Site was inspected during Matrix's walkthrough, though most of the Site was covered by parked cars, limiting a complete inspection.
- The Sanborn Maps do not illustrate any information within the Site boundaries.
- In addition, a limitation was encountered in determining the historical use of the subject property. The earliest source of historical information reasonably ascertainable within the time frame of this report in which usage could be determined was an aerial photograph from 1938. At the time of the photograph, a portion of the Site appeared to be used as railroad siding and parking of automobiles. Therefore, the ASTM E1527 requirement to determine all obvious uses of the property from the present back to the property's first obvious developed use, or back to 1940, whichever is earlier, could not be achieved. However, based upon the identified agricultural land use, it is unlikely that there had been significant prior development; therefore, this data failure is not expected to impact the results of this assessment.

8.0 DEVIATIONS

The Phase I ESA was performed in general accordance with the ASTM 1527-13 Standards as well as the detailed scope of services presented in Section 2.2 of this report.

9.0 ADDITIONAL SERVICES

No additional services were performed beyond the detailed scope presented in Section 2.2 of this report.

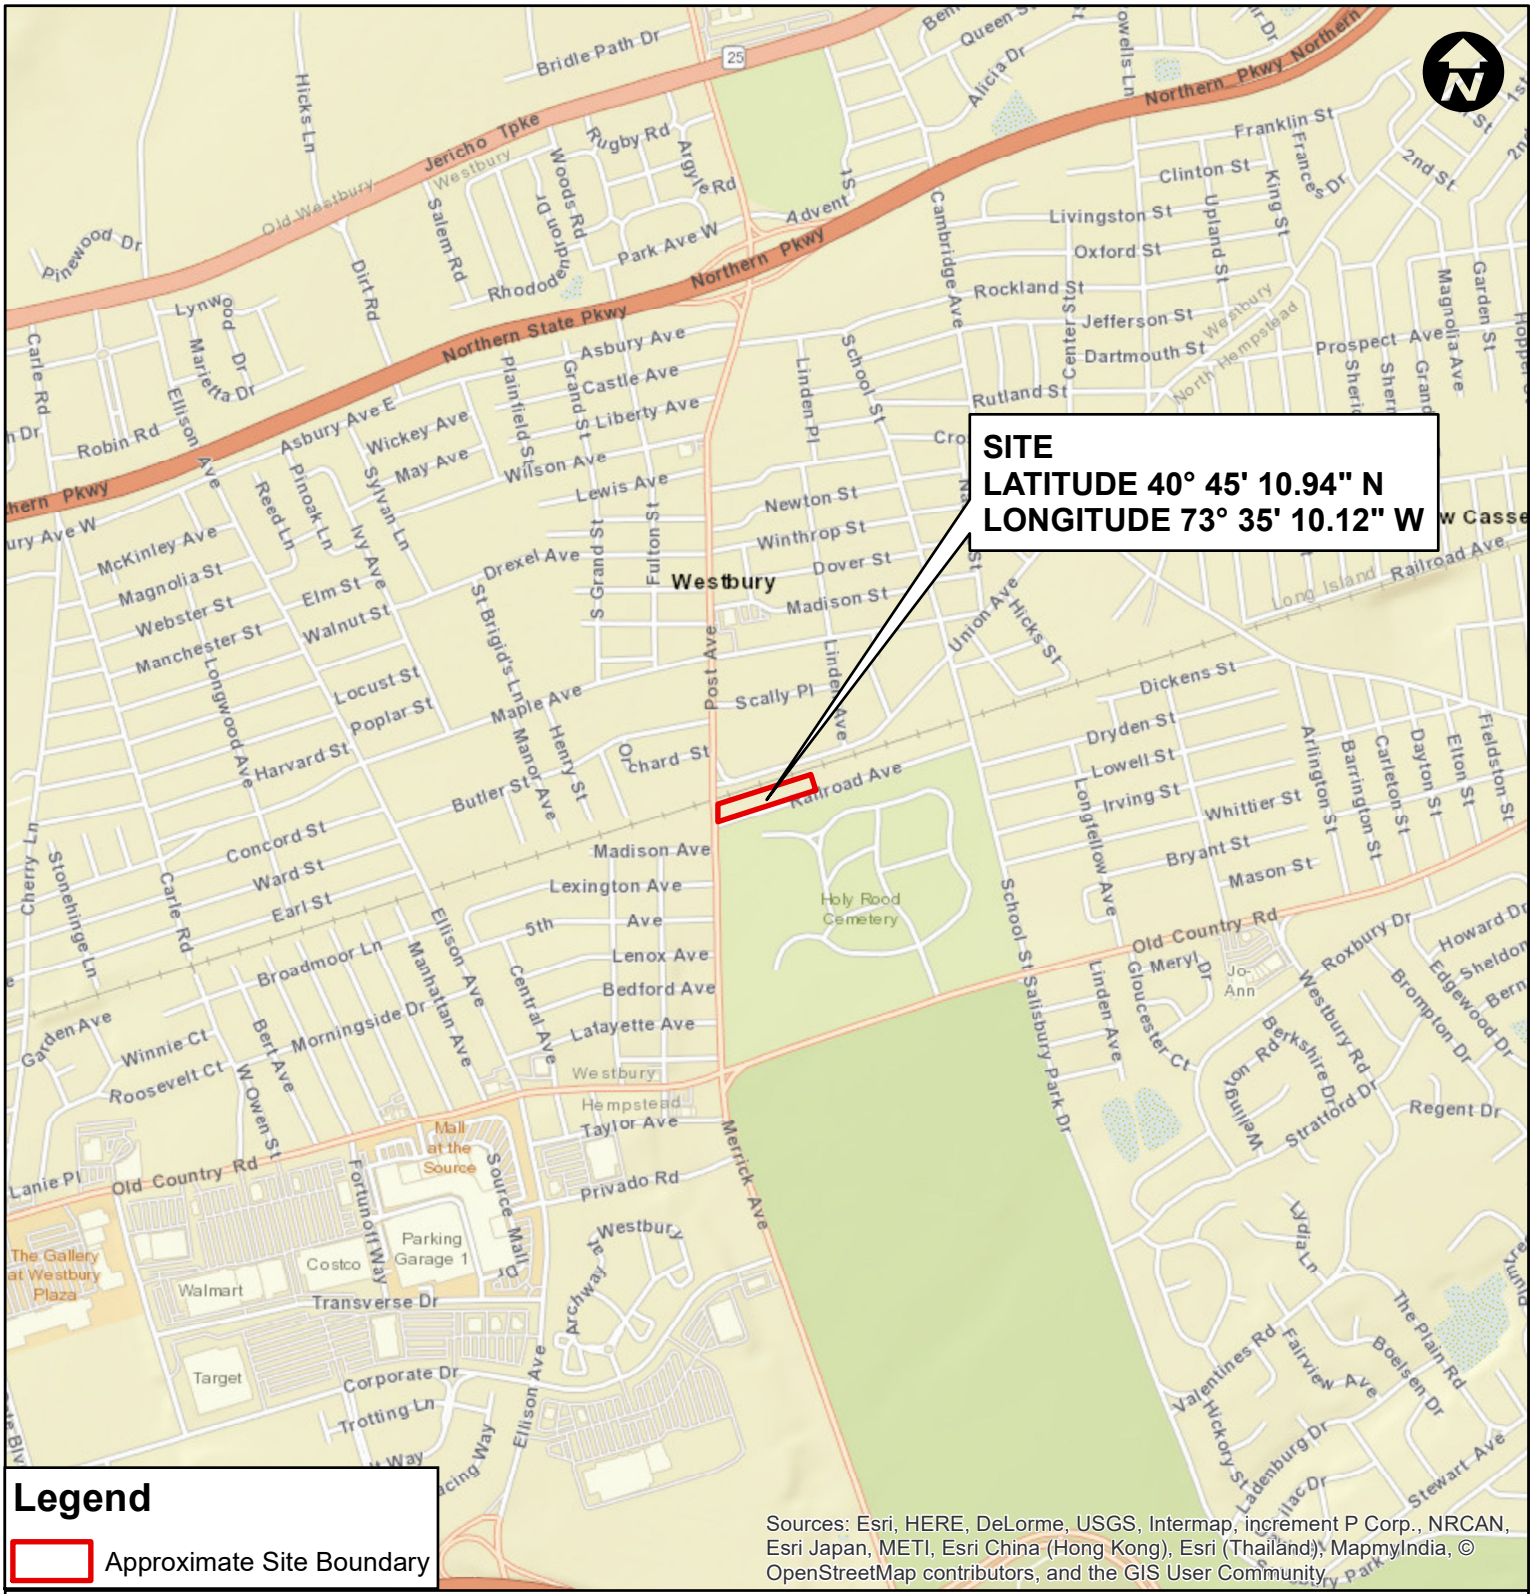
11.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Matrix declares, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and preformed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jordan Farber
Environmental Scientist

Brian Crespi
Project Manager

Mindy Chassin Horowitz
Program Director



12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

JORDAN FARBER
Environmental Scientist
Mr. Farber has experience in environmental investigations including environmental oversight, environmental assessment, remediation, and due diligence projects under NJDEP, NYCDEP, and NYSDEC jurisdiction for commercial, industrial, and residential facilities. Mr. Farber's experience includes, but is not limited to, soil and groundwater sampling, oversight of UST removal and temporary and monitoring well installations, soil classification, processing and analysis of laboratory data, Electronic Data Deliverables (EDDs), and Phase I Site Assessments. He is proficient in Geographic Information System (GIS), gINT, and Surfer software.

BRIAN CRESPI
Project Manager
Mr. Crespi has over eight years of experience in the environmental consulting field performing initial and remedial site assessments, hazardous materials assessments, construction oversight, health and safety monitoring, remedial design, and landfill gas evaluations. Mr. Crespi's areas of expertise include brownfield cleanup and redevelopment; investigation and remediation of sites with potential hazardous material contamination; litigation support for cost recovery and insurance matters; development of remedial cost estimates; and vapor intrusion assessments and remediation. Mr. Crespi has extensive experience conducting investigations for clients in both the public and private sectors, including projects focusing on railroads, landfills, industrial and commercial facilities, as well as impacts on neighboring or proposed residential development. Mr. Crespi has developed and directed the implementation of numerous soil, groundwater and vapor intrusion sampling programs for remedial investigations at industrial facilities being evaluated under the New York Spill Response Program and SRRA and ISRA in New Jersey. His environmental science and engineering background, along with varied experience in New York and New Jersey, provide the foundation to develop and implement investigation and remediation plans and develop the findings into reports for various state and federal regulatory programs. Mr. Crespi is certified through the NYC Mayor's Office of Environmental Remediation, as an OER Certified Brownfield Professional, to efficiently achieve brownfield cleanup and redevelopment on New York City Brownfield sites.

MINDY CHASSIN HOROWITZ
Project Director
Ms. Horowitz has over 20 years of experience in the environmental consulting field performing hazardous materials assessments, waterfront permitting, construction oversight and remedial design. Ms. Horowitz's areas of expertise include brownfield cleanup and redevelopment; investigation and remediation of New York City e-designation sites (sites with a zoning map amendment) with potential hazardous material contamination; stormwater pollution prevention; environmental due diligence of industrial, commercial, residential and mixed-use facilities; litigation support for cost recovery and insurance matters; and development of remedial cost estimates. She has extensive experience managing and conducting hydrogeologic investigations for clients in both the public and private sectors, including projects focusing on rail roads, highways, airports and industrial and commercial facilities. Ms. Horowitz has developed and directed the implementation of numerous soil, groundwater and sediment sampling programs for remedial investigations at industrial facilities being evaluated under ISRA. Her combined hydrogeological and geo-environmental engineering background, along with her varied experience in New York and New Jersey, enable her to compile and interpret analytical data to develop clear and technically defensible conceptual site models and incorporate these findings into reports for various state and federal regulatory programs. Mindy is certified through the NYC Mayor's Office of Environmental Remediation, as an OER Certified Brownfield Professional, to efficiently achieve brownfield cleanup and redevelopment on New York City Brownfield sites.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

BARTLETT TREE COMPAN	***345 UNION AVE***	***NNE 0 - 1/8 (0.034 mi.)***	***B14***	***47***

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

WESTBURY QUALITY D-C	*179A SCHOOL ST*	*ENE 1/8 - 1/4 (0.245 mi.)*	*M62*	*197*

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/14/2016 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
123 POST AVENUE Site Code: 58577	123 POST AVENUE	W 0 - 1/8 (0.030 mi.)	A10	39

BARTLETT TREE COMPAN — 345 UNION AVENUE — NNE 0 - 1/8 (0.034 mi.) — B13 — 44
Site Code: 57491
Class Code: Site is properly closed - requires continued management.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 01/04/2017 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/06/2017 has revealed that there are 26 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 11 NY UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 11/14/2016 has revealed that there is 1 NY ERP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/19/2016 has revealed that there are 3 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/06/2017 has revealed that there are 14 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By:	GTBOBERS

Site Description: Location: The 123 Post Avenue site is located in the Village of Westbury, Nassau County.Site Features: The site consists of a 50’ by 189’ lot. On the site is a building currently used for dry cleaning and a parking area surrounding the building. The surrounding areas are used for commercial and residential purposes. An elevated LIRR line is adjacent to the south border of the site. Current Zoning and Land Use: This site is currently zoned for commercial use and an active dry cleaner operates on site.Past Use of the Site: Dry Cleaning has been conducted at the site since the 1950s. The site was placed on the NYS Registry of Inactive Hazardous Waste Disposal Sites in December of 1998 after the Nassau County Department of Health performed a facility inspection in July 1995. Operable Units: The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed

123 POST AVENUE (Continued) **S106780907**

separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination.Site Geology and Hydrogeology: The depth to water is approximately 35 feet and flows to the south-south west. The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.

Env Problem: Nature and Extent of Contamination: For OU 1: On-Site AreasBased on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene. These contaminants continue to be present in the on-site soils at a concentration up to 190,000 micrograms per kilogram (unrestricted soil cleanup objectives are 1300 micrograms per kilogram) and in the on-site groundwater.Soil Vapor and Indoor Air - tetrachloroethene was detected in soil vapor at elevated concentrations and was also detected in indoor air. For OU 2: Off-Site GroundwaterBased on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene.These contaminants were initially detected in the off-site groundwater plume at concentrations up to 5000 micrograms per liter. Between October 2011 and March 2013 oxidant was injected into the plume as part of a pilot study. The injections reduced tetrachloroethene concentrations to less than 800 micrograms per liter. Regardless, these contaminants exceed groundwater standards (5 micrograms per liter) beneath the site and for at least 1800 feet downgradient from the site. Significant Threat: The site is listed on the registry of inactive hazardous waste disposal sites as a class 2 site, representing a significant threat to human health and the environment, it is located within a USEPA designated sole source aquifer, and is in the vicinity of municipal water supply wells.

Health Problem: Soil vapor from the site caused indoor air contamination at several neighboring homes and businesses. The soil vapor extraction system operating at the site has effectively reduced concentrations of tetrachloroethene in these buildings. NYSDOH and NYSDEC will evaluate the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures near the off-site groundwater plume. Direct exposures to the contaminated groundwater are not expected, because the site and surrounding area are served by a public water supply. There are three active public water supply wells nearby. Two are treated to remove volatile organic compound contamination (not from this site), and the third does not require treatment to comply with standards.

Updated By: WJPARISH
Site Description: Location: The Bartlett Tree Company site is located at 345 Union Avenue in the Village of Westbury, Town of North Hempstead.Site Features: The site is approximately 0.4 acres in size. A new facility building is expected to replace the old one. Two additional structures, an equipment garage/pesticide locker and a storage shed have been removed from the site.Current Zoning/Use: The site is currently zoned for commercial use and is located in a commercial/industrial setting. The Bartlett Tree Company provides horticultural services to the surrounding communities. The Long Island Railroad's Westbury train station is located immediately south of the site. There is a residential neighborhood several blocks north of the site.Past Use of the Site: The Bartlett Tree Company has occupied the site since the mid 1950s. Pesticides are stored on-site for use in the horticultural services they provide. Site Geology/Hydrogeology: The water table is encountered approximately 29'-32' below ground surface, depending on seasonal variation. Overburden consists mainly of various size sands and gravels. The

BARTLETT TREE COMPANY (Continued) **S106780906**

site specific groundwater flow direction is south/southwest.

Env Problem: Nature and Extent of Contamination: A Remedial Investigation was conducted to delineate the nature and extent of contamination on-site. Based upon the investigation, the primary contaminants of concern were the pesticides aldrin, alpha BHC, chlordane, DDD, DDE, DDT, dieldrin and lindane.Prior to Remediation:Shallow Surface Soil - Surface soil was characterized site-wide by collecting soil samples from zero to two feet below surface in a number of locations including from the following areas of concern: former pesticide storage locker, former open shed, test pit-1, test pit-2, stairway floor drain and mechanic's pit. Levels of pesticides in all soil samples collected from this depth interval were below the commercial use SCOs. All samples were below the protection of groundwater Soil Cleanup Objectives (SCOs) and the majority were below the residential SCOs.Subsurface Soil - Pesticides were detected in a subsurface soil beneath Drywell-1 at levels which exceeded the commercial use and protection of groundwater SCOs. The contaminants were detected in the drywell's bottom samples (approximately 7' below grade) and to a depth of approximately 32' below grade. Groundwater - Pesticides were detected in groundwater at levels which exceeded SCGs. Groundwater is encountered approximately 31 feet below grade. Volatile organic compounds (trichloroethene and cis-1,2-dichloroethene) were detected at levels exceeding SCGs in groundwater upgradient of the site. Levels of VOCs in on-site groundwater are generally non-detect with one detection marginally exceeding the SCG, and is not considered site related.Post-Remediation:Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were pesticides in soil and groundwater. Remediation in the form of source removal (soil excavation) has reduced contaminant levels in subsurface soil to levels meeting either the commercial use or protection of groundwater SCOs. Approximately 438 tons of contaminated soil was excavated and disposed of off-site at permitted disposal facilities. While pesticides in groundwater were found to exceed SCGs, detections were extremely low (parts per trillion) and are expected to diminish to levels meeting SCGs as a result of source removal. A Record of Decision was issued on March 31, 2014 which requires continued monitoring of on-site groundwater and for soil vapor intrusion. An Environmental Easement has been placed on the property and future monitoring will be undertaken pursuant to the Department approved Site Management Plan.

Health Problem: Since the site is fenced and covered by buildings, asphalt, or concrete, people will not come into contact with residual site-related soil and groundwater contamination unless they dig below the surface. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although sampling has indicated that impacts to indoor air are not a current concern, the potential exists to inhale contaminants in indoor air due to soil vapor intrusion in on-site building development and occupancy. Insufficient environmental information exists to evaluate the potential for soil vapor intrusion to occur in off-site areas.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name:	DOT NAPOLI
Contact Phone:	(516) 379-1500
DEC Memo:	"10/26/11 1145 Hrs (A): Napoli called- she said the Nassau County Health Department had not yet arrived to inspect the tanks and the soil excavation. 10/26/11 1145 Hrs (B): DEC informed her the NCHD could oversee the cleanup on DEC's behalf and that if the NCHD is satisfied with the cleanup we accept their findings, and directed her to call back with an update once the NCHD had inspected the site. DR 10/26/11 1230 Hrs (A): INSPECTOR GOLDEN (NASSAU COUNTY FIRE MARSHAL) CALLED FROM THE SITE- HE CONFIRMED THERE WAS CONTAMINATED SOIL PRESENT AND SAID 'HE WAS TOLD DEC WAS NOT RESPONDING'. 10/26/11 1230 Hrs (B): DEC informed him of what we had been told, and the directives provided to Milro by this office. 10/26/11 1230 Hrs (C): He said the tanks are not connected to a generator [WHICH WOULD MAKE THE TANKS SUBJECT TO THE NCFM CODE], so he was not clear why his office was called. 10/26/11 1230 Hrs (D): He said 'the ends of the tanks are like swiss cheese', that Milro had not yet completed the cleanup, and that he could not stay. 10/26/11 1230 Hrs (E): DEC informed him that Milro could proceed to excavate the contaminated soil if they wished but must must leave the excavation open if safe to do so and must leave the tanks on site pending an inspection by DEC. Golden said he felt it would be safe to leave the excavation open, even given the forecast for rain. 10/26/11 1230 Hrs (F): DEC informed Golden we only had one inspector available today, that it was unknown whether he could respond since he had several inspections scheduled, that we would contact the inspector and have him call Milro and/or the property representative, and that if Milro and/or the property representative had any questions to have them call DEC directly. DR 10/26/11 1240 Hrs: Called TD and informed him of the situation. He will call Milro later and discuss whether he needed to respond. DR 10/26/11 1240 Hrs: ANDY FINKELSTEIN (FINKELSTEIN REALTY 516-428-0935) left message. DR 10/26/11 1250 Hrs: Left message for Finkelstein. DR 10/26/11 1305 Hrs: Finkelstein left message. DR 10/26/11 1315 Hrs: Left message for Finkelstein. DR 10/26/11 1325 Hrs (A): Called PAUL BASSO (MILRO)- Milro had called the NCFM upon finding the contamination. 10/26/11 1325 Hrs: (B): HE SAID THEY COULD NOT LEAVE THE EXCAVATION OPEN DUE TO ITS PROXIMITY TO THE BUILDING AND THE FORECAST FOR RAIN, SO THEY HAD LINED THE EXCAVATION WITH PLASTIC AND BACKFILLED THE EXCAVATION. DR 10/26/11 approx 1330 Hrs: Finkelstein left message. DR 10/26/11 1340: Left message for Finkelstein. DR 10/26/11 1340 Hrs (A): Finkelstein called from the site- THESE TANKS HAD BEEN UNUSED FOR MANY YEARS, AND WERE NOT CONNECTED TO ANY EQUIPMENT. 10/26/11 1340 Hrs (B): MIKE PALMISANO (NCHD) WAS ON SITE, BUT MILRO HAD ALREADY BACKFILLED THE EXCAVATION. 10/26/11 1340 Hrs (C): DEC informed Finkelstein the case would be assigned to an inspector tonight, and directed him to call back tomorow to discuss the situation and to schedule an inspection. HE INDICATED HE MIGHT SOLICIT OTHER CONTRACTORS FOR THE WORK. DR 10/26/11 1345 Hrs: Called TD to update him- he said he had already spoken to Milro. DR 11/9/11 FILE REASSIGNED"

NASSAU CO. AST:
Facility ID: 001541

Tank ID: 0034
Tank Location: Indoors, Aboveground
Capacity (Gal): 00005000
Description: SODIUM HYDROXIDE
Date Permit Ends: Not reported
Tank Status: In Service
Material Type: Waste
Tank Material: Fiberglass Reinforced Plastic
Internal Protection: None
External Protection: PAINTED [e.g. asphaltic]
Piping Type: Other
Leak Detect: ELECTRONIC
Containment: DOUBLE WALL TANK
Product Gauge: Yes
Dispense Method: 2
Fill Type: Pumped
Install Date: 011996
Owner Name: GENERAL SEMICONDUCTOR
Owner Address: 172 SPRUCE ST
Owner City,St,Zip: WESTBURY, NY 11590
Permitee Name: IZZO AND VERGATA
Permitee Address: 415 GLEN COVE

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

ARTISAN COLUMBIA (Continued) **1001818332**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was PARISH 11/04/93: Long Island Rail Road found oil on track

AGIP INC (Continued) **S102139211**

right-of-way. Request meeting. 11/12/93: LIRR reported incident to DEC. 11/19/93 (A): DEC (Parish) met on site with LIRR. Fence between LIRR's property and AGIP's had been taken down. Appeared oil is dumped onto LIRR's property. Area approx 100ft long by unk width behind AGIP heavily stained. Has sketch and photos. 11/19/93 (B): Noted drum bungs in debris. Also noted a number of drums, and open trailers containing drums, on AGIP's property. 11/19/93 (C): LIRR had taken two soil samples. 11/19/93 (D): DEC took two soil samples. Pedneault to analyze. 12/03/93: Pedneault data- Found approx 94500ppb of Total Petroleum Hydrocarbons and trace of unidentifiable petroleum product . Did not find BTEX. 12/16/93 (A): LIRR FAXes their data- In sample Mile Post 22-1 , found approx 9300ppb Acetone, approx 3000ppb Vinyl Acetate, approx 1800ppb Toluene, approx 1700ppb Xylenes, approx 7400ppb 2Ethylhexylphthalate, 1.2ppm Barium, and approx 71000ppb Total Petroleum Hydrocarbons. 12/16/93 (B): In sample Mile Post 22-2 , found approx 96000ppb Acetone and approx 130,000ppb Total Petroleum Hydrocarbons. 12/16/93 (C): NOTE- Some of the detection limits for other parameters were quite high. 12/17/93 (A): DEC (Parish & Acampora) met with LIRR and Ron Pappas (AGIP's Operations Manager) on site- He claimed they were burglarized approx 2 weeks prior. Said oil and antifreeze was stolen and spilled at the area in question. Said this was an ongoing problem since Ultralene owned the shop (PRIOR OCCUPANT?). 12/17/93 (B): Did not have any receipts for disposal of waste products. Drum residue taken from the drums prior to their removal . Found heavy contamination in area where they are cleaned. 12/17/93 (C): Drums supposedly taken by Goodman Brothers Steel Drum Co, 18 Division Place, Brooklyn NY. 12/17/93 (D): Requested cleanup of impacted areas. 12/20/93 (A): Savage Strauss Group (1 Harvard Way, Somerville NJ, 08876, 908-722-9000, consultant for AGIP)- AGIP contracted for development of a Spill Prevention Control and Countermeasure Plan. They have inspected site. Will be sending draft plan to AGIP shortly. 12/20/93 (B): Upon completion of SPCC Plan, will investigate area of possible spillage. Will determine whether petroleum hydrocarbons are present and their type. IF IT IS DETERMINED TO BE LIGHT HYDROCARBONS THAT ARE NOT COMPOUNDS FOUND IN MOTOR OIL, HYDRAULIC OIL, OR ANTIFREEZE, WE WILL THEN ADVISE YOUR OFFICE OF SUCH AND YOU CAN THEN APPROACH THE RAILROAD TO REMEDIATE THIS AREA OF CONTAMINATION. THIS WOULD BE EXPECTED TO BE DONE TO PREVENT IT FROM MIGRATING ONTO THE AMERICAN AGIP'S PROPERTY, IF IT HASN'T ALREADY . Their geologist has determined groundwater flow to be from LIRR property TOWARD theirs. 12/20/93 (C): If the hydrocarbons ARE typical of the above products, AGIP will implement a more detailed sampling plan to determine their extent. Would then develop remediation plan. 01/18/94: Letter to AGIP, cc LIRR and NCFM- Request copy of waste disposal receipts; determination of vertical and horizontal extent of contamination; removal of all contaminated soil; and disposal receipts for same. Gives scenario for failure to comply. 02/16/94: Strauss FAX- Due to bad weather, sampling is postponed until 18Feb. 08/31/94: Strauss called- Sampling for Total Petroleum Hydrocarbons showed count in 1000's of ppM . In addition, they confirm motor oil contamination . Are resampling today. DEC requested volatiles and semi-volatiles. 06/28/95: Yellowstone Environmental Services (131 Fulton Ave, Hempstead NY, 11550, 516-485-0000) letter- Have been contracted to perform surface and subsurface remediation. In process of acquiring necessary permits from LIRR. 08/22/95: Parish on site- Yellowstone cleaning up. Removed approx 40-50cy soil from along embankment. Four composite samples

AGIP INC (Continued) **S102139211**

taken. Disposal receipts and lab data to be sent ASAP. Has sketch and photos. 09/11/95: Receive lab data- FIVE samples. Total Petroleum Hydrocarbons range from 186ppM to 6500ppM. 09/26/95: Letter to AGIP- Have reviewed soil data. Some contamination still present. Need additional excavation in area of samples 1 and 4. Resample after excavation. 10/11/95: Parish on site- Yellowstone excavating areas in question. Removed approx 5cy soil. Took sample from each area. Plastic put over area and then filled with soil (will make it easier to excavate if more work needed). 10/18/95: Yellowstone letter- Enclose lab data. Sample 1A had 210ppM Total Petroleum Hydrocarbons, and sample 2 had 113ppM. 10/31/95: 95 Inc (68-H East Jefryn Blvd, Deer Park NY, 11729) Project Closure Report- Includes copies of various documents, such as soil disposal receipts and copies of the Aug and Oct lab data. 11/28/95: Spills memo to BECI- Enclose copy of disposal receipts. ALLIED ENVIRONMENTAL GROUP CLASSIFIED THE WASTE AS HEATING OIL. IT WAS REALLY LUBRICATING OIL. YOU MAY WISH TO CHECK THIS COMPANY'S CLASSIFICATION OF WASTES FOR DISPOSAL. THEY APPEAR TO BE A BROKER OF CONTAMINATED SOILS . 11/29/95: Letter to AGIP- Have reviewed the file and have received the disposal papers. No further requirements for this spill at this time. 05/12/97: DEC to review for closure (HAD BEEN KEPT OPEN DUE TO THE ONGOING NATURE OF THE PROBLEM HERE). ***OTHER SPILLS HERE- 8800743- DUMPING OF WASTE OIL INTO STORM DRAIN (NO PROOF AGIP WAS SPILLER) 8807176- DUMPING OF WASTE OIL INTO STORM DRAIN (NO PROOF AGIP WAS SPILLER) 8911394- 1K DIESEL TANK TEST FAILURE; TANK ALONE PASSED AFTER LINES WERE DISCONNECTED; TANK TO BE ABANDONED 9509570- DUMPING AT REAR OF PROPERTY ONTO LIRR PROPERTY? ***FOUND AT LEAST ONE OTHER SPILL BY AGIP- 9205015- UNSECURED CONTAINERS IN TRUCK FELL OVER AND LEAKED ONTO ROAD. THEY HIRED CONTRACTOR TO CLEAN UP. ***MAY BE OTHERS BY AMERICAN AGIP/AGRIP/ULTRALENE ***OTHER NAMES/ADDRESSES AS PER 96/97 PHONE BOOK- AMERICAN AGIP CO 900 ELLISON, WESTBURY NY, 11590 516-222-1110 OR 683-5460 AMERICAN AGRIP CO 581 DICKENS, WESTBURY NY, 11590 516-344-8765 AMERICAN AGRIP CO 900 ELLISON, WESTBURY NY, 11590 800-632-8777 ULTRALENE PETROLEUM PRODUCTS 581 DICKENS, WESTBURY NY, 11590 800-632-8777 ***OFFICIAL RELATIONSHIP BETWEEN THE THREE IS NOT CERTAIN, BUT APPEARS THAT ULTRALENE IS A DIVISION OF AMERICAN. AMERICAN APPEARS TO BE A DISTRIBUTOR OF MANY LINES OF PETROLEUM PRODUCTS."

Remarks: "TRACK DEPARTMENT FOUND OIL ON R.O.W, LIRR BEHIND COMPANY, 2-3 SPOTS AFFECTED, MEETING ON SITE NEXT WEEK TO SAMPLE AND PHOTOGRAPH"

Future Prog:	Not reported
Description:	The former Mitchel Field consisted of about 1,437 acres in Hempstead, New York. Mitchel Field has a history of troop encampments since the Revolutionary War. In 1918, it became an active flying field. During World War II, it was used for training and for sending tactical units overseas. Abandoned tanks are present at the site, and hazardous and toxic wastes and ordnance could be present. The site is currently occupied by Hofstra University, Nassau Community College, the Nassau Coliseum, and the Mitchel Sports Complex. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.
Current Program:	Not reported
History:	Acquisition of the site occurred from 1917 until 1959. The installation consisted of 1,168.0 acres in fee, 181.67 acres in

MITCHEL FIELD (Continued) **1007211602**

easement, and 7.08 acres and 79.07 acres that were licensed and leased, respectively. Mitchel Field was deactivated in April 1961; 1,076.77 acres fee were reported excess to the General Services Administration, and the remaining 92.13 acres fee were transferred to other DoD agencies. The principal owners of the site are now Hofstra University and Nassau Community College. This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and therefore may present an explosive hazard.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System
New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

South Map:	5940607 FREEPORT, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

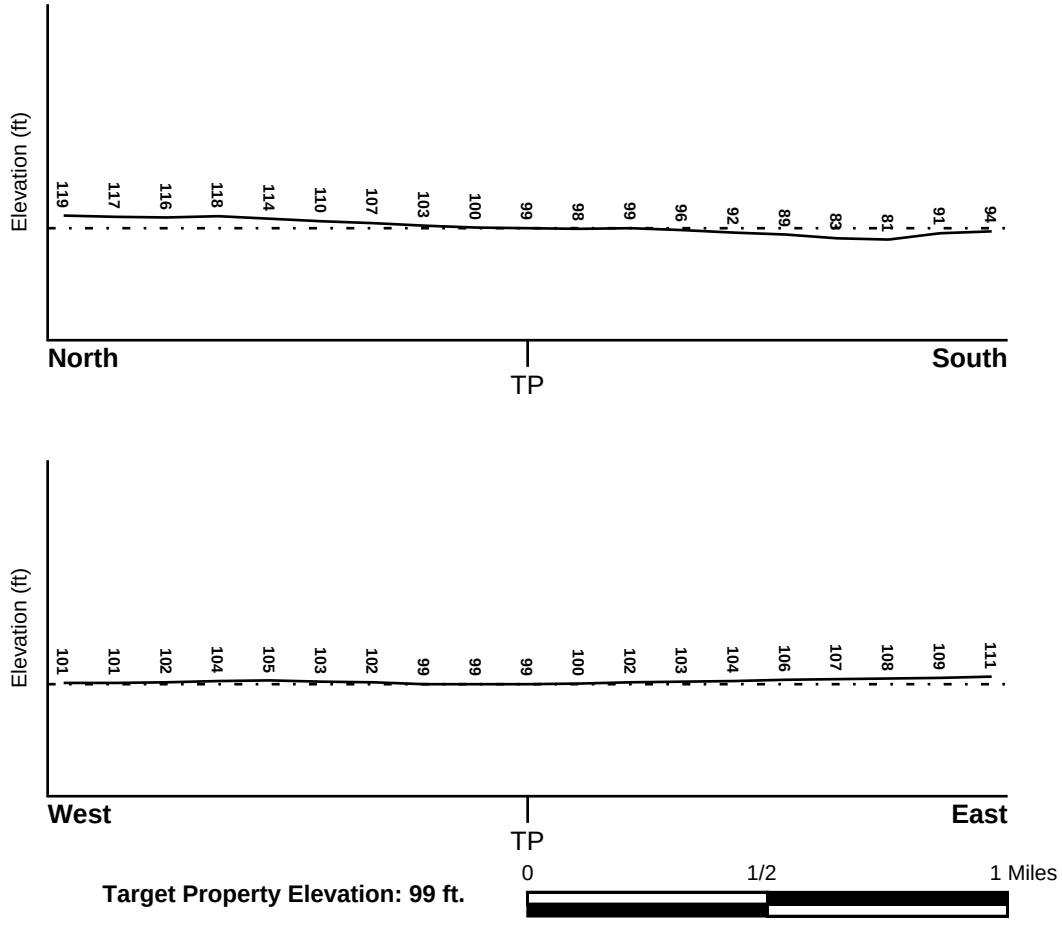
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
36059C0139F	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
36059C0138F	FEMA Q3 Flood data
36059C0227F	FEMA Q3 Flood data

36059C0227G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HICKSVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Pleistocene
Code:	Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
sandy loam
sand

Surficial Soil Types: loam
sandy loam
sand

Shallow Soil Types: sandy loam

Deeper Soil Types: very gravelly - sand
coarse sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Monloc Identifier:	USGS-404554073351502		
Monloc name:	N 1616. 2		
Monloc type:	Well		
Monloc desc:	OLD: N 1616. 1 19650910		
Huc code:	02030202	Drainagearea value:	Not Reported
Drainagearea Units:	Not Reported	Contrib drainagearea:	Not Reported
Contrib drainagearea units:	Not Reported	Latitude:	40.7651004
Longitude:	-73.5870716	Sourcemap scale:	24000
Horiz Acc measure:	1	Horiz Acc measure units:	seconds
Horiz Collection method:	Interpolated from map		
Horiz coord refsys:	NAD83	Vert measure val:	122.5
Vert measure units:	feet	Vertacc measure val:	0.1
Vert accmeasure units:	feet		
Vertcollection method:	Level or other surveying method		
Vert coord refsys:	NGVD29	Countrycode:	US
Aquifername:	Northern Atlantic Coastal Plain aquifer system		
Formation type:	Magothy Aquifer		

Aquifer type:	Not Reported		
Construction date:	Not Reported	Welldepth:	68
Welldepth units:	ft	Wellholedepth:	68
Wellholedepth units:	ft		

Ground-water levels, Number of Measurements: 528

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Subject: FOIL Request

Good Morning Ted,

Matrix New World Engineering is conducting Phase I Environmental Site Assessments in Westbury and needs to place a FOIL request for relevant information about the sites. We are requesting the following information for Scally Place (Block 228 Lots 12, 792, and 793; 124,382 sq. ft.; owned by the Village of Westbury) and Railroad Avenue (95,193 sq. ft.; owned by the Metro Transit Authority):

Any information/files including but not limited to: underground storage tanks, above ground storage tanks, tanks and building permits, health and environmental violations, discharges/releases of petroleum and hazardous materials, spills, hazardous materials, health and environmental inspections and/or investigations, historic property ownership, existing and former tenants, fires, potable wells, monitoring wells, and septic systems.

These Phase I ESAs are being conducted for the Long Island Rail Road.
Please let me know if you need more information.

Thank you,

Jordan Farber

March 21, 2017

Dear Mr. Jordan Farber,

EPA-R2-2017-005082 has been processed with the following final disposition:

This is in response to your Freedom of Information Act (FOIA) request, identified above, dated 03/20/2017, that you submitted to the U.S. Environmental Protection Agency (EPA). Your request seeks environmental information on the following:

Railroad Avenue in the Village of Westbury, Nassau County, New York

The information that you are seeking is publicly available on EPA's *MyPropertyInfo* online database. The database will provide you with information concerning records the EPA has about a specific property, and it can be accessed at the link below:

http://www.epa.gov/myproperty/

Because this information is publicly available, your FOIA request for this information is being administratively closed, in accordance with EPA's FOIA regulations. See 40 C.F.R. Part 2, Subpart A. Please note you should perform the initial search of a property of interest by visiting the above link. If your search produces results, then proceed with an information request for additional records under FOIA. Your FOIA submittal should be accompanied by these results. Be advised, soon we will discontinue the processing of requests seeking data that is available in the public domain. Instead, you should follow the above steps.

If you consider this response to be a denial of your request, you may appeal this determination to the National Freedom of Information Office, U.S. EPA, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, DC 20460 (U.S. Postal Service Only). Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service, or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20001. Your appeal must be made in writing, and it must be received no later than 90 calendar days from the date of this letter. The Agency will not consider appeals received after the 90 calendar day limit. Appeals received after 5:00 pm EST will be considered received the next business day. The appeal letter should include the FOIA tracking number listed above. For quickest possible handling, the subject line of your email, the appeal letter, and its envelope, if applicable, should be marked "Freedom of Information Act Appeal." Additionally, you may seek assistance from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202)566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510, 8610 Adelphi Road, College Park, MD 20740-6001; e-mail, ogis@nara.gov; telephone, 301-837-1996 or 1-877-684-6448; and facsimile, 301-837-0348.

This letter concludes our response to your request. Thank you for your interest in this information.

Respectfully,

/s/

Mary Mears
Public Affairs Director
U.S. EPA Region 2 (NJ, NY, PR, the US VI and eight Indian Nations)

To: Jordan Farber
Subject: Foil request re: Westbury properties

Mr. Farber,

In regards to your recent Foil request for information on the above address location:
The only information this office has that you have requested is current and historic ownership information for this property.
As ownership information is Public Record, requesting it through Foil is not necessary. I am going to deny your request in regards to Foil and you may
Request deed info (ownership records) by coming into this Office or calling 516-571-3245.
The other information should be directed to the Town of Hempstead.
Sincerely,
Nassau County Clerk Foil Officer

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported
Hydric Status:	Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

Soil Layer Information

	Boundary			Classification			
Layer	**Upper**	**Lower**	**Soil Texture Class**	**AASHTO Group**	**Unified Soil**	**Permeability Rate (in/hr)**	**Soil Reaction (pH)**
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:	loam sandy loam sand
Surficial Soil Types:	loam sandy loam sand
Shallow Soil Types:	sandy loam
Deeper Soil Types:	very gravelly - sand coarse sand

EXECUTIVE SUMMARY

Updated By:	GTBOBERS
Site Description:	Location: The 123 Post Avenue site is located in the Village of Westbury, Nassau County.Site Features: The site consists of a 50' by 189' lot. On the site is a building currently used for dry cleaning and a parking area surrounding the building. The surrounding areas

123 POST AVENUE, 123 POST AVENUE, WESTBURY, NY 11590 (Continued)

	are used for commercial and residential purposes. An elevated LIRR line is adjacent to the south border of the site. Current Zoning and Land Use: This site is currently zoned for commercial use and an active dry cleaner operates on site.Past Use of the Site: Dry Cleaning has been conducted at the site since the 1950s. The site was placed on the NYS Registry of Inactive Hazardous Waste Disposal Sites in December of 1998 after the Nassau County Department of Health performed a facility inspection in July 1995. Operable Units: The site is currently being managed as two operable units, one for on-site (OU-1) and one for the off-site groundwater (OU-2). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination.Site Geology and Hydrogeology: The depth to water is approximately 35 feet and flows to the south-south west. The soils at the site consist of sands and clays to a depth of several hundred feet before bedrock is encountered.
Env Problem:	Nature and Extent of Contamination: For OU 1: On-Site AreasBased on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene. These contaminants continue to be present in the on-site soils at a concentration up to 190,000 micrograms per kilogram (unrestricted soil cleanup objectives are 1300 micrograms per kilogram) and in the on-site groundwater.Soil Vapor and Indoor Air - tetrachloroethene was detected in soil vapor at elevated concentrations and was also detected in indoor air. For OU 2: Off-Site GroundwaterBased on the investigations conducted to date the primary contaminant of concern is tetrachloroethene and its breakdown products, trichloroethene and dichloroethene.These contaminants were initially detected in the off-site groundwater plume at concentrations up to 5000 micrograms per liter. Between October 2011 and March 2013 oxidant was injected into the plume as part of a pilot study. The injections reduced tetrachloroethene concentrations to less than 800 micrograms per liter. Regardless, these contaminants exceed groundwater standards (5 micrograms per liter) beneath the site and for at least 1800 feet downgradient from the site. Significant Threat: The site is listed on the registry of

123 POST AVENUE, 123 POST AVENUE, WESTBURY, NY 11590 (Continued)

	inactive hazardous waste disposal sites as a class 2 site, representing a significant threat to human health and the environment, it is located within a USEPA designated sole source aquifer, and is in the vicinity of municipal water supply wells.
Health Problem:	Soil vapor from the site caused indoor air contamination at several neighboring homes and businesses. The soil vapor extraction system operating at the site has effectively reduced concentrations of tetrachloroethene in these buildings. NYSDOH and NYSDEC will evaluate the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures near the off-site groundwater plume. Direct exposures to the contaminated groundwater are not expected, because the site and surrounding area are served by a public water supply. There are three active public water supply wells nearby. Two are treated to remove volatile organic compound contamination (not from this site), and the third does not require treatment to comply with standards.

Site Description:	Location: The Bartlett Tree Company site is located at 345 Union Avenue in the Village of Westbury, Town of North Hempstead.Site Features: The site is approximately 0.4 acres in size. A new facility building is expected to replace the old one. Two additional structures, an equipment garage/pesticide locker and a storage shed have been removed from the site.Current Zoning/Use: The site is currently zoned for commercial use and is located in a commercial/industrial setting. The Bartlett Tree Company provides horticultural services to the surrounding communities. The Long Island Railroad's Westbury train station is located immediately south of the site. There is a residential neighborhood several blocks north of the site.Past Use of the Site: The Bartlett Tree Company has occupied the site since the mid 1950s. Pesticides are stored on-site for use in the horticultural services they provide. Site Geology/Hydrogeology: The water table is encountered approximately 29'-32' below ground surface, depending on seasonal variation. Overburden consists mainly of various size sands and gravels. The site specific groundwater flow direction is south/southwest.

BARTLETT TREE COMPANY, 345 UNION AVENUE, WESTBURY, NY 11590 (Continued)

Env Problem:

Nature and Extent of Contamination: A Remedial Investigation was conducted to delineate the nature and extent of contamination on-site. Based upon the investigation, the primary contaminants of concern were the pesticides aldrin, alpha BHC, chlordane, DDD, DDE, DDT, dieldrin and lindane.Prior to Remediation:Shallow Surface Soil - Surface soil was characterized site-wide by collecting soil samples from zero to two feet below surface in a number of locations including from the following areas of concern: former pesticide storage locker, former open shed, test pit-1, test pit-2, stairway floor drain and mechanic's pit. Levels of pesticides in all soil samples collected from this depth interval were below the commercial use SCOs. All samples were below the protection of groundwater Soil Cleanup Objectives (SCOs) and the majority were below the residential SCOs.Subsurface Soil - Pesticides were detected in a subsurface soil beneath Drywell-1 at levels which exceeded the commercial use and protection of groundwater SCOs. The contaminants were detected in the drywell's bottom samples (approximately 7' below grade) and to a depth of approximately 32' below grade. Groundwater - Pesticides were detected in groundwater at levels which exceeded SCGs. Groundwater is encountered approximately 31 feet below grade. Volatile organic compounds (trichloroethene and cis-1,2-dichloroethene) were detected at levels exceeding SCGs in groundwater upgradient of the site. Levels of VOCs in on-site groundwater are generally non-detect with one detection marginally exceeding the SCG, and is not considered site related.Post-Remediation:Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were pesticides in soil and groundwater. Remediation in the form of source removal (soil excavation) has reduced contaminant levels in subsurface soil to levels meeting either the commercial use or protection of groundwater SCOs. Approximately 438 tons of contaminated soil was excavated and disposed of off-site at permitted disposal facilities. While pesticides in groundwater were found to exceed SCGs, detections were extremely low (parts per trillion) and are expected to diminish to levels meeting SCGs as a result of source removal. A Record of Decision was issued on March 31, 2014 which requires continued monitoring of on-site groundwater and for soil vapor intrusion. An Environmental Easement has been placed on the property and future monitoring will be undertaken pursuant to the

BARTLETT TREE COMPANY, 345 UNION AVENUE, WESTBURY, NY 11590 (Continued)

	Department approved Site Management Plan.
Health Problem:	Since the site is fenced and covered by buildings, asphalt, or concrete, people will not come into contact with residual site-related soil and groundwater contamination unless they dig below the surface. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although sampling has indicated that impacts to indoor air are not a current concern, the potential exists to inhale contaminants in indoor air due to soil vapor intrusion in on-site building development and occupancy. Insufficient environmental information exists to evaluate the potential for soil vapor intrusion to occur in off-site areas.

NASSAU CO. AST: State and tribal registered storage tank lists

Facility ID:	001541
Tank ID:	0034
Tank Location:	Indoors, Aboveground
Capacity (Gal):	00005000
Description:	SODIUM HYDROXIDE
Date Permit Ends:	Not Reported
Tank Status:	In Service
Material Type:	Waste
Tank Material:	Fiberglass Reinforced Plastic
Internal Protection:	None
External Protection:	PAINTED [e.g. asphaltic]
Piping Type:	Other
Leak Detect:	ELECTRONIC
Containment:	DOUBLE WALL TANK
Product Gauge:	Yes
Dispense Method:	2
Fill Type:	Pumped
Install Date:	011996

RMP: Risk Management Plans
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

E DESIGNATION: E DESIGNATION SITE LISTING
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

ERP: Environmental Restoration Program Listing

Standard Environmental Record Source: State and tribal Brownfields sites

Search Distance: 0.333 Mile

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

RECORD SOURCES AND CURRENCY

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Last EDR Contact :02/03/2017

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

SEMS: Superfund Enterprise Management System

Standard Environmental Record Source: Federal CERCLIS

Search Distance: 0.333 Mile

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.125 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: 02/20/2007

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: 08/28/2009
Number of Days to Update: 55
Last EDR Contact :11/30/2012

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Engineering Progress

Matrix New World Engineering
Prospective Landowner And/Or User Questionnaire

Subject Property Name:	Westbury Parking Lot on Railroad Avenue
Subject Property Address:	Railroad and Post Avenues

QUESTION	YES	NO	UNK?
1. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property?		**X**	
2. Are you are aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the subject property?		**X**	
3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		**X**	
4. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?		**X**	
5. Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?		**X**	
6. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants?		**X**	
7. Are you aware of commonly known or reasonably ascertainable information about the property? For example: Do you know the past uses of the property?	**X**		
8. Do you know specific chemicals that are present or once were present at the property?		**X**	
9. Do you know of spills or other chemical releases that have taken place at the property?		**X**	
10. Do you know of environmental cleanups that have taken place at the property?		**X**	
11. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	X		
12. Has a title search been performed? If yes, please attach.			**X**
13. Is the property or has the property been used as a gasoline station, motor repair facility, commercial printing, dry cleaners, photo developing, landfill, industrial use, waste treatment or disposal facility?		**X**	
14. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals at the subject property?		**X**	
15. Are there currently any industrial drums or chemicals at the subject property?		**X**	
16. Are you aware of contaminated fill at the subject property? (i.e. Fill dirt from off-site.)		**X**	
17. Are there currently any pits, ponds, or lagoons in connection with waste disposal or treatment at the subject property?		**X**	
18. Are there any current or previous underground storage tanks or aboveground storage tanks at the subject property?		**X**	
19. Are there currently any vent pipes, fill pipes, or access ways protruding from the ground at the subject property?		**X**	
20. Is the subject property served by a private well and or a private septic system?			X
21. Does the property discharge industrial wastewater (excluding sanitary sewer)?		**X**	
22. Are there any monitoring wells at the subject property?	**X**

Map Panels

- Digital Data
- Unmodernized Maps
- Unmapped

This map complies with FEMA's standards for the use of digital flood maps. The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. The base map shown complies with FEMA's base map accuracy standards.

The NFHL is a living database, updated daily, and this map represents a snapshot of information at a specific time.

Flood risks are dynamic and can change frequently due to a variety of factors, including weather patterns, erosion, and new development. FEMA flood maps are continually updated through a variety of processes. Users should always verify through the Map Service Center (http://msc.fema.gov) or the Community Map Repository that they have the current effective information.

NFHL maps should not be created for unmapped or unmodernized areas.

LONG ISLAND RAILROAD EXPANSION PROJECT: SITE PROCUREMENT
SCALLY PLACE PARKING LOT
BLOCK 228, LOTS 12, 792, AND 793
VILLAGE OF WESTBURY, NASSAU COUNTY, NEW YORK
MATRIX NO. 16-144

Dear Mr. Aksman:

Matrix New World Engineering (Matrix) is pleased to present this Phase I Environmental Site Assessment (ESA) Report for the above referenced site.

This report summarizes the findings of the site reconnaissance, the review of historic and current uses of the site to identify contamination by hazardous substances or waste, the review of governmental databases, and the review of other pertinent data. No sampling or laboratory analysis of any media was performed as part of this Phase I ESA. As a result of the Phase I ESA, four Recognized Environmental Conditions (RECs) were identified on the site.

If you have any questions regarding the information contained in this report, please contact us at (973) 240-1800.

Sincerely,

Brian Crespi
Project Manager

Mindy Chassin Horowitz
Program Director

1.0 SUMMARY

Matrix New World Engineering, Land Surveying and Landscape Architecture, P.C. (Matrix) was retained by Gannett Fleming–AECOM Rail Road Expansion Partnership, a Joint Venture between Gannett Fleming Engineers and Architects, PC and AECOM USA, Inc. (the "JV") to provide environmental services to the Metropolitan Transportation Authority (MTA) and Long Island Rail Road (LIRR) in support of the proposed installation of a third track, railway grade crossing separations and/or closures and infrastructure improvements between the Floral Park Station and the Hicksville Station, known as the "LIRR Expansion Project".

As part of the project, Matrix has been retained to complete a Phase I Environmental Site Assessment (ESA) for a village-owned parking lot on Scally Place (Block 228, Lots 12, 792, and 793) in the Village of Westbury, Nassau County, New York, to be acquired as part of the project. The Phase I ESA has been performed in accordance with Attachment B of the LIRR's Technical Scope of Work (TSOW) for the LIRR Expansion Project from Floral Park to Hicksville (January 2016). The purpose of the Phase I ESA is to gather information to be used in the acquisition process. This Phase I ESA has been prepared in general accordance with the American Society for Testing and Materials (ASTM) Designation E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and ASTM Designation E 2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.* The following report summarizes the conclusions and opinions representing Matrix's best professional judgment based on information obtained during the Phase I ESA.

1.1 Site Summary

The Village of Westbury owns and operates a parking lot in the Village of Westbury, New York. The approximately 2.86-acre site is used as a parking lot and does not contain any structures. The site has been identified as a parking lot since around 1940, before which it was partially undeveloped with some commercial and residential structures in the south and southwest portions. The Village of Westbury has owned the majority of the Site since the 1930s and expanded the site through acquisition of a small portion of property on the west side through condemnation in 2005.

1.2 Recognized Environmental Conditions

Matrix performed a Phase I ESA of the site at Scally Place in Westbury, New York in general conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 6.3 of this report. This assessment has revealed the following four RECs in connection with the site:

- The properties adjoining the Site to the east, which are the rear portions of 333 and 345 Union Avenue are currently occupied by a contractor's yard and were previously a coal yard in 1968 (the exact dates are not

known) and a contractor's yard from at least 1920 through sometime prior to 1968. Based on these former and current uses, these facilities have the potential for a history of usage of petroleum products and chemicals that have the potential to migrate on to the Site and so it is recognized as an environmental concern.

- Union Oil, previously located at 333 Union Avenue, adjoining property to the east of the Site along Union Avenue, was listed on the New York State Leaking Storage Tanks (NY LTANKS), New York State Underground Storage Tank (NY UST) and New York State Spills (NY SPILLS) databases due to two closed spills. There were previously at least one 3,000-gallon unleaded gasoline tank and three 50,000-gallon and five 20,000-gallon #2 fuel oil USTs on-site, closed in 1988. Two spills, spill #8801831 concerning gasoline and spill number #8801206 concerning #2 fuel oil, occurred on-site and have subsequently been closed to the satisfaction of New York State Department of Environmental Conservation (NYSDEC). The NY LTANKS record indicates that NYSDEC files were destroyed. Due to the lack of available information about the extent of the remedial measures performed and former locations of the tanks relative to the Site, this facility has the potential for contamination to have migrated onto the Site.
- The property adjoining the Site to the west, currently an apartment building located at 130 Post Avenue, was previously a filling station with two underground storage tanks (USTs), as shown on the 1941 and 1968 Sanborn maps. This site is not listed in the databases researched and the status of the USTs is not known. Spills on this property could potentially have impacted the Site, due to its proximity.
- Vapor Encroachment Condition (VEC): A Tier 1 Vapor Encroachment Screen (VES) was completed by Matrix using EDR's Vapor Encroachment Screen Worksheet. Based on available information, a VEC could not be ruled out at the Site. Please see Section 4.5 below for further discussion on the Tier 1 VES.

A Recognized Environmental Conditions map is presented as Figure 5.

1.3 Controlled RECs

Controlled Recognized Environmental Conditions (CRECs) are recognized environmental conditions resulting from a past release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory authority with hazardous substance or petroleum products allowed to remain in place subject to the implementation of required controls. Matrix did not identify any CRECs, as defined by the ASTM Standard.

1.4 Historical RECs

Historical Recognized Environmental Conditions (HRECs) are recognized environmental conditions resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls. No HRECs were identified for the Site. Matrix did not identify any HRECs, as defined by the ASTM Standard.

1.5 De Minimis Conditions

No *de minimis* conditions were observed or identified through interviews or records review of current or historical uses of the Site and adjoining properties.

1.6 Other Findings

The term "other finding" is not defined by ASTM; rather, Matrix uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard. Although not a considered REC based on currently available information, Matrix identified the following other findings based on review of the historical automotive facilities database and the historical dry cleaning database. Sites within 0.1 miles of the Site and at a higher elevation were determined to have the potential to impact the Site should a spill have occurred. These facilities were not identified on any other databases and there are no records of spills or other known sources of contamination from these facilities.

- 159 Post Avenue is the location of a historical automotive body shop, and is 0.059 miles west of the Site at a higher elevation. There is no indication that there has been a spill or other source of contamination from the facility.
- 150 Linden Avenue is the location of a historical automotive technician's facility, and is 0.060 miles east of the Site at a higher elevation. There is no indication that there has been a spill or other source of contamination from the facility.
- 401 Railroad Avenue is the location of a historical automotive body shop, and is 0.082 miles east/southeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 165 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.105 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.

- 159 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.105 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 135 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.109 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 177 Post Avenue is the location of the historical dry-cleaning facility S & Shine Dry Cleaners Inc., and is 0.042 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 249 Maple Avenue is the location of the historical dry-cleaning facility Kim S Tailoring & Cleaners Corp., and is 0.088 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 247 Maple Avenue is the location of the historical dry-cleaning facility Chinese Laundry, and is 0.100 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 200 Post Avenue, formerly known as Sivam, Inc., Sammy's Store & Gas, Harry's Automotive and Sammy's Getty, located 0.087 miles northwest of the Site, and at a higher elevation relative to the Site was listed on the following databases: historical automotive, NY UST, the New York State Brownfield sites (NY ERP), Resource Conservation and Recovery Act (RCRA) Non-Generator (Non-Gen) and New York State Manifest (NY Manifest). Two USTs were previously removed and from observations made during the Site visit, this property has been remediated under the NYSDEC Environmental Restoration Program and is currently used as a park/public space. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding.

1.7 Significant Data Gaps

- To date, responses to most FOIL requests submitted have not been received. All responses will be forwarded upon receipt with recommendations, if necessary.
- The entirety of the Site was inspected during Matrix's walkthrough, though most of the Site was covered by parked cars, limiting a complete inspection.

1.8 Non-scope Considerations

Matrix did not identify any non-scope considerations.

2.0 INTRODUCTION

2.1 Purpose

This Phase I ESA Report has been prepared by Matrix for LIRR for the property located at Scally Place (Block 228, Lots 12, 792 and 793) in the Village of Westbury, Nassau County, New York (Site). The objective of the Phase I ESA is to evaluate whether current or historical practices associated with the Site or nearby properties have the potential to have created, or to create in the future, a Recognized Environmental Condition (REC) at the Site. The term REC is defined by ASTM Standard 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The Phase I ESA will also identify Controlled Recognized Environmental Conditions (CRECs) in connection with the Site. The term CREC is defined by ASTM Standard 1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory authority with hazardous substance or petroleum products allowed to remain in place subject to the implementation of required controls. Additionally, the Phase I ESA will identify any Historical Recognized Environmental Conditions (HRECs), which are defined by ASTM Standard 1527-13 as RECs resulting from a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls.

Historic information and current conditions and operations pertaining to the Site are addressed in this report.

2.2 Detailed Scope-of-Services

The scope of services for this project included a visual reconnaissance of the Site and neighboring properties; review of readily available Federal, state, and local regulatory records; examination of historic information and evaluation of current and past operations and activities on-site. Matrix reviewed/utilized historic aerial photographs, Sanborn Fire Insurance Maps, historic topographic maps, and city directories as part of the Phase I ESA. Additionally, a regulatory database search was conducted by Environmental Data Resources Inc. (EDR), of Shelton, Connecticut for information available in governmental databases. The EDR Radius Map Report is provided in Appendix A.

The Phase I ESA also included an initial vapor encroachment screening (VES) to determine if there is a potential for vapors to occur in the subsurface below existing and/or proposed on-site structures from those hazardous substances, petroleum and petroleum products that consist of volatile organic compounds (VOC), semi-volatile

organic compounds (SVOC) and inorganic volatile compounds. The VES meets the Tier 1 "non-invasive" screening requirements of ASTM E2600-15, and is provided in Appendix H.

2.3 Significant Assumptions

Information and records provided by the client, government agencies, and outside vendors retained by Matrix are assumed to be correct and complete.

2.4 Limitations and Exceptions

This Phase I ESA has been prepared for the exclusive use of MTA, LIRR and the JV. It represents a professional opinion and judgment based on information supplied by the present owner of the Site, information collected by Matrix, and additional data and information provided by governmental agencies. Matrix only warrants that it provides services in accordance with generally-accepted practices in the engineering/environmental site assessment field. No other warranty or representation, either expressed or implied, is included or intended as part of its services, proposals, contracts, or reports. Matrix cannot guarantee, certify, or warrant that the Site is, or is not, free of environmental impairment/liabilities without conducting a site-specific subsurface investigation involving soil and groundwater laboratory analyses. Even with such a program, the data and samples from any given soil boring or monitoring well will indicate conditions that exist only at that location, and may not necessarily apply to the Site as a whole.

In preparing this report, Matrix has relied on certain information provided by Federal, state, and local officials and other parties referenced herein, and on file of government agencies and others that were readily available at the time of this assessment. Although there may have been overlap of this information provided by these various sources, Matrix did not attempt to independently verify the accuracy or completeness of information reviewed or received during the course of this Phase I ESA.

Observations were made on all portions of the Site as indicated in the report. During the site reconnaissance, cars were parked in almost all parking spaces within the Site, covering the vast majority of the property, and is noted as a limitation.

As part of this assessment, Matrix submitted requests for information via the Freedom of Information Law (FOIL) to various governmental agencies. As of the preparation of this report, these requests have not been entirely fulfilled. The conclusions of this report are subject to change upon receipt of a response from these FOIL requests.

Mold, indoor air quality, asbestos, and lead-based paint surveys are excluded from the scope of this report.

2.5 Special Terms and Conditions

There are no special terms or conditions to the content of the report that are in addition to the scope outlined in Section 2.2.

2.6 User Reliance

This Phase I ESA was performed at the client's request utilizing a format consistent with the table of contents and report format specified in ASTM E 1527-13 Appendix X4.

This assessment is intended, where applicable to the standard of care, to satisfy the requirements of the ASTM Standard Practice for Environmental Site Assessments, as published in ASTM E1527-13. The independent conclusions represent the best professional judgment of the Environmental Professional based on the conditions that existed and the information and data available to Matrix during the course of this assignment. Factual information regarding operations and conditions provided by the Client, owner, or the representative has been assumed to be correct and complete. The report may be distributed and relied upon by LIRR. Reliance on the information and conclusions presented in this report by other party(ies) is not authorized by Matrix, unless specifically stated.

3.0 SITE DESCRIPTION

On March 6, 2017, Jordan Farber, Environmental Scientist of Matrix, conducted a site reconnaissance to evaluate current land usage and identify any RECs that may be present throughout accessible portions of the Site and surrounding areas. Appendix B contains photographs taken during the site reconnaissance.

3.1 Location and Legal Description

The Site is located at Scally Place in the Village of Westbury, Nassau County, New York. The Site consists of three parcels (Block 228, Lots 12, 792, and 793) which together make up one large parking lot.

The Site consists of approximately 2.86 acres (124,382 square feet). The Site is geographically located at 40° 45' 15.85" north latitude and 73° 35' 11.91" west longitude on the Hicksville, New York, U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle. A Regional Location Map and Topographic Map depicting the Site are presented as Figures 1 and 2, respectively. A Tax Map is presented as Figure 3, and a Site Plan map is presented as Figure 4.

3.2 Site General Characteristics

The entirety of the Site is used as a parking lot.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Topography		
Elevation (above mean sea level)	USGS topographic map (Hicksville, New York, 2013); Google Earth	Ranges from approximately 98 feet at the southern portion of the Site to 107 feet at the northern portion. The eastern and western portions of the Site are approximately 105 feet above mean sea level (amsl).
Topographic Gradient	USGS topographic map; visual observations	Relatively flat on-site, with a gentle downward slope to the south. Regional topography slopes gently downward to the south/southwest toward various bays and outlets into the Atlantic Ocean.
Hydrology		
Surface Water Runoff	Visual observations	Percolates into the ground surface at unpaved areas or enters catch basins that discharge to the municipal storm sewer system.
Nearest Surface Water Body to the Site	Google Earth; Visual observations	Old Westbury Pond, located approximately 1.8 miles to the north at its nearest point. Larger bodies of water, and eventually the Atlantic Ocean, are located far south of the Site.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Flood Plain	FEMA*	Facility personnel reported no known occurrences of flooding at the site. The site is not located within a 500-year flood zone. The FEMA Flood Insurance Rate Map (FIRM) is included in Appendix K.
Wetlands	NWI*; Visual observations	There are no federally-designated wetlands on-site and Matrix did not identify any suspected wetlands during the site visit.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	USGS topographic map	Based on the topographic gradient and the relative direction of the Atlantic Ocean, shallow groundwater likely flows to the south/southwest.
Depth to Groundwater	USGS	Specific information regarding depth to shallow groundwater was not readily available, but is expected to be at least 21 feet below ground surface, based on the USGS Long Island Depth to Groundwater Viewer[1]
On-site Wells	Visual observations	There are no production, monitoring, or injection wells on-site.
Nearest Groundwater Supply Wells	EDR database report	There are no federally registered public groundwater supply wells within a one-mile radius of the Site.
Geologic Conditions	NCSS*	Regional soils are identified as Urban land.
Site Utility Information		
Heating and Cooling Equipment	Visual observations	There are no interior areas and thus no heating or cooling equipment associated with the Site.
Electricity Supplier	Facility personnel	There is no electricity service at this site.
Natural Gas Supplier	Visual observations	There is no natural gas service at the site.
Use of Fuel Oil for Building Heat	Facility personnel	No current or former use of fuel oil reported.
Water Supplier	Visual observations	Village of Westbury water lines run along Scally Place and Union Avenue, but do not currently service the Site.
Sanitary Sewer	Visual observations	There are no sanitary sewers on Site. There are sanitary sewers along Union Avenue, south of the Site.
Stormwater System	Visual observations	Stormwater catch basins were observed in the southwest, northwest, and northeast portions of the Site. Stormwater is handled by Nassau County Sewage Disposal District #3.

Table 1: Physical Setting and Utility Information		
Conditions	**Source**	**Description**
Septic Systems	Facility personnel; Nassau County Property Card	No current septic systems reported. A septic system or cesspool was recorded on the 1938 property card.

Notes:

FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey; NWI = National Wetlands Inventory

* - Source was provided in the EDR database report.

1 - https://ny.water.usgs.gov/maps/li-dtw10/.

3.3 Current Use of the Property

The Site is currently owned by the Village of Westbury and is currently occupied by a parking lot.

3.4 Description of Structures, Roads, Other Improvements On-Site

The Site consists of three tax parcels which together make up one large, asphalt-paved parking lot.

3.5 Current Uses of the Adjoining Properties

The property is located in a mixed industrial/residential/commercial land use area. The nearest residential area is an apartment complex that borders the western edge of the target property boundary. Based on discussions with facility personnel, Matrix's visual observations from the property boundary and public rights-of-way, and a limited review of publicly available information, a general determination of the current use of adjacent properties was developed, as described Table 2.

Table 2: Current Use of Adjacent Properties		
Direction	**Property/Land Use**	**Matrix's Observations**
North	Scally Place, beyond which are town houses to the northeast and commercial properties to the northwest.	No notable concerns
East	All Seasons Transportation, a contractor's yard, and Genesis Assembly of God to the east.	The contractor's yard potentially stores and uses unknown petroleum products and chemicals.
South	Union Avenue, beyond which is the LIRR, Westbury Station.	Four transformers are mounted on the telephone poles on the sidewalk of Union Avenue.

Table 2: Current Use of Adjacent Properties		
Direction	**Property/Land Use**	**Matrix's Observations**
West	Westbury Animal Hospital, a commercial/residential complex, a parking lot, and various commercial shops to the west.	No concerns are presumed to be associated with those areas.
Notes: During the site visit, Matrix walked or drove by the borders of these properties that are shared with the subject site. Matrix did not enter the neighboring properties.		

3.6 Reason for Performing Phase I

Matrix was retained by the JV to perform a Phase I ESA as part of a due diligence evaluation prior to property acquisition.

3.7 Other

No additional information regarding the Site was provided.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

A regulatory review of the Site and surrounding area was conducted through a search by EDR dated March 1, 2017. The review included inquiries into databases maintained by USEPA, as well as state agencies. A brief description of each database and the search results obtained during the Phase I ESA is presented below. The EDR Radius Map Report in its entirety is attached as Appendix A. The search was conducted in general accordance with ASTM E 1527-13 standards. The Site was not identified on any databases searched by EDR.

DATABASE SEARCH SUMMARY

Database	Search Distance (Miles)	Site Listed	Properties listed within a one-eighth-mile (0.125) radius	Surrounding Properties Listed

Federal Records

1. Superfund Enterprise Management System (SEMS): SEMS tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites

which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. The SEMS database is administered by the EPA.

The Site was not identified on the SEMS database.

One SEMS facility, Bartlett Tree Company, was identified within a ⅛-mile radius of the Site. Bartlett Tree Company (EPA ID# NY0001408749) is located at 345 Union Avenue, 0.023 miles from the Site, and is at a lower elevation relative to the Site. Based on this information, there is limited potential for impact to the Site from this SEMS facility. No SEMS facilities were identified beyond a ⅛-mile radius of the Site. The SEMS data was last updated on October 10, 2016 (EDR Inc., 2017).

2. Corrective Action Report (CORRACTS): CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. The CORRACTS database is administered by the EPA.

   The Site was not identified on the CORRACTS database.

   No facilities were identified within a ⅛-mile radius of the Site. One CORRACTS facility, Vishay General Semiconductor Inc., was identified between a ⅛-mile and ¼-mile radius from the Site. Vishay General Semiconductor Inc. (EPA ID# NYD000348474) is located at 172 Spruce Street, 0.140 miles from the Site, and is at a higher elevation relative to the Site. Based on this information, there is limited potential for impact to the Site from this CORRACTS facility. The CORRACTS data was last updated on December 12, 2016 (EDR Inc., 2017).

3. Resource Conservation and Recovery Act (RCRA) - Small Quantity Generators (SQG): The RCRA-SQG database is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. The RCRA-SQG database is administered by the EPA.

   The Site was not identified on the RCRA-SQG database.

   No facilities were identified within a ⅛-mile radius of the Site. One RCRA-SQG facility, Westbury Quality D-C Inc., was identified between a ⅛-mile and ¼-mile radius from the Site. Westbury Quality D-C Inc. (EPA ID# NYD981486350) is located at 179A School Street, 0.228 miles from the Site, and is at a higher elevation relative to the Site. Westbury Quality D-C Inc. is identified as a historical generator of chromium waste (D007), lead waste (D008), tetrachloroethylene waste (D039), trichloroethylene waste (D040), and other spent halogenated solvents (F002). No violations were found. Based on this information there is limited potential for impact to the Site from this RCRA-SQG facility. The RCRA-SQG data was last updated on December 12, 2016 (EDR Inc., 2017).

4. Resource Conservation and Recovery Act (RCRA)-Conditionally Exempt Small Quantity Generator (CESQG): The RCRA-CESQG database is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. The RCRA-CESQG database is administered by the EPA.

The Site was not identified on the RCRA-CESQG database.

Three RCRA-CESQG facilities were identified within a ⅛-mile radius of the Site.

- Len-Tone Auto Inc. (EPA ID# NYD982742579) is located at 401 Railroad Avenue, 0.082 miles from the Site, and at a lower elevation relative to the Site. Len-Tone Auto Inc. is identified as a historical generator of ignitable waste (D001), methyl ethyl ketone waste (D035), and other spent non-halogenated solvents (F003 and F005). No violations were found in connection with this facility. Based on this information there is limited potential for impact to the Site from this RCRA-CESQG facility.
- Rite Aid #4768 (EPA ID# NYR000190751) is located at 210 Post Avenue, 0.091 miles from the Site, and at a higher elevation relative to the Site. Rite Aid #4768 is identified as a historical generator of ignitable waste (D001), corrosive waste (D002), chromium waste (D007), mercury waste (D009), selenium waste (D010), silver waste (D011), chloroform waste (D022 and U044)), m-cresol waste (D024), cresol waste (D026), salts and others (P001 and P075), formaldehyde waste (U122), phenol waste (U188), 1,3-benzenediol waste (U201), and carbaryl waste (U279). No violations were found. Based on this information there is limited potential for impact to the Site from this RCRA-CESQG facility.
- New York Telephone Co. (EPA ID# NYD987030582) is located on Railroad Avenue, 0.098 miles from the Site, and at a lower elevation relative to the Site. New York Telephone Co. is identified as a historical generator of ignitable waste (D001), corrosive waste (D002), benzene waste (D018), and tetrachloroethylene waste (D039). No violations were found. Based on this information there is limited potential for impact to the Site from this RCRA-CESQG facility. Two RCRA-CESQG facilities were identified between a ⅛-mile and ¼-mile radius from the Site. Based on this information there is limited potential for impact to the Site from these RCRA-CESQG facilities. The RCRA-CESQG data was last updated on December 12, 2016 (EDR Inc., 2017).

State Records

5. New York State Hazardous Waste Site (NYSHWS): The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the NYSDEC's Inactive Hazardous Waste Disposal Sites in New York State.

   The Site was not identified on the NYSHWS database.

   Two NYSHWS facilities were identified within a ⅛-mile radius of the Site. Bartlett Tree Company (EPA ID# NY0001408749) is located at 345 Union Avenue, 0.023 miles from the Site, and is at a lower elevation relative to the Site. The hazardous wastes identified with the facility includes pesticides chlordane, DDD, DDE, lindane, DDT, dieldrin, aldrin, and alpha-BHC. Soil and groundwater contamination were detected and have been remediated. This facility has been properly closed and requires continued management. Based on this information there is limited potential for impact to the Site from this NYSHWS facility. The second identified NYSHWS facility is located at 123 Post Avenue, 0.098 miles from the Site, and is at a lower elevation relative to the Site. The hazardous waste identified with the facility include tetrachloroethylene (PCE; F002), 1,1-dichloroethene, 1,1,2-trichloroethane, dichloroethylene, and trichloroethene (TCE). This facility has known soil, groundwater, soil vapor, and indoor air contamination and is listed on the registry of inactive hazardous waste disposal sites as a Class 2 site, representing a significant threat to human health and the environment. Based on the facility's lower elevation relative to the Site, there is limited potential for impact to the Site from this NYSHWS facility. No NYSHWS facilities were identified beyond a ⅛-mile radius of the Site. The NYSHWS data was last updated on November 14, 2016 (EDR Inc., 2017).

6. New York Sold Waste Facilities/Landfill (NY SWF/LF) Sites: SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The SWF/LF database is administered by the DEC.

   The Site was not identified on the NY SWF/LF database.

   No NY SWF/LF facilities were identified within a ⅛-mile radius of the Site. Two NY SWF/LF facilities were identified beyond a ⅛-mile radius of the Site. Based on this information there is limited potential for impact to the Site from these NY SWF/LF facilities. The NY SWF/LF data was last updated on January 4, 2017 (EDR Inc., 2017).

7. New York Leaking Storage Tanks (NY LTANKS): These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. The NY LTANKS database is administered by the NYSDEC.

   The Site was not identified on the NY LTANKS database.

   The following eight NY LTANKS facilities were identified within a ⅛-mile radius of the Site, all with tanks associated with petroleum products:
   - Union Oil, located at 333 Union Avenue, adjoining the Site on the east side, along Union Avenue, and at a lower elevation relative to the Site; 3,000-gallon unleaded gasoline tank; spill #8801831 occurred 05/27/1988 due to tank test failure and the spill was closed on 06/14/1988. This facility is also listed on the UST and NY Spills databases. The LTANKS record indicates that the NYSDEC file has been destroyed. This facility is considered a REC.
   - Glen Oaks Country Club, located at 175 Post Avenue, 0.030 miles from the Site, and at a higher elevation relative to the Site; gasoline tank; spill #8911413 occurred 03/03/1990 due to tank test failure and the spill was closed on 04/04/90. Due to the closed status, there is limited potential for impact to the Site.
   - Residence, located at 179 Post Avenue, 0.043 miles from the Site, and at a higher elevation relative to the Site; #2 fuel oil tank; spill #9408406 occurred 09/24/1994 due to tank overfill. The fuel oil spilled onto a concrete floor, was cleaned up with SpeediDri and the spill was closed on 09/27/1994. Due to the closed status, there is limited potential for impact to the Site.
   - Medical Repair Lab, located at 141 Linden Avenue, 0.044 miles from the Site, and at a higher elevation relative to the Site; #2 fuel oil tank (2 gallons); spill occurred 03/15/1995 due to tank overfill. Based on the small quantity spilled, there is limited potential for impact to the Site.
   - Three listings associated with the Westbury Fire Department:
     - Westbury Fire, located at 355 Maple Avenue, 0.085 miles from the Site, and at a higher elevation relative to the Site; diesel tank; spill occurred 12/01/2006 due to tank test failure.
     - Westbury Fire District, located at Maple Avenue, 0.106 miles from the Site, and at a higher elevation relative to the Site; #2 fuel oil tank; spill occurred 03/07/1988 due to tank test failure.
     - Westbury Fire Department, located at Maple Avenue and Linden Avenue, 0.120 miles away from the Site, and at a higher elevation relative to the Site; diesel tank; spill occurred 01/03/1992 due to tank test failure.

   Based on the distance of the facility from the Site, there is limited potential for impact to the Site.

- NYNEX Building, located at 220 Maple Avenue, 0.125 miles from the Site, and at a higher elevation relative to the Site; spill occurred 04/22/1994 and 07/25/2007 due to tank test failure. Based on the distance of the facility from the Site, there is limited potential for impact to the Site.

Based on this information there is potential for impact to the Site from the Glen Oaks Country Club (175 Post Avenue) and Residence (179 Post Avenue) NY LTANKS facilities.

Seventeen NY LTANKS facilities were identified beyond a ⅛-mile radius of the Site. Based on their distance from the Site, there is limited potential for impact to the Site from these facilities. The NY LTANKS data was last updated on February 6, 2017 (EDR Inc., 2017).

8. New York Underground Storage Tank (NY UST): The NY UST database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

   The Site was not identified on the NY UST database.

   The following seven NY UST facilities were identified within a ⅛-mile radius of the Site:
   - Union Oil Co., located at 333 Union Avenue, 0.008 miles from the Site, and at a lower elevation relative to the Site; UST removed.
   - Horizon at Westbury, located 130 Post Avenue, 0.028 miles from the Site, and at a higher elevation relative to the Site; UST removed.
   - Westbury Terrace Condo., located at 135 Post Avenue, 0.066 miles from the Site, and at a lower elevation relative to the Site; UST active.
   - Auto Tique II, located at 401 Railroad Avenue, 0.082 miles from the Site, and at a lower elevation relative to the Site; UST active.
   - Westbury Fire Department HQ, located at 355 Maple Avenue, 0.085 miles from the Site, and at a higher elevation relative to the Site; two USTs removed, two active USTs. This facility is also listed three times on the LTANKS database. Based on the distance of the facility from the Site, there is limited potential for impact to the Site.
   - Sivam, Inc. (also known as Sammy's Store & Gas, Harry's Automotive and Sammy's Getty), located at 200 Post Avenue, 0.087 miles from the Site, and at a higher elevation relative to the Site; two USTs removed. This facility is also listed on the following databases: ERP, NY UST, RCRA Non-Gen and NY Manifest. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding.
   - Verizon, located at 220 Maple Avenue, 0.125 miles from the Site, and at a higher elevation relative to the Site; one UST removed, one active UST.

   Based on this information there is potential for impact to the Site from these NY UST facilities should a release occur. Releases have been reported at the Westbury Fire Department; although, based on its distance from the Site, there is limited potential for impact to the Site.

   Three NY UST facilities were identified beyond a ⅛-mile radius of the Site based on their relative distances from the Site, there is limited potential for impact to the Site. The NY UST data was last updated on December 28, 2016 (EDR Inc., 2017).

9. New York Aboveground Storage Tank (NY AST): The NY AST database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

The Site was not identified on the NY AST database.

Two NY AST facilities were identified within a ⅛-mile radius of the Site. One facility, located at 333 Maple Avenue, is 0.086 miles from the Site, at a higher elevation relative to the Site, and contains an active AST. There are no spills or other listings associated with this facility. The other NY AST facility, Jak Auto Repair, Inc., is located at 158 Sullivan Lane, 0.113 miles from the Site, at a higher elevation relative to the Site, and contains a 275-gallon waste oil AST with a permit expiration date of 10/01/2016. There are no spills or other listing associated with this facility. Based on this information there is limited potential for impact to the Site from these NY AST facilities. Five NY AST facilities were identified beyond a ⅛-mile radius of the Site. The NY AST data was last updated on December 28, 2016 (EDR Inc., 2017).

10. New York Environmental Restoration Program (NY ERP): Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities for sites with histories of environmental contamination. Once remediated, the property may then be reused for commercial, industrial, residential, or public use. The NY ERP database is administered by the DEC.

    The Site was not identified on the NY ERP database.

    One NY ERP facility, Sammy's Getty Station, was identified within a ⅛-mile radius of the Site. Sammy's Getty Station is located at 200 Post Avenue, 0.087 miles from the Site, and is at a higher elevation relative to the Site. This facility is also listed on the following databases: HIST AUTO, NY UST, RCRA Non-Gen and NY Manifest. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding. No NY ERP facilities were identified beyond a ⅛-mile radius of the Site. The NY ERP data was last updated on November 14, 2016 (EDR Inc., 2017).

Other Ascertainable Records

11. US BROWNFIELDS: The US BROWNFIELDS database is a listing of Brownfields sites. Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. The US BROWNFIELDS database is administered by the EPA.

    The Site was not identified on the US BROWNFIELDS database.

    No US BROWNFIELDS facilities were identified within a ⅛-mile radius of the Site. Three US BROWNFIELDS facilities were identified beyond a ⅛-mile radius of the Site. Based on this information there is limited potential for impact to the Site from these US BROWNFIELDS facilities. The US BROWNFIELDS data was last updated on December 19, 2016 (EDR Inc., 2017).

12. NY SPILLS: NY SPILLS is a spills information database. Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date. The NY SPILLS database is administered by the DEC.

The Site was not identified on the NY SPILLS database.

Twenty-seven NY SPILLS facilities were identified within a ⅛-mile radius of the Site, with 12 of them at a lower or equal relative elevation to the Site. The remaining 15 NY SPILLS facilities identified within a ⅛-mile radius of the Site are as follows:

- Union Oil located at 333 Union Avenue, adjoining property to the east of the Site along Union Avenue; #2 fuel oil, spill number #8801206, spill occurred 05/07/1988; closed 10/14/2011. The spill occurred when three 50,000 and five 20,000 gallon USTs were being abandoned. The record notes indicate that wells were being installed in 1988. Based on the closed status of the spill, this facility is not considered a REC.
- Josa Pal Associates located at 357 Scally Place, 0.012 miles east/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 1109370, closed 12/02/2011.
- Wheatly Hills Discount located at 193 Post Avenue, 0.059 miles northwest of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 9801383, closed 08/11/1998.
- Located at Post Avenue and Maple Avenue, 0.061 miles northwest of the Site, at a higher elevation relative to the Site; waste oil/used oil, spill number 9501941, closed 02/12/1998.
- Residence located at 302 Maple Avenue, 0.064 miles north/northwest of the Site, at a higher elevation relative to the Site; transformer oil, spill number 1603296, closed 07/18/2016.
- Residence located at Post Avenue and Maple Avenue, 0.075 miles north/northwest of the Site, at a higher elevation relative to the Site; gasoline, spill number 9001394, closed 11/14/1990.
- Located at 210 Post Avenue, 0.091 miles north/northwest of the Site, at a higher elevation relative to the Site; solvents, spill number 0202756, closed 06/14/2002.
- Unknown Truck located at Linden Avenue and South Maple Avenue, 0.095 miles northeast of the Site, at a higher elevation relative to the Site; motor oil, spill number 8901181, closed 06/08/1989.
- JWP Budin Co. located at Maple Avenue and Linden Avenue, 0.095 miles northeast of the Site, at a higher elevation relative to the Site; waste oil/used oil, spill number 9205546, closed 02/03/1993.
- Residence located at 233 Butler Street, 0.099 miles west of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 8907411, closed 07/03/1990; #2 fuel oil, spill number 8907184, closed 08/21/1991.
- Residence located at 165 Sullivan Lane, 0.105 miles east/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 0101167, closed 02/11/2004.
- Residence located at 350 Madison Street, 0.109 miles north/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill 0611952, closed 01/29/2007.
- Associated Fabricati located at 415 Railroad Avenue, 0.118 miles east/southeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 9400101, closed 09/29/1995.
- Residence located at 219 Butler Street, 0.121 miles west of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 1110061, closed 12/02/2011.
- Residence located on Madison Street, 0.123 miles north/northeast of the Site, at a higher elevation relative to the Site; #2 fuel oil, spill number 9415722, closed 03/22/1995.
- Nynex Building located at 220 Maple Avenue, 0.125 miles west/northwest of the Site, at a higher elevation relative to the Site; kerosene, spill number 9704168, closed 10/16/1997.

These 15 spills listings have all been closed to the satisfaction of NYSDEC. Based on this information there is limited potential for impact to the Site from these NY SPILLS facilities. The NY SPILLS data was last updated on February 6, 2017 (EDR Inc., 2017).

13. Resource Conservation and Recovery Act (RCRA) Non-Generators / No Longer Regulated (NonGen / NLR): RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate,

transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. The RCRA NonGen / NLR database is administered by the EPA.

The Site was not identified on the RCRA NonGen / NLR database.

The following six RCRA NonGen / NLR facilities were identified within a ⅛-mile radius of the Site:

- Bartlett Tree Company (EPA ID# NY0001408749), located at 345 Union Avenue, 0.023 miles from the Site, and at a lower elevation relative to the Site; historically a large quantity generator with waste codes P037 (dieldrin), P051 (endrin), U060 (DDD), U061 (DDT), and U129 (lindane).
- Senator Printing Corp. (EPA ID# NYD002057974), located at 134 Linden Avenue, 0.063 miles from the Site, and at a lower elevation relative to the Site; not a historical generator.
- Franks Auto Body Inc. (EPA ID# NYD981130040), located at 340 Maple Avenue, 0.073 miles from the Site, and at a higher elevation relative to the Site; historically, this facility identified with a large quantity generator with no associated waste codes, and since 1999 the facility has not been identified with a generator.
- Harrys Automotive (EPA ID# NYD987029766), located at 200 Post Avenue, 0.087 miles from the Site, and at a higher elevation relative to the Site; according to the 10/04/1993 report, the facility was historically associated with a conditionally exempt small quantity generator with associated waste codes D000, D001 (ignitable), D008 (lead), D018 (benzene), D039 (PCE), F001 and F002 (spent halogenated solvents), F003, F004, and F005 (spent nonhalogenated solvents), according to the 01/31/1994 report, the facility was associated with a large quantity generator, and since the 03/12/1996 report, the facility has not been associated with a generator. This facility is also listed on the following databases: HIST AUTO, NY UST, ERP and NY Manifest. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding.
- Jolea Ent LTD DBA Westbury Valet (EPA ID# NYD121843098), located at 123 Post Avenue, 0.098 miles from the Site, and at a lower elevation relative to the Site; according to the 12/24/1985 report, the facility was historically associated with a large quantity generator with associated waste code F002 (spent halogenated solvents), and since the 02/29/1996 report, the facility has not been associated with a generator.
- J & J Auto Truck Repair (EPA ID# NYD986981215), located at 135 Sullivan Lane, 0.109 miles from the Site, and at a higher elevation relative to the Site; according the 11/21/1991 report, the facility was associated with a small quantity generator with associated waste codes D001 (ignitable), D008 (lead), D018 (benzene), and D039 (PCE), and since the 07/08/1999 report, the facility has not been associated with a generator.

Based on this information there is limited potential for impact to the Site from these RCRA NonGen / NLR facilities. Three RCRA NonGen / NLR facilities were identified beyond a ⅛-mile radius of the Site. The RCRA NonGen / NLR data was last updated on December 12, 2016 (EDR Inc., 2017).

14. Formerly Used Defense Sites (FUDS): The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. The FUDS database is administered by the U.S. Army Corps of Engineers.

    The Site was not identified on the FUDS database.

    No FUDS facilities were identified within a ⅛-mile radius of the Site. One FUDS facility was identified 0.734 miles from the Site. Based on this information there is limited potential for impact to the Site from this FUDS facility. The FUDS data was last updated on January 31, 2015 (EDR Inc., 2017).

15. Unexploded Ordnance (UXO) Sites: The UXO database is a listing of unexploded ordnance site locations. The UXO database is administered by the U.S. Department of Defense.

    The Site was not identified on the UXO database.

    No UXO facilities were identified within a ⅛-mile radius of the Site. One UXO facility was identified 0.734 miles from the Site. Based on this information there is limited potential for impact to the Site from this UXO facility. The UXO data was last updated on October 25, 2016 (EDR Inc., 2017).

16. NY DRYCLEANERS: The NY DRYCLEANERS database is a listing of all registered drycleaning facilities. The NY DRYCLEANERS is administered by the NYSDEC.

    The Site was not identified on the NY DRYCLEANERS database.

    One NY DRYCLEANERS facility, Westbury Valet/Top Cleaners, was identified within a ⅛-mile radius of the Site. Westbury Valet/Top Cleaners is located at 123 Post Avenue, 0.098 miles from the Site, and at a lower elevation relative to the Site. Based on this information there is limited potential for impact to the Site from this NY DRYCLEANERS facility. One NY DRYCLEANERS facility, Quality Cleaner of Westbury, was identified 0.208 miles from the Site. The NY DRYCLEANERS data was last updated on October 27, 2016 (EDR Inc., 2017).

17. NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a Treatment, Storage, and Disposal (TSD) facility. The NY MANIFEST database is administered by the DEC.

    The Site was not identified on the NY MANIFEST database.

    The following nine NY MANIFEST facilities were identified within a ⅛-mile radius of the Site:
    - Bartlett Tree Company (EPA ID# NY0001408749), located at 345 Union Avenue, 0.023 miles east/southeast of the Site, at a lower elevation relative to the Site.
    - Senator Printing Corp. (EPA ID# NYD002057974), located 134 Linden Avenue, 0.063 miles east of the Site, at a lower elevation relative to the Site.
    - Franks Auto Body Inc. (EPA ID# NYD981130040), located at 340 Maple Avenue, 0.073 miles north of the Site, at a higher elevation relative to the Site.
    - Len-tone Auto Inc. (EPA ID# NYD982742579), located at 401 Railroad Avenue, 0.082 east/southeast of the Site, at a lower elevation relative to the Site.
    - Harrys Automotive (EPA ID# NYD987029766), located at 200 Post Avenue, 0.087 miles north/northwest of the Site, at a higher elevation relative to the Site.
    - Rite Aid #4768 (EPA ID# NYR000190751), located at 210 Post Avenue, 0.091 miles north/northwest of the Site, at a higher elevation relative to the Site.
    - New York Telephone Co. (EPA ID# NYD987030582), located on Railroad Avenue, 0.098 miles south/southwest of the Site, at a lower elevation relative to the Site.
    - Westbury Valet/Top Cleaners (EPA ID# NYD013374129), located at 123 Post Avenue, 0.098 miles southwest of the Site, at a lower elevation relative to the Site.
    - J & J Auto Truck Repair (EPA ID# NYD986981215), located at 135 Sullivan Lane, 0.109 miles east/northeast of the Site, at a higher elevation relative to the Site.

    There is limited potential for impact to the Site from these NY MANIFEST facilities. Six NY MANIFEST facilities were identified beyond a ⅛-mile radius of the Site. There is limited potential for impact to the Site

from these NY MANIFEST facilities. The NY MANIFEST data was last updated on January 30, 2017 (EDR Inc., 2017).

18. RI MANIFEST: The RI MANIFEST database provides hazardous waste manifest information. The RI MANIFEST database is administered by the Rhode Island Department of Environmental Management.

    The Site was not identified on the RI MANIFEST database.

    No RI MANIFEST facilities were identified within a ⅛-mile radius of the Site. One RI MANIFEST facility, Westbury Quality D-C Inc., was identified 0.228 miles from the Site. There is limited potential of impact to the Site from this RI MANIFEST facility. The RI MANIFEST was last updated on December 31, 2013 (EDR Inc., 2017).

19. PA MANIFEST: The PA MANIFEST database provides hazardous waste manifest information. The PA MANIFEST database is administered by the Pennsylvania DEP.

    The Site was not identified on the PA MANIFEST database.

    One PA MANIFEST facility, Rite Aid 4768, was identified within a ⅛-mile radius of the Site. Rite Aid 4768 (EPA ID# NYR000190751) is located at 210 Post Avenue, 0.091 miles from the Site, and at a higher elevation relative to the Site. This facility generates hazardous waste associated with waste codes D002 (corrosive waste) and P001 (salts and others). There is potential for impact to the Site from this PA MANIFEST facility should a release occur. No PA MANIFEST facilities were identified beyond a ⅛-mile radius of the Site. The PA MANIFEST data was last updated on December 31, 2015 (EDR Inc., 2017).

20. NJ MANIFEST: The NJ MANIFEST database provides hazardous waste manifest information. The NJ MANIFEST database is administered by the New Jersey DEP.

    The Site was not identified on the NJ MANIFEST database.

    Two NJ MANIFEST facilities were identified within a ⅛-mile radius of the Site. Bartlett Tree Company (EPA ID# NY0001408749) is located at 345 Union Avenue, 0.023 miles from the Site, and at a lower elevation relative to the Site, and is associated with waste codes U060 (DDD) and U061 (DDT). Len-Tone Auto Inc. (EPA ID# NYD982742579) is located at 401 Railroad Avenue, 0.082 miles from the Site, and at a lower elevation relative to the Site, and is associated with waste code F003. Based on this information there is limited potential for impact to the Site from these NJ MANIFEST facilities. One NJ MANIFEST facility, Vishay General Semiconductor Inc. (EPA ID# NYD000348474), was identified 0.140 miles from the Site, and associated with waste code D002 (corrosive waste). There is limited potential for impact to the Site from this NJ MANIFEST Facility. The NJ MANIFEST data last updated on December 31, 2015 (EDR Inc., 2017).

21. EDR Hist Auto: The EDR Hist Auto database is EDR's list of historic gas stations. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create

environmental concerns, but may not show up in current government records searches. The EDR Hist Auto database is administered by EDR, Inc.

The Site was not identified on the EDR Hist Auto database.

Nine EDR Hist Auto facilities were identified within a ⅛-mile radius of the Site. Of these, three were located at a higher elevation relative to the Site and within 0.1 mile from the Site, as follows:

- 159 Post Avenue, 0.059 miles from the Site, at a higher elevation relative to the Site.
- 150 Linden Avenue, 0.060 miles from the Site, at a higher elevation relative to the Site.
- 200 Post Avenue, 0.087 miles from the Site, at a higher elevation relative to the Site. This facility is also listed on the following databases: NY UST, ERP, RCRA Non-Gen and NY Manifest. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding.

Based on this information there is potential for impact to the Site from these EDR Hist Auto facilities should a spill/release occur. No EDR Hist Auto facilities were identified beyond a ⅛-mile radius of the Site. The EDR Hist Auto data is updated internally by EDR, Inc.

22. EDR Hist Cleaner: The EDR Hist Cleaner data is EDR's list of exclusive historic dry cleaners. EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches. The EDR Hist Cleaner database is administered by EDR, Inc.

    The Site was not identified on the EDR Hist Cleaner database.

    Four EDR Hist Cleaner facilities were identified within a ⅛-mile radius of the Site, with the following three at a higher elevation relative to the Site:

    - 177 Post Avenue, 0.042 miles from the Site, at a higher elevation relative to the Site.
    - 249 Maple Avenue, 0.088 miles from the Site, at a higher elevation relative to the Site.
    - 247 Maple Avenue, 0.100 miles from the Site, at a higher elevation relative to the Site.

    Based on the assumed ground water flow direction of south/southwest, these facilities are cross-gradient and have limited potential to impact the Site should a release have occurred. No EDR Hist Cleaner facilities were identified beyond a ⅛-mile radius of the Site. The EDR Hist Cleaner data is updated internally by EDR, Inc.

Additional Records

23. Orphan Sites: The EDR Report also identifies "Orphan Sites" which are sites identified on the EDR database but, due to poor or inadequate address information, their locations relative to the Site could not be mapped. One "Orphan Site" was identified in the EDR Radius Map Report. It does not appear that the "Orphan Site" is located immediately adjacent to the Site (EDR Inc., 2017).

4.2 Additional Environmental Record Sources

Matrix contacted the USEPA, NYSDEC, Nassau County Clerk and Fire Department, and Westbury Municipal Clerk regarding environmental files for the Site. In addition, Matrix obtained property cards for the Site from Nassau County's online database. Copies of FOIL requests and responses and property cards are provided in Appendix C.

Responses from all agencies requested have not been received at this time. The only response received was from Nassau County, and no information was made available.

Due to quality issues, the property cards were difficult to read. However, from the property card dated 7/25/38, Matrix was able to identify that there was an existing two-story structure of approximately 662 square feet, and it contained a septic tank or cesspool. The structure's foundation was constructed from brick walls, the exterior walls were made of wood shingles, and the roofing was made of asphalt shingles. No heating system was identified, although there was electricity powering the lights. For further information and review, the property cards are provided in Appendix C.

In addition, Matrix reviewed EPA's Envirofacts for a list of EPA-regulated facilities and identified the following information:

- Artisan Columbia (EPA Registry ID# 110004557694), located at 469 Union Avenue, is listed under RCRAINFO as a CESQG facility.
- Bartlett Tree Company (EPA Registry ID# 110009324267), located at 345 Union Avenue, is listed under SEMS as a superfund (non-npl) facility and under RCRAINFO as an unspecified universe.
- Franks Auto Body Inc. (EPA Registry ID# 110004398198), located at 340 Maple Avenue, is listed under RCRAINFO as an unspecified universe.
- Glen Oaks Club (EPA Registry ID# 110004444218), located at 175 Post Avenue, is listed under RCRAINFO as a CESQG facility.
- Harrys Automotive (EPA Registry ID# 110004501771), located at 200 Post Avenue, is listed under RCRAINFO as an unspecified universe.
- J & J Auto Truck Repair (EPA Registry ID# 110004480044), located at 135 Sullivan Lane, is listed under RCRAINFO as an unspecified universe.
- Jolea Ent. Ltd. Dba. Westbury Valet (EPA Registry ID# 110008008967), located at 123 Post Avenue, is listed under RCRAINFO as an unspecified universe.

- Len-Tone Auto Inc. (EPA Registry ID# 110004432276), located at 401 Railroad Avenue, is listed under RCRAINFO as a CESQG facility.
- Rite Aid #4768 (EPA Registry ID# 110044987618), located at 210 Post Avenue, is listed under RCRAINFO as a large quantity generator (LQG) facility.
- Senator Printing Corp. (EPA Registry ID# 110004337708), located at 134 Linden Avenue, is listed under RCRAINFO as an unspecified universe.
- Vishay General Semiconductor LLC (EPA Registry ID# 110000323766), located at 172 Spruce Street, is listed under RCRAINFO as an unspecified universe, under Integrated Compliance Information System (ICIS) as a stormwater industrial facility and an ICIS-National Pollutant Discharge Elimination System (NPDES) non-major facility, and under Toxics Release Inventory (TRI) as a TRI reporter facility.
- Westbury Top Cleaners Inc. (EPA Registry ID# 110042087764), located at Post Avenue, is listed under RCRAINFO as a CESQG facility and under AIRS/AFS as an air minor (operating) facility.

A copy of the EPA's Envirofacts online records are provided in Appendix I.

4.3 Historical Use Information on the Property and Surrounding Properties

4.3.1 Sanborn Maps

A search was made through EDR for historical Sanborn Fire Insurance (Sanborn) maps for the Site. Fire insurance maps were initially produced by private companies for the insurance industry to provide information on fire risks to buildings and other structures. Fire insurance maps serve as an historical resource for evaluating the potential for site contamination based on history of past use. As a result of the search, Sanborn maps for the years 1910, 1920, 1929, 1941 and 1968 were available for the Site and surrounding area. Significant features of the Site and surrounding area for each map are described below. A copy of the Sanborn Map Report is included in Appendix D.

1910 Sanborn Map

The 1910 Sanborn map indicates that the Site is mainly unimproved and undeveloped. The south and southwest portions of the Site are improved with five structures, including two sheds, a livery, and a hotel. The surrounding area consists of undeveloped/vacant land to the immediate north and east, with a dwelling and wagon shed farther northwest and a dwelling and two sheds farther east, as well as Wagon Works & Auto Repairs to the southeast. Railroad Avenue lies to the south followed by the LIRR Main Line tracks and the Westbury LIRR Station, and various structures occupy land to the west, including sheds, saloons, hotels, and a livery, followed by Post Avenue (Westbury Boulevard).

1920 Sanborn Map

The 1920 Sanborn Map indicates that the Site is improved with two buildings designated for automobile use, one in the western portion of the Site and one in the southern portion, and one of the areas previously occupied by a shed has become a bigger structure. The livery in the southwestern portion of the Site is identified as A. Barney Livery. The surrounding area consists of undeveloped/vacant land to the immediate north with a post office and automobile-designated building to the northwest, an automobile-designated building, contractor (A.P. Kohler), and wagon and steam roller sheds to the immediate east beyond which is C. Christ Wheelwright Blacksmith and Machine Shop, Railroad Avenue to the south followed by the LIRR Main Line tracks and Westbury Station, and various structures to the west, including sheds, automobile-designated buildings, barber shops, a tailor, a cobbler, and other commercial buildings, followed by Post Avenue (Westbury Boulevard). No other significant changes have occurred to the surrounding area since the 1910 Sanborn Map.

1929 Sanborn Map

The 1929 Sanborn Map indicates that two more structures were added to the Site and designated for automobile use. The livery is now identified as A. Barney Taxi Service. No other significant changes have occurred to the Site since the 1920 Sanborn Map. The surrounding area consists of Scally Place to the immediate north with dwellings, stores, a post office, and Wheatley Hills National Bank to the northwest, a contractor yard to the immediate east beyond which is C. Christ, Wagon Works & Auto Repairs, Union Avenue (Railroad Avenue) to the south followed by the LIRR Main Line tracks and the Westbury LIRR Station, and various shops, dwellings, commercial buildings, and a Right of Way to the west, followed by Post Avenue (Westbury Boulevard). No other significant changes have occurred to the surrounding area since the 1920 Sanborn Map.

1941 Sanborn Map

The 1941 Sanborn Map illustrates that the Site is mainly vacant/undeveloped, except for two automobile-designated buildings and two dwellings in the western portion of the Site and one automobile-designated building in the southwestern portion of the Site. The surrounding area consists of Scally Place to the immediate north with multiple stores, a dwelling, two automobile-designated structures and Wheatley Hills National Bank to the northwest, a contractor yard to the immediate east beyond which is E. J. Christ, Wagon Works & Auto Repairs, Union Avenue (Railroad Avenue) to the south followed by the LIRR Main Line tracks and Westbury LIRR Station, and various shops, dwellings, commercial buildings, a filling station with two gasoline tanks, and a Right of Way to the west, followed by Post Avenue (Westbury Boulevard). No other significant changes have occurred to the surrounding area since the 1929 Sanborn Map.

1968 Sanborn Map

The 1968 Sanborn Map illustrates that the undeveloped portions on the Site are designated as a parking field. No other significant changes have occurred to the Site since the 1941 Sanborn Map. The surrounding area consists of Scally Place to the immediate north with an electrical appliances warehouse, a club, and multiple stores to the northwest, Union Coal & Oil Company (coal yard) to the immediate east beyond which is a lumber yard, Union Avenue (Railroad Avenue) to the south followed by the LIRR Main Line tracks and the Westbury LIRR Station, and various shops, commercial buildings, a filling station, and a Right of Way to the west, followed by Post Avenue (Westbury Boulevard). The gasoline tanks near the filling station are no longer depicted. A dry cleaner exists to the southwest of the Site, beyond Post Avenue. No other significant changes have occurred to the surrounding area since the 1941 Sanborn Map.

4.3.2 Aerial Photographs

An inquiry was made with EDR to obtain historical aerial photographs for the Site. Additional aerial photographs were also obtained from NJDEP and historicaerials.com. Aerial photographs were reviewed for the years 1938, 1947, 1951, 1953, 1962, 1966, 1974, 1976, 1980, 1985, 1994, 2006, 2009, and 2011. These photographs were used to determine prior land usage and major improvements to the Site and surrounding area. A copy of the Aerial Photograph Report is included in Appendix E.

1938 Aerial Photograph (1"=500' miles)

The 1938 aerial photograph indicates that the Site is mainly undeveloped land, with what appears to be a structure in the western portion of the Site. The surrounding area consists of a roadway to the immediate north followed by houses, commercial buildings and a parking lot, a roadway to the immediate south followed by a railroad and then undeveloped land and what appears to be a cemetery, developed land, with structures, to the east, and partially developed land and some forested areas to the west.

1947 Aerial Photograph (1"=500')

The 1947 aerial photograph indicates that the Site is mainly used as a parking lot, with buildings in the western portion of the Site. No significant changes have occurred to the surrounding area since the 1938 aerial photograph.

1951 Aerial Photograph (1"=500')

The 1951 aerial photograph indicates that the Site is mainly used as a parking lot, with buildings in the western portion of the Site. The surrounding area consists of a roadway to the immediate north followed by houses,

commercial buildings and a parking lot, a roadway to the immediate south followed by a railroad and then undeveloped land and what appears to be a cemetery, and developed land, with structures, to the east and west.

1953 Aerial Photograph (1"=500')

The 1953 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1951 aerial photograph.

1962 Aerial Photograph (1"=500')

The 1962 aerial photograph indicates that the Site is mainly used as a parking lot, with buildings in the western portion of the Site. The parking lot beyond the roadway to the north has expanded, the undeveloped land beyond the railroad to the south has been developed into a parking lot, and a new parking lot has been developed to the southwest of the Site. No other significant changes have occurred to the surrounding area since the 1953 aerial photograph.

1966 Aerial Photograph (1"=500')

The 1966 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1962 aerial photograph.

1974 Aerial Photograph (1"=500')

The 1974 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1966 aerial photograph.

1976 Aerial Photograph (1"=500')

The 1976 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1974 aerial photograph.

1980 Aerial Photograph (1"=500')

The 1980 aerial photograph indicates that no significant changes have occurred to the Site since the 1976 aerial photograph. The parking lot to the west of the Site has expanded to the edge of Post Avenue, and the parking lot to the north of the Site, beyond the roadway, has expanded. No other significant changes have occurred to the surrounding area since the 1976 aerial photograph.

1985 Aerial Photograph (1"=500')

The 1985 aerial photograph indicates that the central portion of the on-Site parking lot appears to have expanded westward. Due to the lack of clarity of the aerial, it is difficult to determine the exact extent on the on-Site parking lot. No other significant changes have occurred to the Site or surrounding area since the 1980 aerial photograph.

1994 Aerial Photograph (1"=500')

The 1994 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 1985 aerial photograph.

2006 Aerial Photograph (1"=500')

The 2006 aerial photograph indicates that the parking lot appears to have expanded to the entirety of the Site. To the immediate southwest of the Site appears to be a large hotel building, and to the north, beyond the roadway, land previously developed appears to be undeveloped. No other significant changes have occurred to the surrounding area since the 1994 aerial photograph.

2009 Aerial Photograph (1"=500')

The 2009 aerial photograph indicates that no significant changes have occurred to the Site since the 2006 aerial photograph. The previously undeveloped land to the north, beyond the roadway, has been improved with four large, long structures. No other significant changes have occurred to the surrounding area since the 2006 aerial photograph.

2011 Aerial Photograph (1"=500')

The 2011 aerial photograph indicates that no significant changes have occurred to the Site or surrounding area since the 2009 aerial photograph.

4.3.3 Historical Topographic Maps

An inquiry was made with EDR to obtain historical USGS topographic maps for the Site. Historical topographic maps were reviewed for the following quadrants and years: Hempstead and Oyster Bay, New York 1897, 1898, 1899, and 1900; Hempstead, New York 1903; Hicksville and Freeport, New York 1947, 1954, 1955, 1967, 1969, 1979, and 2013; and Freeport, New York 1994. No significant changes in elevation were noted. Copies of the historical topographic maps can be found in Appendix F.

1897 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1897 Hempstead and Oyster Bay Quadrant Topographic Map indicates that the Site is undeveloped. The land to the immediate north and east are undeveloped. To the west of the Site is a roadway and to the south of the South is the LIRR. There are small buildings southwest of the Site.

1898 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1898 Hempstead and Oyster Bay Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1897 Hempstead and Oyster Bay Quadrant Topographic Map.

1899 and 1900 Hempstead and Oyster Bay Quadrant Topographic Map (1:62,500)

The 1899 and 1900 Hempstead and Oyster Bay Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1898 Hempstead and Oyster Bay Quadrant Topographic Map.

1903 Hempstead Quadrant Topographic Map (1:62,500)

The 1903 Hempstead Quadrant Topographic Map is unmapped for the Site and its surrounding properties.

1947 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1947 Hicksville and Freeport Quadrant Topographic Map indicates that the Site is still undeveloped. The land to the north, east, and west has become more developed with buildings. To the south of the Site, beyond the LIRR, is now the Holy Rood Cemetery, and to the far northwest of the Site is a pumping station. To the north of the cemetery is a roadway, now recognized as Railroad Avenue. No other significant changes have occurred to the surrounding area since the 1899 and 1900 Hempstead and Oyster Bay Quadrant Topographic Map.

1954 and 1955 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map illustrates only identified structures, including two schools northwest of the Site beyond Maple Avenue, one school to the east of the Site beyond School Street, and one school to the south of the Site west of the cemetery. There is also a water tower to the west of the previously identified pumping station.

1967 and 1969 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1967 and 1969 Hicksville and Freeport Quadrant Topographic Map indicates that no changes have occurred to the Site since the 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map. A roadway, now recognized as Scally Place, is now illustrated to the immediate north of the Site. A large series of structures is

now identified southeast of the Site immediately beyond the LIRR and north of the cemetery. No other significant changes have occurred to the surrounding area since the 1954 and 1955 Hicksville and Freeport Quadrant Topographic Map.

1979 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 1979 Hicksville and Freeport Quadrant Topographic Map indicates that no significant changes have occurred to the Site or surrounding area since the 1967 and 1969 Hicksville and Freeport Quadrant Topographic Map.

1994 Freeport Quadrant Topographic Map (1:62,500)

The 1994 Freeport Quadrant Topographic Map is unmapped for the Site and its surrounding properties.

2013 Hicksville and Freeport Quadrant Topographic Map (1:24,000)

The 2013 Hicksville and Freeport Quadrant Topographic Map indicates that the Site is still undeveloped. The map illustrates no structures surrounding the Site other than a fire station north of the Site beyond Maple Avenue. No other significant changes have occurred to the Site or surrounding area since the 1979 Hicksville and Freeport Quadrant Topographic Map.

4.3.4 City Directory

City directories serve as a historical resource by listing the name of a resident or the name and type of a business at a particular address. A search was made by EDR for historical city directories of the Site and immediately adjacent properties. As a result of the search, the city directories were reviewed for the years 1973, 1978, 1983, 1988, 1992, 1995, 1999, 2003, 2008, and 2013. Sources of the reviewed city directories include Cole Information Services and Cole Criss-Cross Directory. A copy of the City Directory Abstract Report is included in Appendix G.

Based on a review of the City Directory Abstract, the Site was not identified in the EDR City Directory Abstract. Neighboring properties to the east were listed as further described below:

Address	Use	Year(s)
314 Scally Place	Residence	1973, 1978, 1983, 1988, 2003, 2008, 2013
320 Scally Place	Residence	1973, 1978, 1983, 1988, 1992, 2003, 2008, 2013
322 Scally Place	Residence	1973, 1978, 1983, 1988, 1992, 2008
332 Scally Place	Residence	1973, 1978, 1983, 1988, 1992, 2003, 2008, 2013
338 Scally Place	Residence	1973, 1978, 1983, 1988, 2003, 2013
344 Scally Place	Residence	2013
	Oilex of NY	2003

Address	Use	Year(s)
	Triple L Oil Transport Inc.	1992, 1995
	Residence	1973, 1978, 1983, 1988
351 Scally Place	Genesis Assembly of God	2003, 2008, 2013
	Genesis Asamblea Dedios, Westbury Community Improvement Corporation	1999
	The Camp Shop, Kamer Knit & Screen	1988
	Fil-Coil Co. Cin.	1978
	Ashland Optical, Jan Optical Co. Inc.	1973
352 Scally Place	Residence	1973, 1978, 1983, 1988, 1992, 2003
355 Scally Place	Westbury Electronic Service Inc.	2013
	Hodges International, Westbury Electronic Service	2003
	Westbury Electronic Svce. Incorporated	1999
	Westbury Aircraft, Westbury Electronic	1988, 1995
	Westbury Aircraft. Sv.	1983
	RAC Mechanical, Vhb Refrigrtn.	1978
	Jon-Michel Ltd., Steffy Ltd.	1973
357 Scally Place	Aerolyusa Inc., Palm Services Corporation	1999, 2013
	Aerolyusa Inc.	1992, 1995, 2003, 2008
	Aerolyusa Inc., Viscockis Brothers	1978, 1983, 1988
	NF&M Corp., Viscockis Brothers	1973

No cross streets were identified.

4.4 Tier 1 Vapor Encroachment Screening

Matrix conducted a VES in general accordance with the ASTM Designation E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

The objective of the VES is to conduct an initial screening to determine whether current or historical practices associated with the Site or nearby properties have the potential to have created a Vapor Encroachment Condition (VEC). The term VEC is defined by ASTM Standard 2600-15 "as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site caused by the release of vapors from contaminated soil and/or groundwater on or near the Site as identified by Tier 1 or Tier 2 procedures."

The Tier 1 screening process includes the following: (1) a search distance test to determine if there are known or suspect contaminated properties in the area of concern (AOC); and (2) a volatile contaminant of concern (COC) test to determine for those known or suspect contaminated properties within the AOC whether or not a COC is likely to be present.

Matrix reviewed standard environmental record sources typically collected as part of the ASTM E1527-13 Phase I to determine if there are known or suspected sources of contamination within the AOC. The AOC is determined utilizing the approximate minimum search distances as defined by ASTM E2600-15. The approximate minimum search distance is based upon the type of COC; petroleum hydrocarbons or non-petroleum hydrocarbons. Generally, the approximate minimum search distance with regards to the AOC is one-third mile for non-petroleum hydrocarbons and one-tenth mile for petroleum hydrocarbons.

There are four possible conclusions of the Tier 1 screening process which include: (1) a VEC exists; (2) a VEC likely exists; (3) a VEC cannot be ruled out; or (4) a VEC can be ruled out because a VEC does not or is not likely to exist. If a VEC does not exist or is unlikely to exist, then the VES process is considered complete in general accordance with ASTM E2600-15. If a VEC cannot be ruled out in the Tier 1 screen, then further action may be recommended (i.e., Tier 2). A Tier 2 screening is excluded from the scope of the Tier 1 process.

4.4.1 Standard Environmental Record Sources

A VES was completed for the Site and surrounding area through a search by EDR dated March 7, 2017. The VES utilizes standard environmental record sources to determine if there are known or suspected sources of contamination within the AOC. The search was conducted in general accordance with ASTM E 2600-15 standards.

Based on the findings of the VES Worksheet, a VEC cannot be ruled out, due to the following facilities:

- Union Oil, located at 333 Union Avenue, 0.008 miles southeast of the Site and one foot lower in elevation relative to the Site.
- Bartlett Tree Company, located at 345 Union Avenue, 0.023 miles east/southeast of the Site and one foot lower in elevation relative to the Site.
- Glen Oaks Country Club, located at 175 Post Avenue, 0.031 miles west/northwest of the Site and two feet higher in elevation relative to the Site.
- 177 Post Avenue, 0.042 miles northwest of the Site and two feet higher in elevation relative to the Site.
- 179 Post Avenue, 0.043 miles northwest of the Site and two feet higher in elevation relative to the Site.

- Medical Repair Lab, located at 141 Linden Avenue, 0.044 miles east/northeast of the Site and at equal elevation relative to the Site.
- Westbury Fire, located at 355 Maple Avenue, 0.085 miles north/northeast of the Site and four feet higher in elevation relative to the Site.
- Sammy's Getty Station, located at 200 Post Avenue, 0.088 miles north/northwest of the Site and four feet higher in elevation relative to the Site.
- 123 Post Avenue, 0.099 miles southwest of the Site and one foot lower in elevation relative to the Site.
- Westbury Valet/Top Cleaners, located at 123 Post Avenue, 0.099 miles southwest of the Site and one foot lower in elevation relative to the Site.

A copy of the Vapor Encroachment Screen is included in Appendix H.

4.5 USER PROVIDED INFORMATION

4.5.1 Title Records

Chain-of-Title records were not provided for review by Matrix. Based on information obtained from Nassau County's *Land Records Viewer*, Scally Place (Block 228, Lots 12, 792, and 793) in the Village of Westbury, Nassau County, New York is owned by the Village of Westbury. No other chain-of-title records were made available by the User.

4.5.2 Environmental Liens or Activity and Use Limitations

No records regarding environmental liens or activity and use limitations were provided by the User for review.

4.5.3 Specialized Knowledge

Specialized knowledge of RECs or potential RECs in connection with the Site has been included in Section 5.0.

4.5.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information has been provided in Section 10.0.

4.5.5 Valuation Reduction for Environmental Issues

No information regarding the valuation reduction for environmental issues was provided by the owner.

4.5.6 Owner, Property Manager, and Occupant Information

The Site is currently owned by the Village of Westbury and has no residing occupants.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A reconnaissance of the Site and surrounding area was performed on March 6, 2017 by Jordan Farber, Environmental Scientist of Matrix. No Site personnel were present during the site reconnaissance. All exterior areas of the property were inspected during the Site reconnaissance. There are no interior structures on-Site. During the site reconnaissance, cars were parked in almost all parking spaces within the Site and is noted as a limitation. Photographs of significant features identified during the Site reconnaissance are included in Appendix B.

5.2 General Site Setting

The Site is located at Scally Place and occupies Block 228, Lots 12, 792, and 793 in the Village of Westbury, Nassau County, New York. The Site consists of three parcels forming one large asphalt-paved parking lot.

5.3 Exterior Observations

5.3.1 Hazardous Substances/Wastes

No evidence of hazardous substances or wastes was observed on exterior portions of the Site during the Site reconnaissance.

5.3.2 Bulk Storage Tanks and Appurtenances

Aboveground Tanks and Associated Piping

No evidence of ASTs and associated piping was observed on exterior portions of the Site during the Site reconnaissance.

Underground Tanks and Associated Piping

No evidence of USTs and associated piping was observed on exterior portions of the Site during the Site reconnaissance.

Storage Pads and Areas Including Drum/Waste Storage

No evidence of storage pads and areas including drum/waste storage was observed on exterior portions of the Site during the Site reconnaissance.

Rail, Truck, or Other Loading and Unloading Areas

No evidence of rail, truck, or other loading and unloading areas was observed on exterior portions of the Site during the Site reconnaissance.

Pump Stations, Sumps, and Pits

No pump stations, sumps, or pits were observed on exterior portions of the Site during the Site reconnaissance.

Surface Lagoons and Impoundments

No surface lagoons or impoundments were observed on exterior portions of the Site during the Site reconnaissance.

5.3.3 Drainage Systems and Areas

Surface Water Bodies

No surface water bodies were observed on exterior portions of the Site during the Site reconnaissance.

Sanitary Sewer Collection Systems

No sanitary sewer collection systems were observed on exterior portions of the Site during the Site reconnaissance.

Stormwater Collection Systems

Stormwater catch basins were observed in the southwest, northwest, and northeast portions of the Site.

Septic Systems and Leach Fields

No septic systems or leach fields were observed on exterior portions of the Site during the Site reconnaissance.

Seepage Pits and Dry Wells

No seepage pits or dry wells were observed on exterior portions of the Site during the Site reconnaissance.

Stormwater Detention Ponds and Fire Water Ponds

No stormwater detention ponds or fire water ponds were observed on exterior portions of the Site during the Site reconnaissance.

Drainage Swales and Culverts

No drainage swales or culverts were observed on exterior portions of the Site during the Site reconnaissance.

5.3.4 Discharge and Disposal Areas

Solid Waste Generation/Disposal and Dumpsters

No dumpsters were observed on exterior portions of the Site during the Site reconnaissance; however, multiple dumpsters were observed on properties immediately adjacent to the Site.

Sanitary/Process Waste Generation/Discharge Points

No evidence of sanitary/process waste generation or discharge points was observed on exterior portions of the Site during the Site reconnaissance.

Underground Piping, Including Industrial Process Sewers

No evidence of underground piping, including industrial process sewers were observed on exterior portions of the Site during the Site reconnaissance.

Waste Piles

No evidence of waste piles was observed on exterior portions of the Site during the Site reconnaissance.

Landfills or Landfarms

Based on a review of the State's Solid Waste Facility Directory and the Site reconnaissance, no landfills or landfarms are located in close proximity to the Site.

Open Pipe Discharges

No open pipe discharges were observed on exterior portions of the Site during the Site reconnaissance.

5.3.5 Transformers

Based on the Site reconnaissance no transformers were observed within the Site. However, four transformer boxes were observed mounted on two telephone poles immediately adjacent to the south of the Site.

Matrix contacted LIPA, the owner of the transformers, regarding the contents of the transformers and received the following response:

"No analytical data is available for these transformers. However, all distribution transformers owned by LIPA were specified at the time of purchase from the manufacturer to contain a dielectric fluid consisting of mineral oil, not PCBs. As a result, LIPA's in-service transformers typically are expected to either contain no detectable PCBs or low levels of PCBs (typically <0.01%). Even though mineral oil was specified, low levels of PCBs could

nonetheless be present because manufacturers sometimes manufactured mineral oil transformers in close proximity to transformers manufactured to specifically contain PCBs. LIPA does not routinely conduct sampling and analysis of transformers for PCBs as that would require the incurrence of an outage and costs that would have to be passed on to the customer. Instead, units are tested when they retired from active service."

5.4 Interior Observations

There are no interior areas present on-Site.

6.0 INTERVIEWS

6.1 Interview with Owner

No additional personnel were present on the Site during the Site reconnaissance. A user questionnaire was provided to the LIRR and information provided has been included throughout this report. A copy of the completed Prospective Landowner and/or User Questionnaire is included in Appendix J.

6.2 Interview with Site Manager

As indicated above, no additional personnel were present on the Site during the Site reconnaissance. A phone interview was conducted with Bill Mello, Village of Westbury's Superintendent of Buildings, to clarify information throughout this document.

6.3 Interview with Occupants

The Site does not consist of any occupants.

6.4 Interview with Local Government Officials

As indicated above (Section 5.2), Matrix contacted the USEPA, NYSDEC, Nassau County Clerk and Fire Department, and the Westbury Village Municipal Clerk regarding environmental files for the Site. Information request letters and responses associated with these agencies are included in Appendix C.

6.5 Interview with Others

A Prospective Landowner and/or User Questionnaire was provided to the LIRR for completion. Responses provided on the Prospective Landowner and/or User Questionnaire have been included throughout this report. A copy of the Prospective Landowner and/or User Questionnaire is provided in Appendix J.

7.0 FINDINGS & OPINIONS

Based on the site reconnaissance, database review, historical review, review of available records, and interviews with persons familiar with the Site and surrounding area, Matrix is providing findings and opinions including RECs, historical recognized environmental conditions (HRECs), *de minimis* conditions, and data gaps.

Matrix performed a Phase I ESA of the site at Scally Place in Westbury, New York in general conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 6.3 of this report. This assessment has revealed the following four RECs in connection with the site:

- The properties adjoining the Site to the east, which are the rear portions of 333 and 345 Union Avenue are currently occupied by a contractor's yard and were previously a coal yard in 1968 (the exact dates are not known) and a contractor's yard from at least 1920 through sometime prior to 1968. Based on these former and current uses, these facilities have the potential for a history of usage of petroleum products and chemicals that may pose a threat to the Site and so it is recognized as a concern.
- Union Oil, previously located at 333 Union Avenue, adjoining property to the east of the Site along Union Avenue, was listed on the LTANKS, NY UST and NY Spills databases due to two closed spills. There were previously at least one 3,000-gallon unleaded gasoline tank and three 50,000-gallon and five 20,000-gallon #2 fuel oil USTs on-site, closed in 1988. Two spills, spill #8801831 concerning gasoline and spill number #8801206 concerning #2 fuel oil, occurred on-site and have subsequently been closed to the satisfaction of NYSDEC. The LTANKS record indicates that NYSDEC files were destroyed. Due to the lack of available information about the extent of the remedial measures performed and former locations of the tanks relative to the Site, this facility has the potential for contamination to have migrated onto the Site.
- The property adjoining the Site to the west, currently an apartment building located at 130 Post Avenue, was previously a filling station with two underground storage tanks (USTs), as shown on the 1941 and 1968 Sanborn maps. This site is not listed in the databases researched and the status of the USTs is not known. Spills on this property could potentially have impacted the Site, due to its proximity.
- Vapor Encroachment Condition (VEC): A Tier 1 Vapor Encroachment Screen (VES) was completed by Matrix using EDR's Vapor Encroachment Screen Worksheet. Based on available information, a VEC could not be ruled out at the Site. Please see Section 4.5 above for further discussion on the Tier 1 VES.

Controlled RECs

- No CRECs were identified for the Site.

Historical RECs

- No HRECs were identified for the Site.

De Minimis Conditions

- No *de minimis* conditions were observed or identified through interviews or records review of current or historical uses of the Site and adjoining properties.

Other Findings

Matrix identified the following other findings as a result of the Phase I ESA:

- 159 Post Avenue is the location of a historical automotive body shop, and is 0.059 miles west of the Site at a higher elevation. There is no indication that there has been a spill or other source of contamination from the facility.
- 150 Linden Avenue is the location of a historical automotive technician's facility, and is 0.060 miles east of the Site at a higher elevation. There is no indication that there has been a spill or other source of contamination from the facility.
- 401 Railroad Avenue is the location of a historical automotive body shop, and is 0.082 miles east/southeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 165 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.105 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 159 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.105 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 135 Sullivan Lane is the location of a historical automotive repairs shop, and is 0.109 miles east/northeast of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 177 Post Avenue is the location of the historical dry-cleaning facility S & Shine Dry Cleaners Inc., and is 0.042 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 249 Maple Avenue is the location of the historical dry-cleaning facility Kim S Tailoring & Cleaners Corp., and is 0.088 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.

- 247 Maple Avenue is the location of the historical dry-cleaning facility Chinese Laundry, and is 0.100 miles northwest of the Site. There is no indication that there has been a spill or other source of contamination from the facility.
- 200 Post Avenue, formerly known as Sivam, Inc., Sammy's Store & Gas, Harry's Automotive and Sammy's Getty, located 0.087 miles northwest of the Site, and at a higher elevation relative to the Site was listed on the following databases: historical automotive, NY UST, the New York State Brownfield sites (NY ERP), Resource Conservation and Recovery Act (RCRA) Non-Generator (Non-Gen) and New York State Manifest (NY Manifest). Two USTs were previously removed and from observations made during the Site visit, this property has been remediated under the NYSDEC Environmental Restoration Program and is currently used as a park/public space. Based on the NYSDEC involvement in restoring the property and the current status as a park, this property would not be considered a REC. The prior history of the site as a gas station and proximity to the Site qualify it as an other finding.

Data Gaps

- To date, responses to most FOIL requests submitted have not been received. All responses will be forwarded upon receipt with recommendations, if necessary.
- The entirety of the Site was inspected during Matrix's walkthrough, though most of the Site was covered by parked cars, limiting a complete inspection.

8.0 DEVIATIONS

The Phase I ESA was performed in general accordance with the ASTM 1527-13 Standards as well as the detailed scope of services presented in Section 2.2 of this report.

9.0 ADDITIONAL SERVICES

No additional services were performed beyond the detailed scope presented in Section 2.2 of this report.

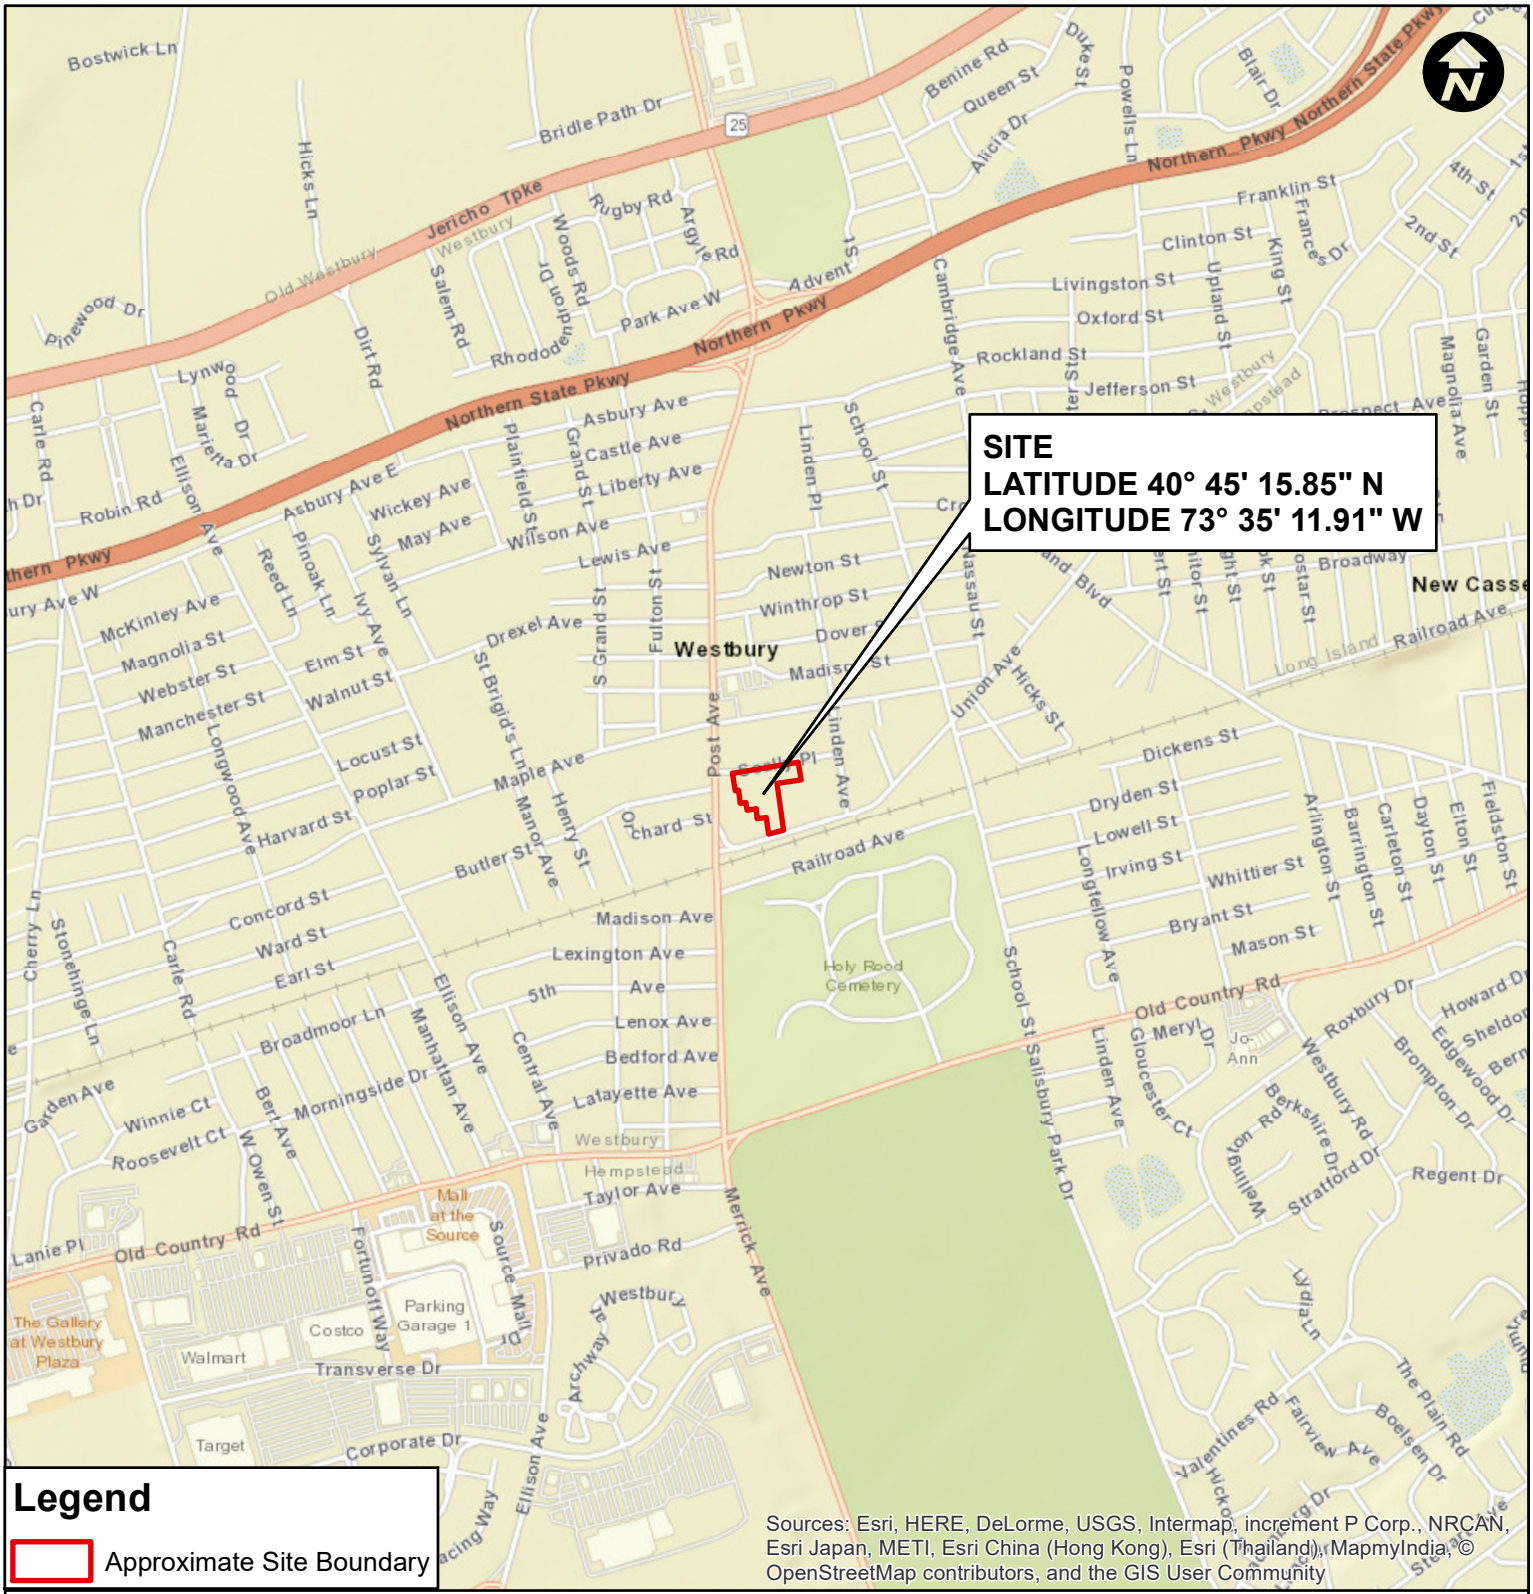
11.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Matrix declares, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and preformed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jordan Farber
Environmental Scientist

Brian Crespi
Project Manager

Mindy Chassin Horowitz
Program Director



12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

JORDAN FARBER
Environmental Scientist
Mr. Farber has experience in environmental investigations including environmental oversight, environmental assessment, remediation, and due diligence projects under NJDEP, NYCDEP, and NYSDEC jurisdiction for commercial, industrial, and residential facilities. Mr. Farber's experience includes, but is not limited to, soil and groundwater sampling, oversight of UST removal and temporary and monitoring well installations, soil classification, processing and analysis of laboratory data, Electronic Data Deliverables (EDDs), and Phase I Site Assessments. He is proficient in Geographic Information System (GIS), gINT, and Surfer software.

BRIAN CRESPI
Project Manager
Mr. Crespi has over eight years of experience in the environmental consulting field performing initial and remedial site assessments, hazardous materials assessments, construction oversight, health and safety monitoring, remedial design, and landfill gas evaluations. Mr. Crespi's areas of expertise include brownfield cleanup and redevelopment; investigation and remediation of sites with potential hazardous material contamination; litigation support for cost recovery and insurance matters; development of remedial cost estimates; and vapor intrusion assessments and remediation. Mr. Crespi has extensive experience conducting investigations for clients in both the public and private sectors, including projects focusing on railroads, landfills, industrial and commercial facilities, as well as impacts on neighboring or proposed residential development. Mr. Crespi has developed and directed the implementation of numerous soil, groundwater and vapor intrusion sampling programs for remedial investigations at industrial facilities being evaluated under the New York Spill Response Program and SRRA and ISRA in New Jersey. His environmental science and engineering background, along with varied experience in New York and New Jersey, provide the foundation to develop and implement investigation and remediation plans and develop the findings into reports for various state and federal regulatory programs. Mr. Crespi is certified through the NYC Mayor's Office of Environmental Remediation, as an OER Certified Brownfield Professional, to efficiently achieve brownfield cleanup and redevelopment on New York City Brownfield sites.

MINDY CHASSIN HOROWITZ
Project Director
Ms. Horowitz has over 20 years of experience in the environmental consulting field performing hazardous materials assessments, waterfront permitting, construction oversight and remedial design. Ms. Horowitz's areas of expertise include brownfield cleanup and redevelopment; investigation and remediation of New York City e-designation sites (sites with a zoning map amendment) with potential hazardous material contamination; stormwater pollution prevention; environmental due diligence of industrial, commercial, residential and mixed-use facilities; litigation support for cost recovery and insurance matters; and development of remedial cost estimates. She has extensive experience managing and conducting hydrogeologic investigations for clients in both the public and private sectors, including projects focusing on rail roads, highways, airports and industrial and commercial facilities. Ms. Horowitz has developed and directed the implementation of numerous soil, groundwater and sediment sampling programs for remedial investigations at industrial facilities being evaluated under ISRA. Her combined hydrogeological and geo-environmental engineering background, along with her varied experience in New York and New Jersey, enable her to compile and interpret analytical data to develop clear and technically defensible conceptual site models and incorporate these findings into reports for various state and federal regulatory programs. Mindy is certified through the NYC Mayor's Office of Environmental Remediation, as an OER Certified Brownfield Professional, to efficiently achieve brownfield cleanup and redevelopment on New York City Brownfield sites.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

BARTLETT TREE COMPAN	***345 UNION AVE***	***ESE 0 - 1/8 (0.023 mi.)***	***A5***	***13***

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/14/2016 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 01/04/2017 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/06/2017 has revealed that there are 25 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 10 NY UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

NY ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the NY ERP list, as provided by EDR, and dated 11/14/2016 has revealed that there is 1 NY

ERP site within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/06/2017 has revealed that there are 27 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Contact Name:	DOT NAPOLI
Contact Phone:	(516) 379-1500
DEC Memo:	"10/26/11 1145 Hrs (A): Napoli called- she said the Nassau County Health Department had not yet arrived to inspect the tanks and the soil excavation. 10/26/11 1145 Hrs (B): DEC informed her the NCHD could oversee the cleanup on DEC's behalf and that if the NCHD is satisfied with the cleanup we accept their findings, and directed her to call back with an update once the NCHD had inspected the site. DR 10/26/11 1230 Hrs (A): INSPECTOR GOLDEN (NASSAU COUNTY FIRE MARSHAL) CALLED FROM THE SITE- HE CONFIRMED THERE WAS CONTAMINATED SOIL PRESENT AND SAID 'HE WAS TOLD DEC WAS NOT RESPONDING'. 10/26/11 1230 Hrs (B): DEC informed him of what we had been told, and the directives provided to Milro by this office. 10/26/11 1230 Hrs (C): He said the tanks are not connected to a generator [WHICH WOULD MAKE THE TANKS SUBJECT TO THE NCFM CODE], so he was not clear why his office was called. 10/26/11 1230 Hrs (D): He said 'the ends of the tanks are like swiss cheese', that Milro had not yet completed the cleanup, and that he could not stay. 10/26/11 1230 Hrs (E): DEC informed him that Milro could proceed to excavate the contaminated soil if they wished but must must leave the excavation open if safe to do so and must leave the tanks on site pending an inspection by DEC. Golden said he felt it would be safe to leave the excavation open, even given the forecast for rain. 10/26/11 1230 Hrs (F): DEC informed Golden we only had one inspector available today, that it was unknown whether he could respond since he had several inspections scheduled, that we would contact the inspector and have him call Milro and/or the property representative, and that if Milro and/or the property representative had any questions to have them call DEC directly. DR 10/26/11 1240 Hrs: Called TD and informed him of the situation. He will call Milro later and discuss whether he needed to respond. DR 10/26/11 1240 Hrs: ANDY FINKELSTEIN (FINKELSTEIN REALTY 516-428-0935) left message. DR 10/26/11 1250 Hrs: Left message for Finkelstein. DR 10/26/11 1305 Hrs: Finkelstein left message. DR 10/26/11 1315 Hrs: Left message for Finkelstein. DR 10/26/11 1325 Hrs (A): Called PAUL BASSO (MILRO)- Milro had called the NCFM upon finding the contamination. 10/26/11 1325 Hrs: (B): HE SAID THEY COULD NOT LEAVE THE EXCAVATION OPEN DUE TO ITS PROXIMITY TO THE BUILDING AND THE FORECAST FOR RAIN, SO THEY HAD LINED THE EXCAVATION WITH PLASTIC AND BACKFILLED THE EXCAVATION. DR 10/26/11 approx 1330 Hrs: Finkelstein left message. DR 10/26/11 1340: Left message for Finkelstein. DR 10/26/11 1340 Hrs (A): Finkelstein called from the site- THESE TANKS HAD BEEN UNUSED FOR MANY YEARS, AND WERE NOT CONNECTED TO ANY EQUIPMENT. 10/26/11 1340 Hrs (B): MIKE PALMISANO (NCHD) WAS ON SITE, BUT MILRO HAD ALREADY BACKFILLED THE EXCAVATION.

JOSA PAL ASSOCIATES (Continued) **S111318273**

10/26/11 1340 Hrs (C): DEC informed Finkelstein the case would be assigned to an inspector tonight, and directed him to call back tomorow to discuss the situation and to schedule an inspection. HE INDICATED HE MIGHT SOLICIT OTHER CONTRACTORS FOR THE WORK. DR 10/26/11 1345 Hrs: Called TD to update him- he said he had already spoken to Milro. DR 11/9/11 FILE REASSIGNED"

Remarks: "Tank removal of 2 tanks and both showing evidence of soil impact. Cleanup pending."

Evaluation date: 12/12/2014
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Listing - General
Date achieved compliance: 03/17/2015
Evaluation lead agency: State

FINDS:

Registry ID: 110009324267

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: Location: The Bartlett Tree Company site is located at 345 Union Avenue in the Village of Westbury, Town of North Hempstead.Site Features: The site is approximately 0.4 acres in size. A new facility building is expected to replace the old one. Two additional structures, an equipment garage/pesticide locker and a storage shed have been removed from the site.Current Zoning/Use: The site is currently zoned for commercial use and is located in a commercial/industrial setting. The Bartlett Tree Company provides horticultural services to the surrounding communities. The Long Island Railroad’s Westbury train station is located immediately south

BARTLETT TREE COMPANY (Continued) **S106780906**

of the site. There is a residential neighborhood several blocks north of the site.Past Use of the Site: The Bartlett Tree Company has occupied the site since the mid 1950s. Pesticides are stored on-site for use in the horticultural services they provide. Site Geology/Hydrogeology: The water table is encountered approximately 29'-32' below ground surface, depending on seasonal variation. Overburden consists mainly of various size sands and gravels. The site specific groundwater flow direction is south/southwest.

Env Problem: Nature and Extent of Contamination: A Remedial Investigation was conducted to delineate the nature and extent of contamination on-site. Based upon the investigation, the primary contaminants of concern were the pesticides aldrin, alpha BHC, chlordane, DDD, DDE, DDT, dieldrin and lindane.Prior to Remediation:Shallow Surface Soil - Surface soil was characterized site-wide by collecting soil samples from zero to two feet below surface in a number of locations including from the following areas of concern: former pesticide storage locker, former open shed, test pit-1, test pit-2, stairway floor drain and mechanic's pit. Levels of pesticides in all soil samples collected from this depth interval were below the commercial use SCOs. All samples were below the protection of groundwater Soil Cleanup Objectives (SCOs) and the majority were below the residential SCOs.Subsurface Soil - Pesticides were detected in a subsurface soil beneath Drywell-1 at levels which exceeded the commercial use and protection of groundwater SCOs. The contaminants were detected in the drywell's bottom samples (approximately 7' below grade) and to a depth of approximately 32' below grade. Groundwater - Pesticides were detected in groundwater at levels which exceeded SCGs. Groundwater is encountered approximately 31 feet below grade. Volatile organic compounds (trichloroethene and cis-1,2-dichloroethene) were detected at levels exceeding SCGs in groundwater upgradient of the site. Levels of VOCs in on-site groundwater are generally non-detect with one detection marginally exceeding the SCG, and is not considered site related.Post-Remediation:Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were pesticides in soil and groundwater. Remediation in the form of source removal (soil excavation) has reduced contaminant levels in subsurface soil to levels meeting either the commercial use or protection of groundwater SCOs. Approximately 438 tons of contaminated soil was excavated and disposed of off-site at permitted disposal facilities. While pesticides in groundwater were found to exceed SCGs, detections were extremely low (parts per trillion) and are expected to diminish to levels meeting SCGs as a result of source removal. A Record of Decision was issued on March 31, 2014 which requires continued monitoring of on-site groundwater and for soil vapor intrusion. An Environmental Easement has been placed on the property and future monitoring will be undertaken pursuant to the Department approved Site Management Plan.

Health Problem: Since the site is fenced and covered by buildings, asphalt, or concrete, people will not come into contact with residual site-related soil and groundwater contamination unless they dig below the surface. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although sampling has indicated that impacts to indoor air are not a current concern, the potential exists to inhale

BARTLETT TREE COMPANY (Continued) **S106780906**

	contaminants in indoor air due to soil vapor intrusion in on-site building development and occupancy. Insufficient environmental information exists to evaluate the potential for soil vapor intrusion to occur in off-site areas.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
